

LFN AI Taskforce

i Participants in this group are expected to be specialists in the areas of AI and ML, specifically to help LFN define a strategy around the following:

- **Applications/AI Use Cases in Networking** - The new functionality that is made available using AI
- **Networking Domain Specific AI Models** - What requirements / datasets are unique to the networking vertical
- **Network Infrastructure for AI** - The network itself and the data it provides and/or acts upon from the above layers (Open Source Projects + Vendor solutions+ Domain Data)

Coming out of the special Aug 23, 2023 GB meeting on AI strategy the SPC took up the topic on how to help drive this. The decision was made that the most suitable place for this would be as a taskforce under the purview of the TAC.

- **This group is self-organized**
- **Meetings** - occur bi-weekly on Wednesday with one meeting at a US/EMEA-friendly timeslot of Wednesday15:00 UTC, and the next meeting at an APAC-friendly timeslot of 02:00 UTC. Note, the 02:00 UTC meeting may occur on a Tuesday evening depending on your time-zone.

Community members are encouraged to attend both meetings as meetings do not have repeat agendas and fresh material is covered at each meeting.

- [Click here to Register for the bi-weekly meeting at 15:00 UTC \(US/EMEA-friendly\)](#)
- [Click here to Register for the bi-weekly meeting at 02:00 UTC \(APAC-friendly\)](#)

Community Use Cases & Assets

Community Experts:

Name (use @macro)	Area of expertise / interest	What would you like to work on? (E.g., Datasets, models, use cases,...)
Nadathur Sundar	AI for Cloud-native Security & Networking	Public datasets, use cases relating to network security
Jason Hunt	Broad (not so deep) AI knowledge, foundation models	Use cases, but also interested in datasets
Andrei Agapi	AI/ML modelling, network automation use cases, LLMs	Use cases, datasets
