

End User Advisory Group Meeting: OVP Evolution

Long and Mid Term Priorities and Planning

Feb. 12, 2019

 **OLF** NETWORKING

 **THE LINUX** FOUNDATION

LFN CVC | A step back – what do we need

Note MANO could also be System Under Test

Standards / Requirements

	VNF Compliance Checks	VNF Validation Tests	VNF Performance Tests
VNFs	<p>Check against existing VNF standards such as:</p> <ul style="list-style-type: none"> ➤ ONAP VNFRQTS ➤ ETSI NFV ➤ GSMA ➤ 3GPP ➤ Operator specific requirements. 	<p>Validation tests for VNF running against various profiles. (LCM, Health, etc)</p> <ul style="list-style-type: none"> ➤ OpenStack ➤ VMWare ➤ Kubernetes ➤ etc 	<p>Performance tests for VNF running against a given Infrastructure profile</p> <ul style="list-style-type: none"> ➤ Profile A ➤ Profile B ➤ Profile C
NFVI	<p>Check against existing NFVI standards such as:</p> <ul style="list-style-type: none"> ➤ ETSI NFV ➤ GSMA 	<p>Validation tests for VFVI</p> <ul style="list-style-type: none"> ➤ OpenStack ➤ VMWare ➤ Kubernetes ➤ etc 	<p>Performance tests for NFVI against given Infrastructure profile</p> <ul style="list-style-type: none"> ➤ Profile A ➤ Profile B ➤ Profile C

Testing/ Certification Tools

Tooling to allow test cases to run and results to be submitted to a repository.

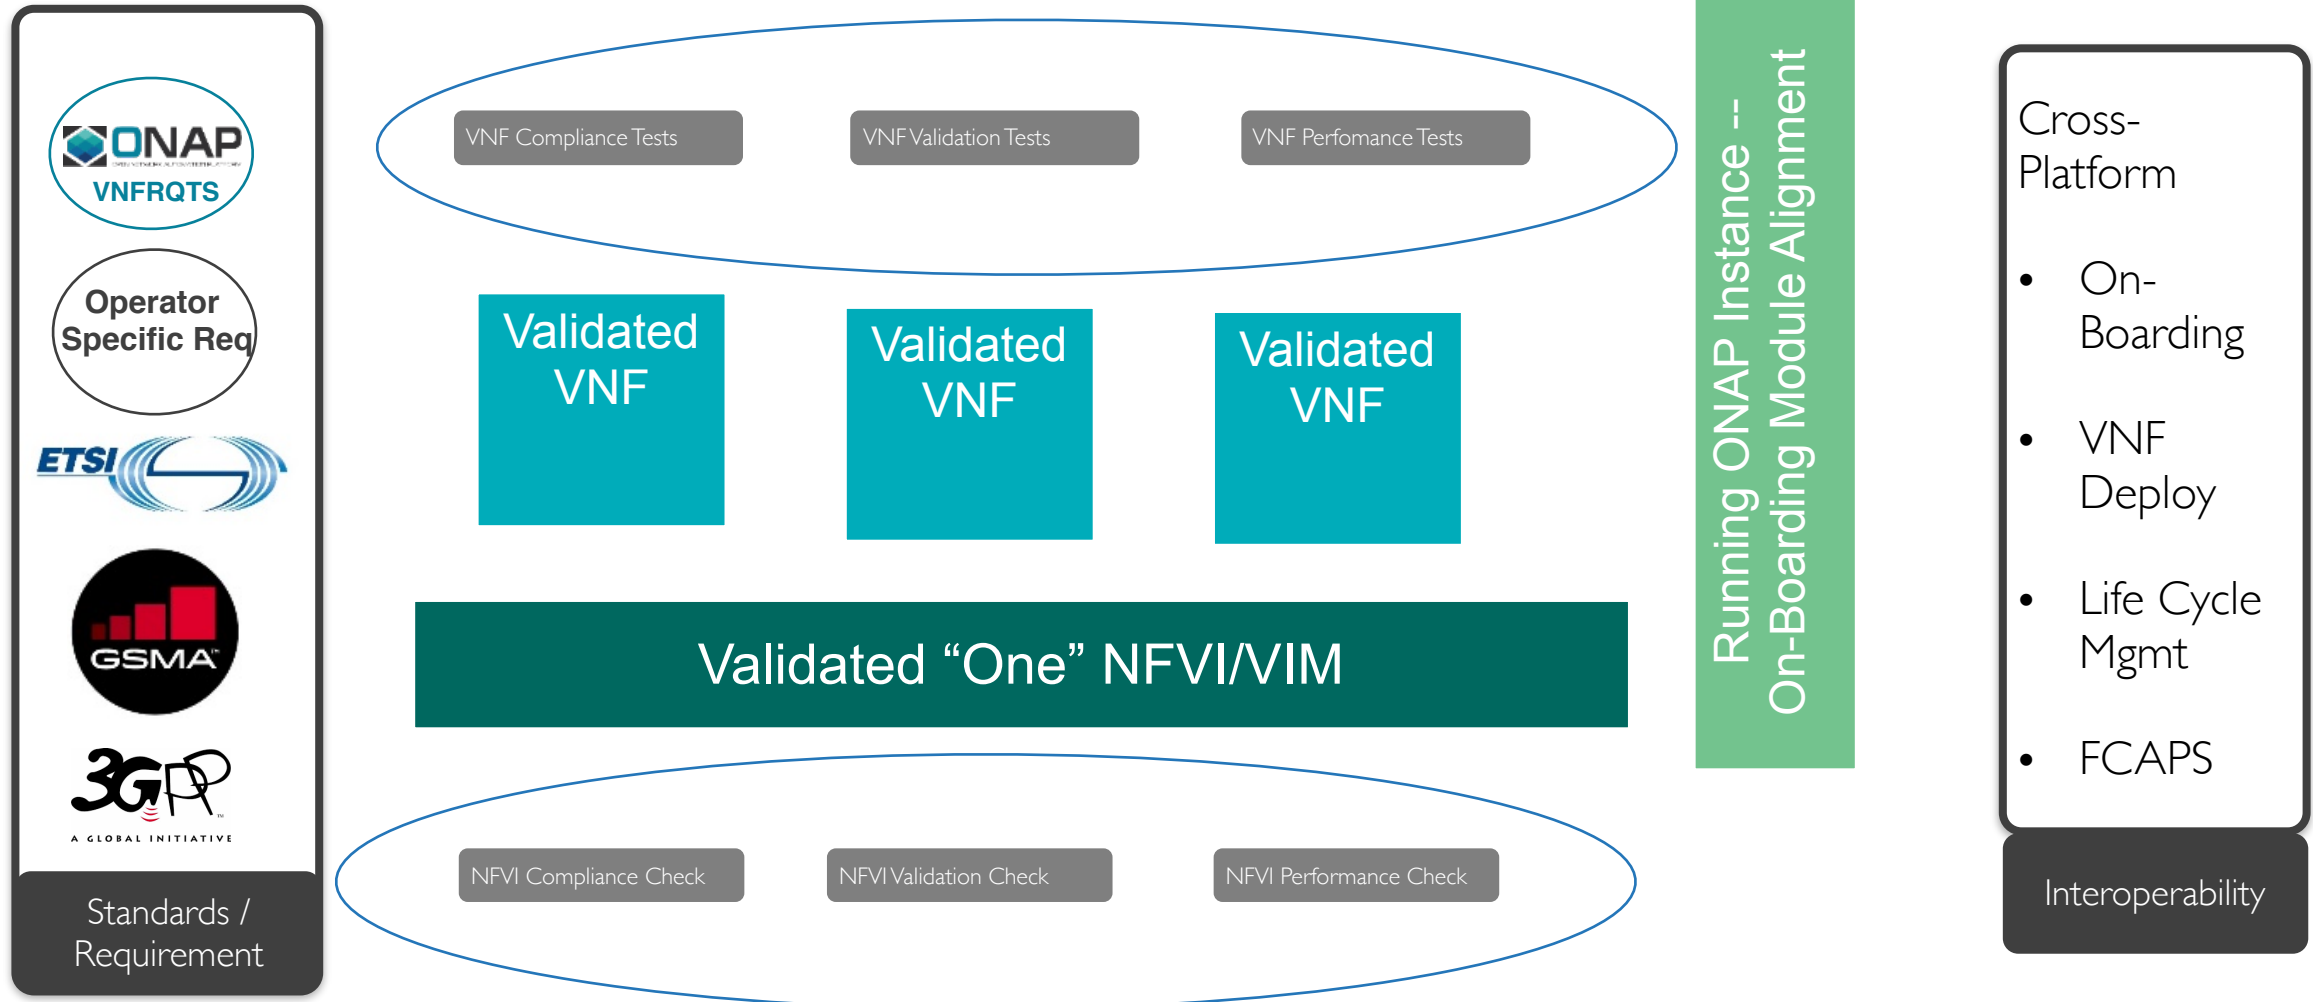

Unified repository for both VNFs and NFVI.

Compliance Process

Unified VNF/NFVI Certification Repository/Portal

VNFs	NFVI	<p>Report</p>
✓ Compliance A ✗ Compliance B	✓ Compliance A ✗ Compliance B	
✓ Validation A ✗ Validation B	✓ Validation A ✗ Validation B	
✓ Performance A ✗ Performance B	✓ Performance A ✗ Performance B	

Vision – End to End Lifecycle System Validation

LFN CVC | What exists today

Standards / Requirement

- ONAP VNFRQTS
- Operator Specific Req
- ETSI
- GSMA
- 3GPP A GLOBAL INITIATIVE

VNFs

- ONAP VNFSDK
- ONAP VVP

VNF Compliance Tests – 3GPP

VNF Compliance Tests – Operator

NFVI

- NFVI Compliance Check – GSMA Profile A
- NFVI Compliance Check – GSMA Profile B

VNFs

- VNF Validation Tests – Plat A
- VNF Validation Tests – Plat B

NFVI

- OPNFV Functest
- NFVI Validation Tests – Plat A
- NFVI Validation Tests – Plat B

VNFs

- VNF Performance Tests – GSMA Profile A
- VNF Performance Tests – GSMA Profile B

NFVI

- OPNFV Yardstick
- NFVI Performance Check – GSMA Profile A
- NFVI Performance Check – GSMA Profile B

Test repository

VNF / NFVI Compliance Testing Tool

Submit Result

- ONAP VTP
- OPNFV Dovetail

Test repository

VNF / NFVI Validation Testing Tool

Approval Process (CVC)

- Compliance Checks
- Validation Tests
- Performance Tests
- Testing Tools
- Process/Portal

Unified Certification Repository/Portal

VNFs	NFVI	 
✓ Compliance A	✓ Compliance A	
✗ Compliance B	✗ Compliance B	
✓ Validation A	✓ Validation A	
✗ Validation B	✗ Validation B	
✓ Performance A	✓ Performance A	
✗ Performance B	✗ Performance B	

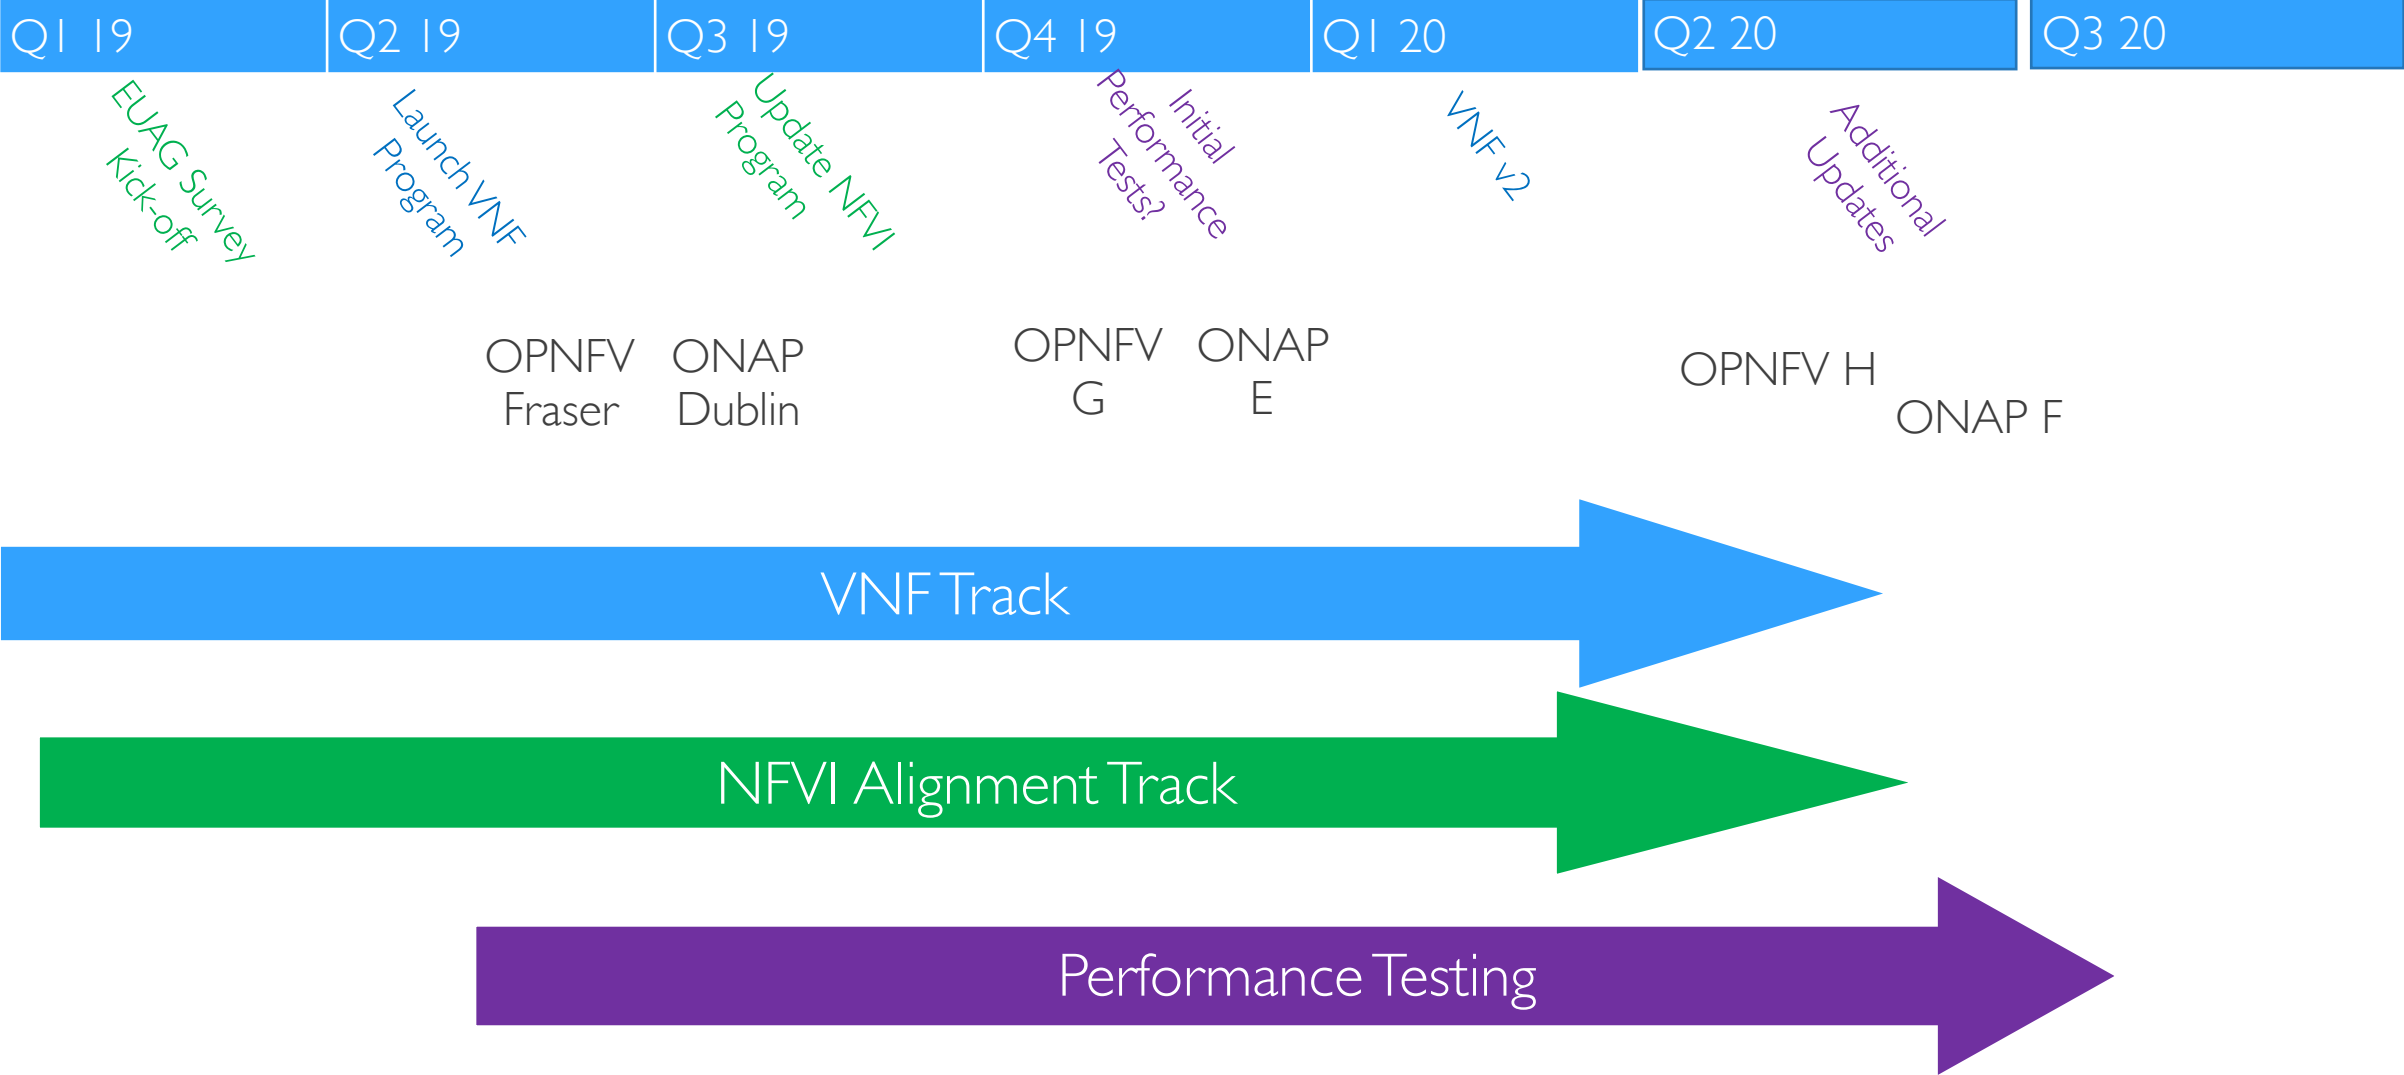

OPNFV OVP

OVP Steps and Roadmap priorities

- › Which activities do we want to prioritize first?
- › Do we want to prioritize depth (e.g. expanding VNF compliance tests) or breadth (Getting VNF validation tests written)?

	Alignment	Compliance	Validation	Performance	Interop
NFVI/VIM	2		4		
VNF		1	3		
MANO	5				

Rough Initial Timeframe

Backup

LFN CVC | Vision - overall

Keep it simple!

LFN CVC | Vision – Actors

LFN CVC | What exists today - VNFRQTS

ONAP Standard

VNF Guidelines.

VNF Test Case Description.

- VNF Package Inspection.

VNF Provider Use Case.

VNF Requirements.

- 789 numbered requirement in Casablanca
- Of which 634 are MUST/MUST NOT.

TOSCA Compliance Checks

TOSCA Tests.

- Cover I I Requirements.
- 6 Tests in Casablanca

Platform Specific Validation Tests

Functional Tests.

- Health checks.
- Smoke.
- Benchmarking
- VNFs

+ 1000 tests including upstream suites for OpenStack & Kubernetes.

LFN CVC | What exists today - Dovetail

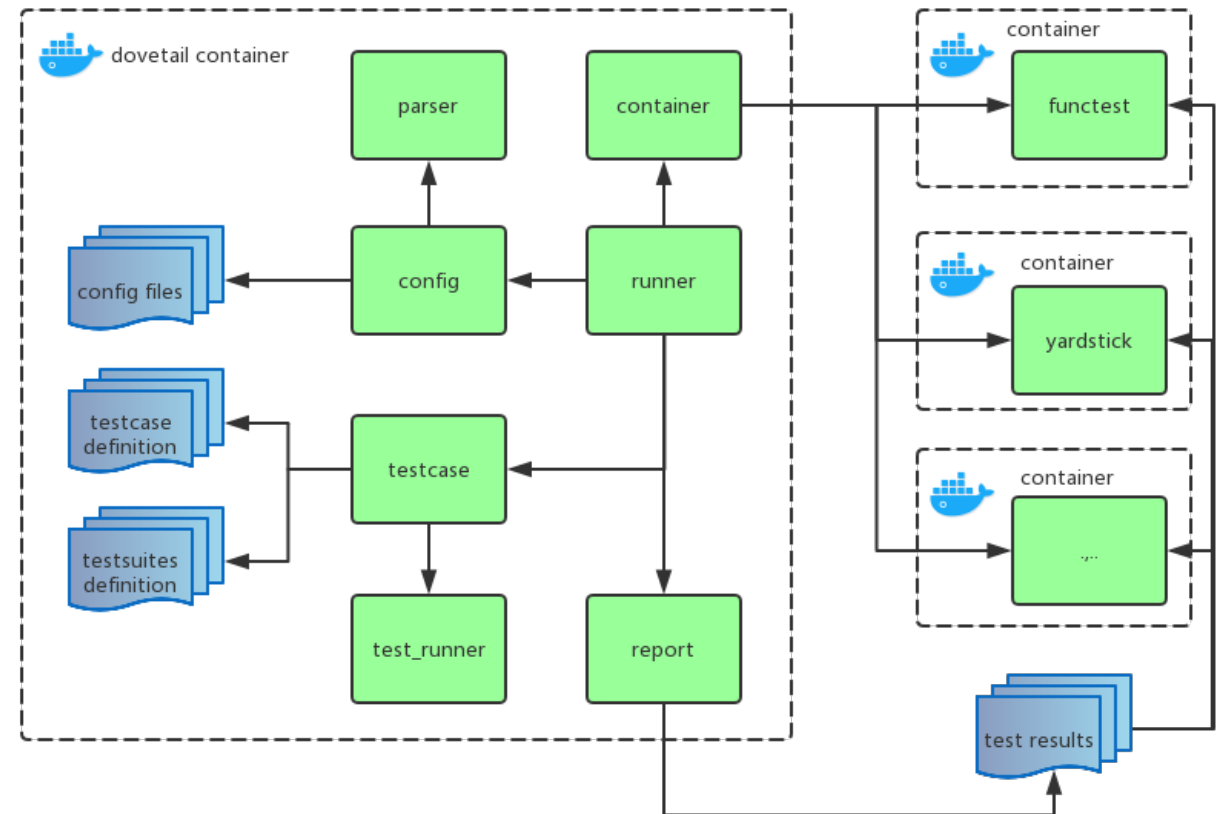

Certification & Testing Tool

Testing Tools

The Dovetail Test Tool is :

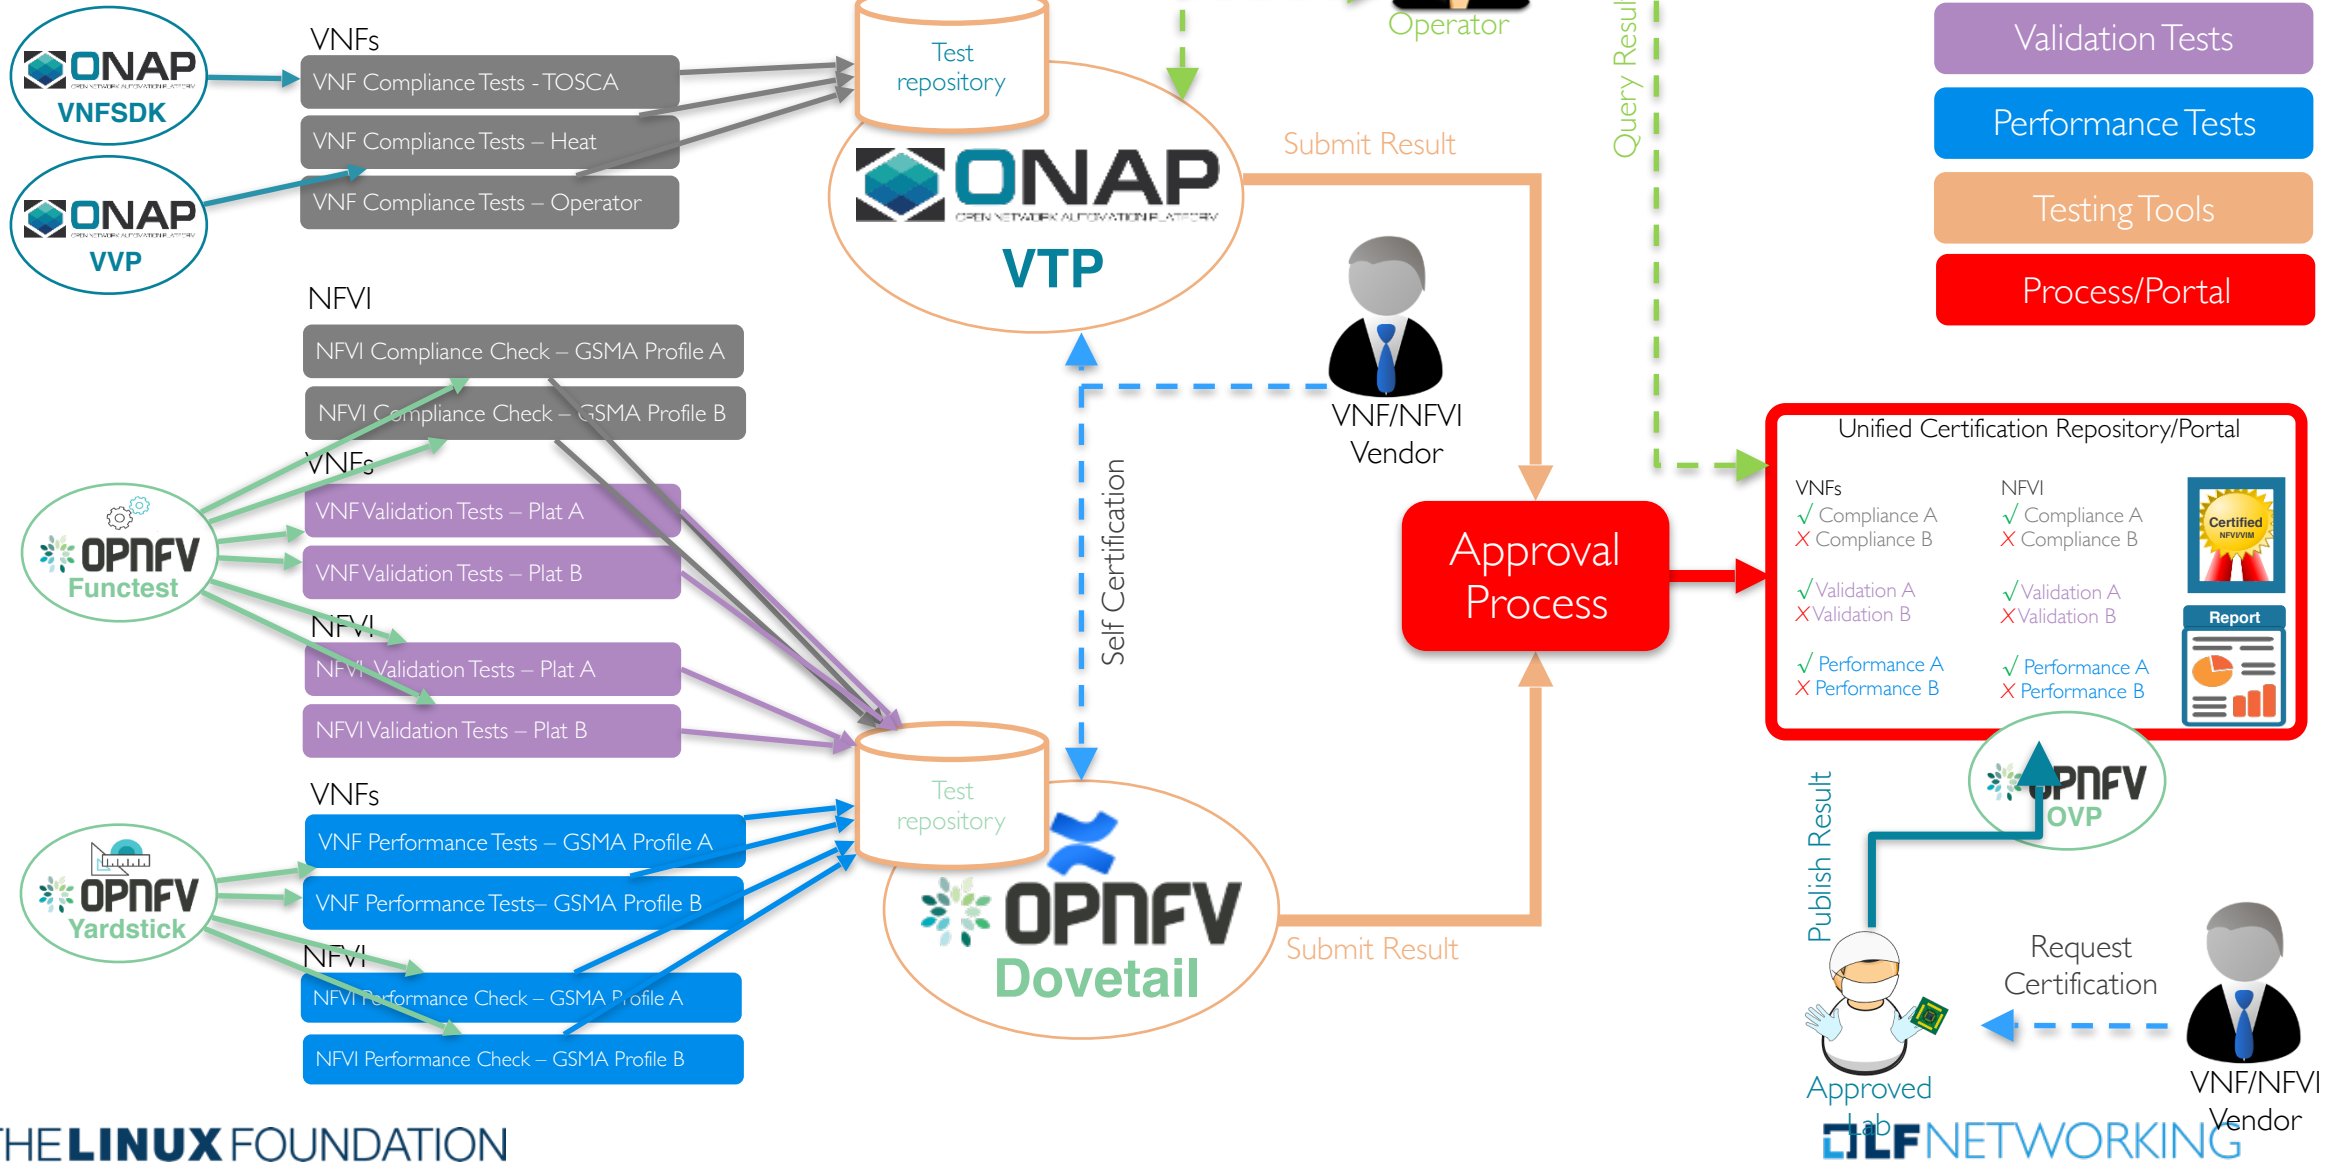

- Designed to leverage existing OPNFV test projects (such as [Functest](#) and [Yardstick](#)).
- Automate the execution of [Dovetail Test Areas and Test Cases](#) in a way that satisfies compliance testing requirements.
- Generate required reports for use by the OPNFV compliance verification program.

We are almost there ...

... but some unification and role clarifications needed

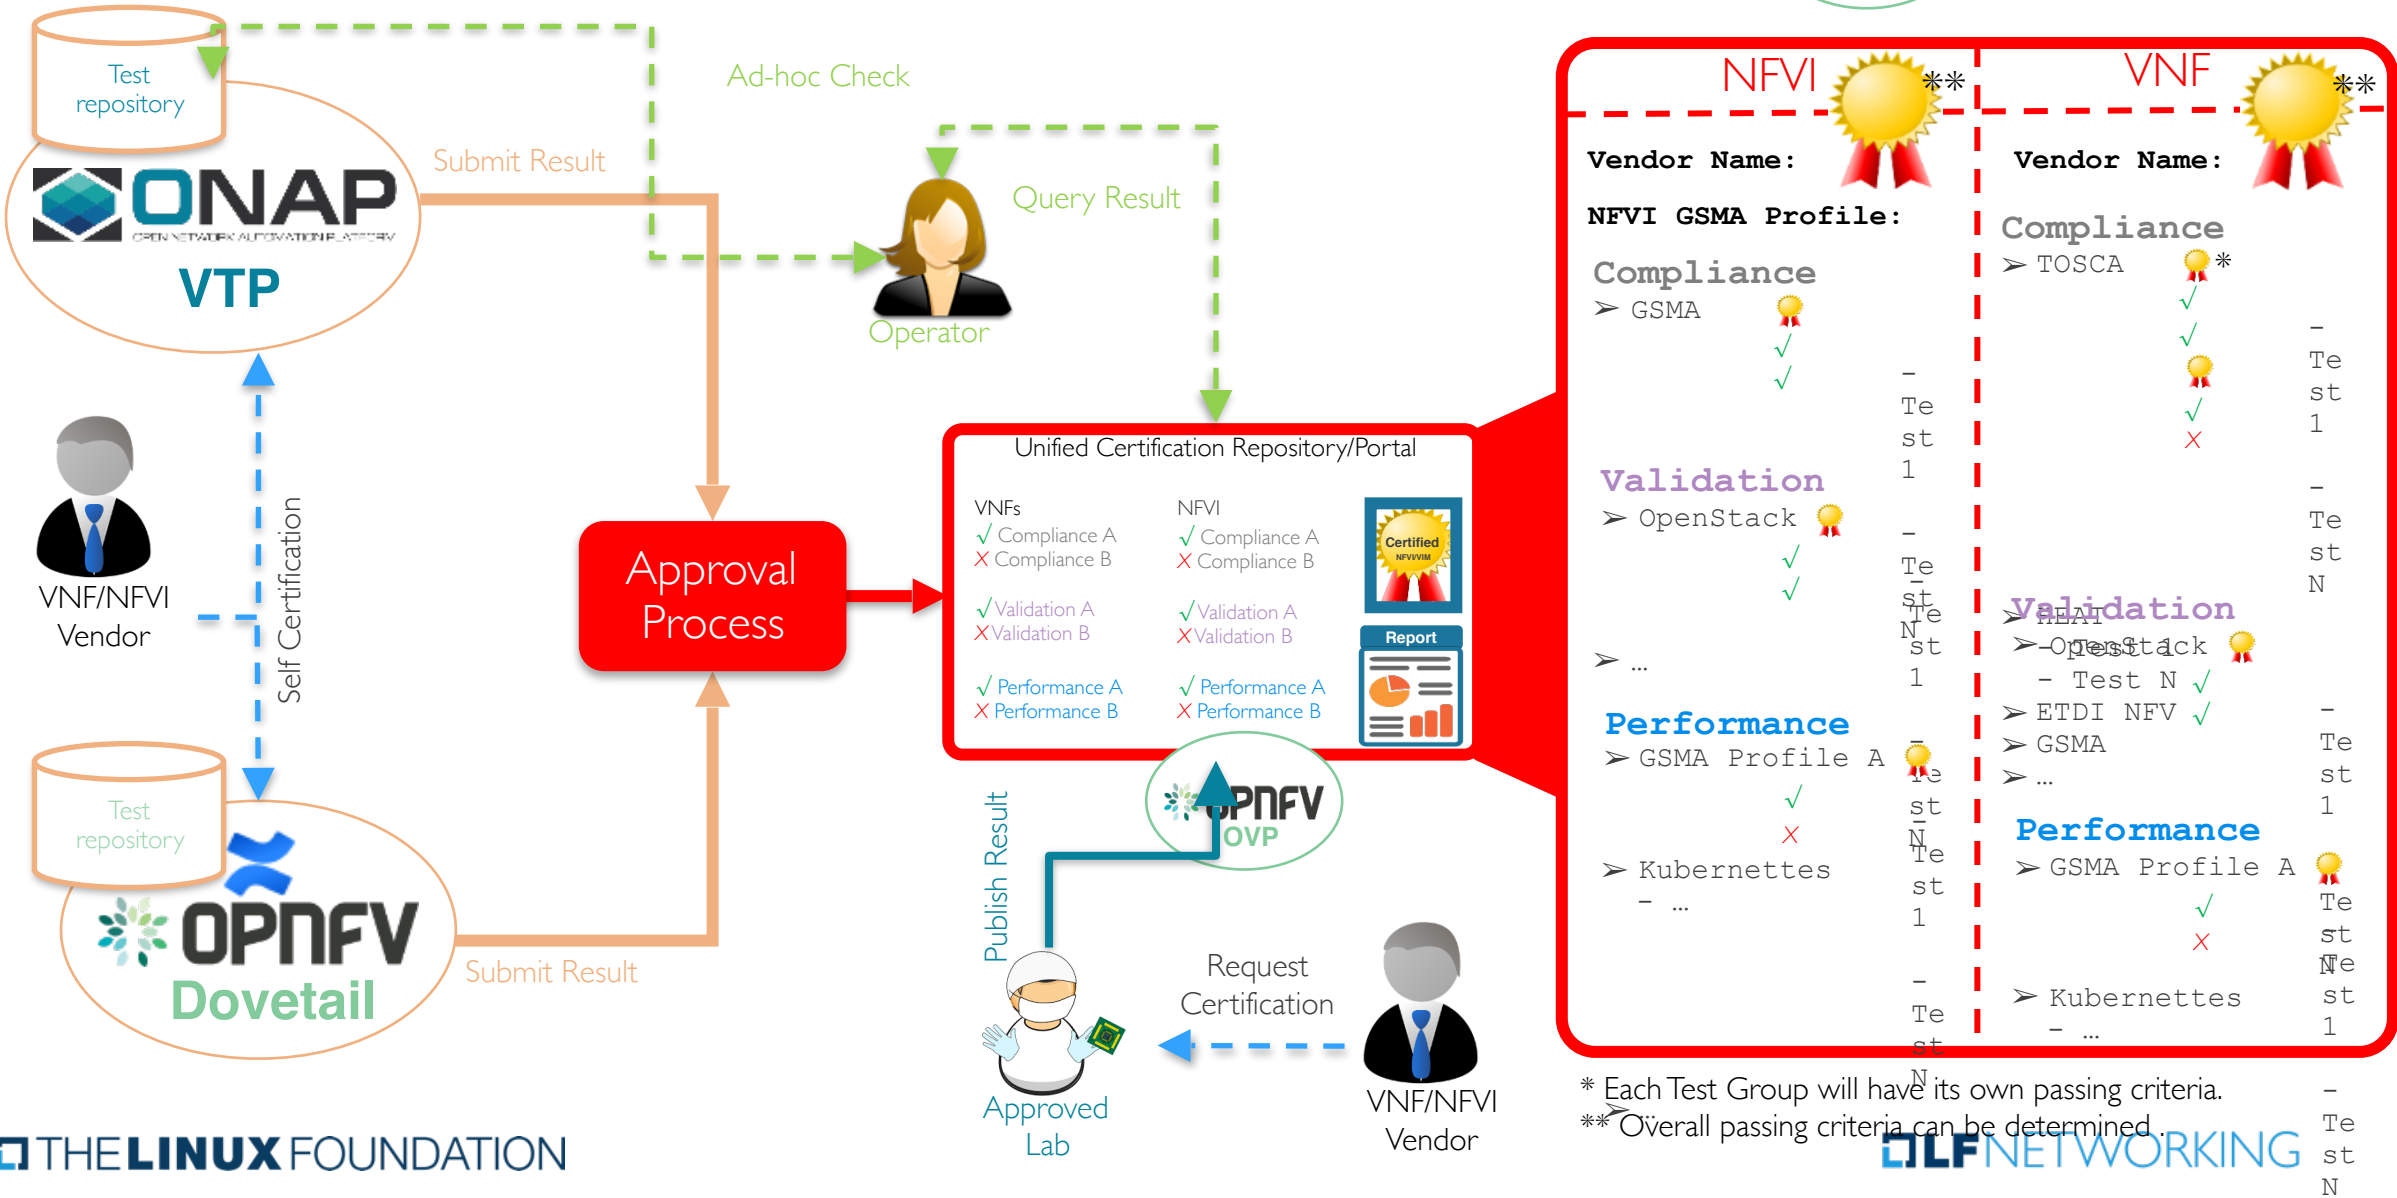

LFN CVC | One Proposal

LFN CVC | Next – Expand OVP Program

Process/Portal

* Each Test Group will have its own passing criteria.
 ** Overall passing criteria can be determined.

Next – Alignment and Execution – BREAK DOWN SILOS

Clarify Scope and align with vision

OVP VNF Launch

 THE **LINUX** FOUNDATION
 **LF** NETWORKING

OVP- VNF Compliance Program Launch Timeline

Program Definition

- Approve Program Governance
- Finalize 3rd Party Lab Governance
- ONAP Test Case Development
- VNFSDK Refactoring Work
- Start documentation work

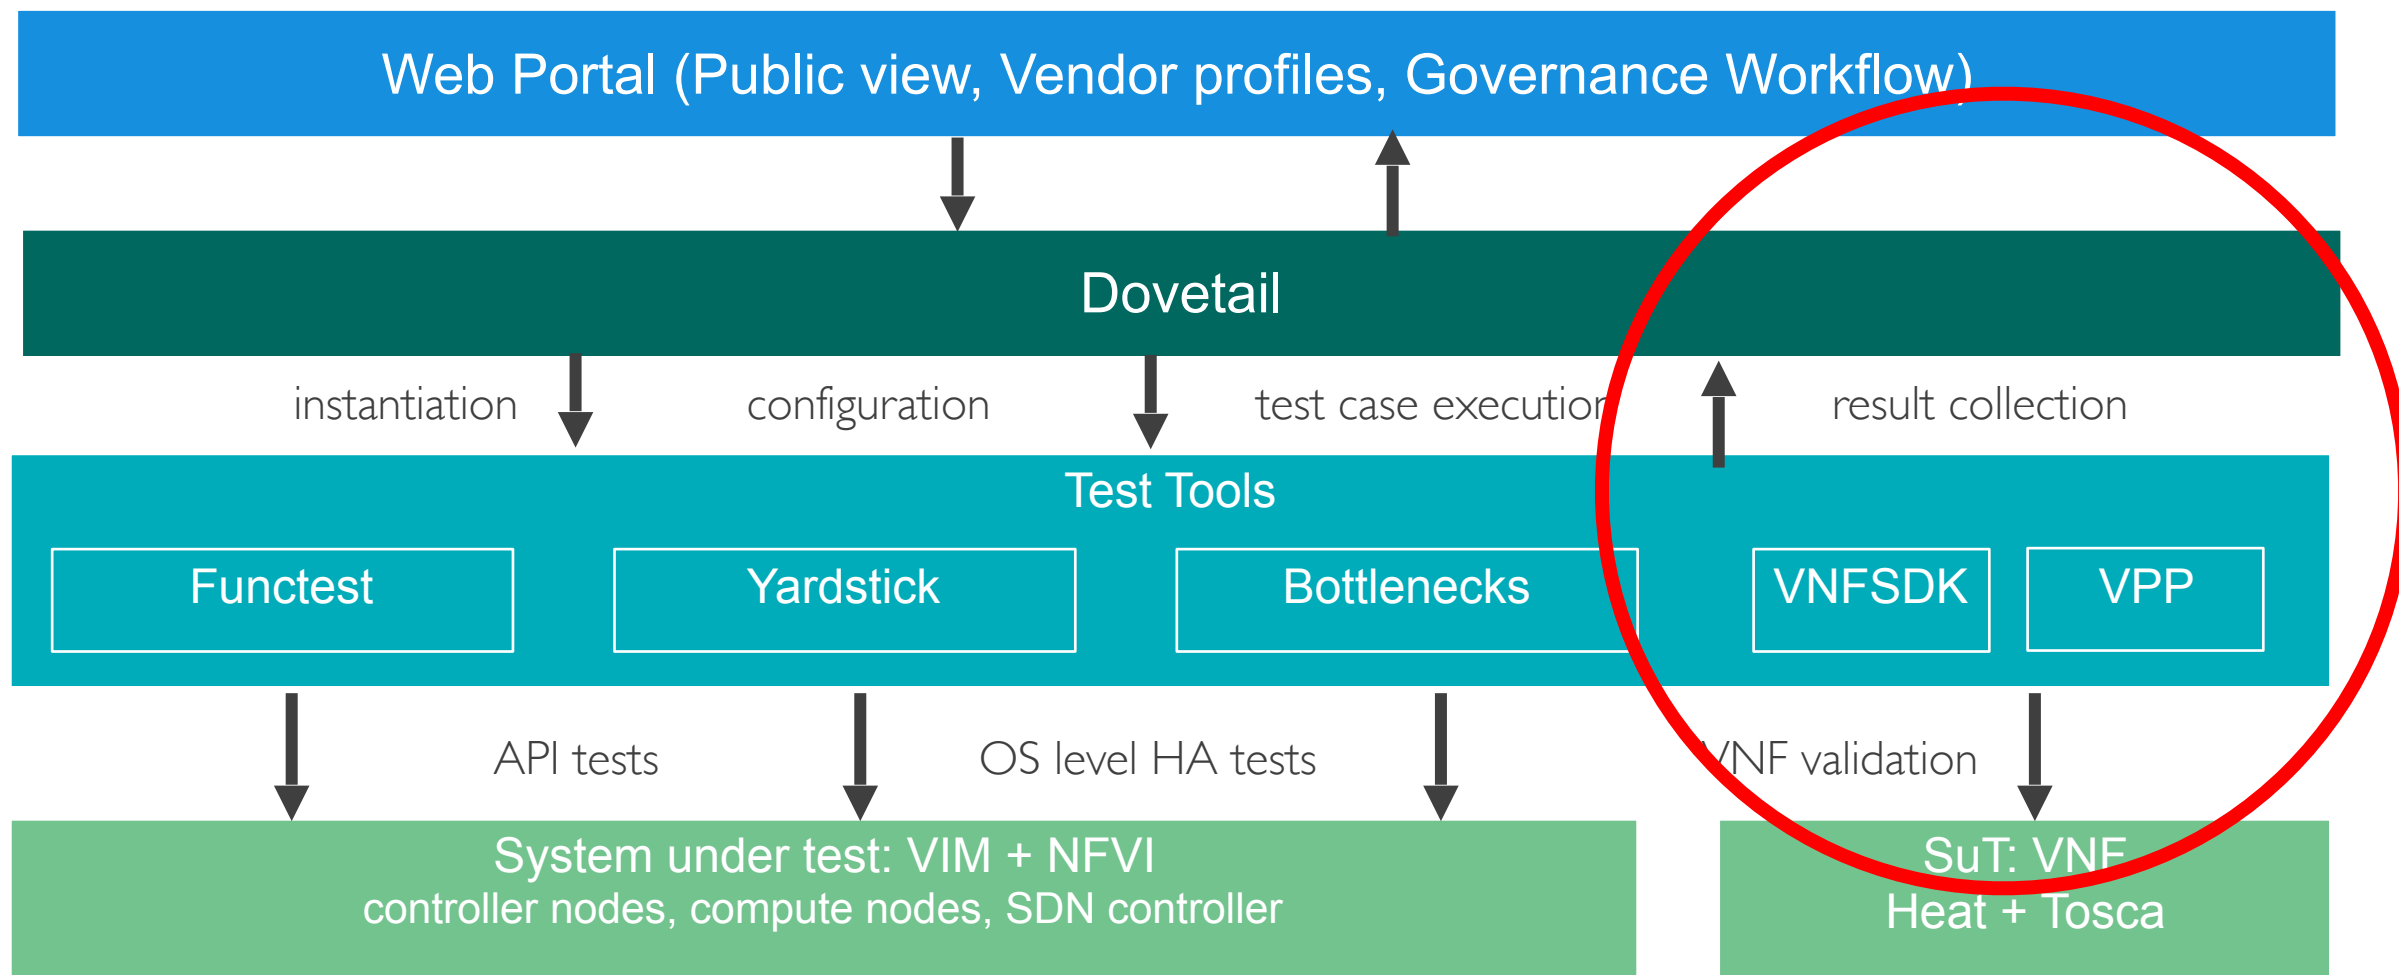

Technical Enhancements

- Beta testing ONAP VNFs
- Dovetail Integration

Go to Market

- Vendor Outreach/Initial cohort recruitment
- (Re)branding and website
- Finalize Terms & Conditions

OVP Toolchain

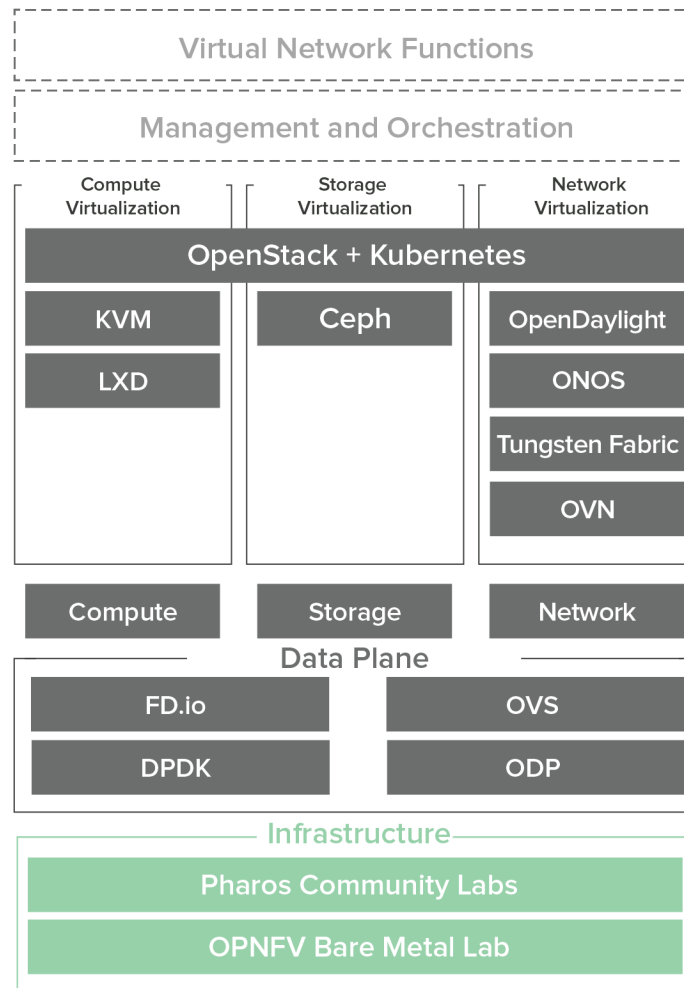

Outstanding Items for Tool and Portal Integration

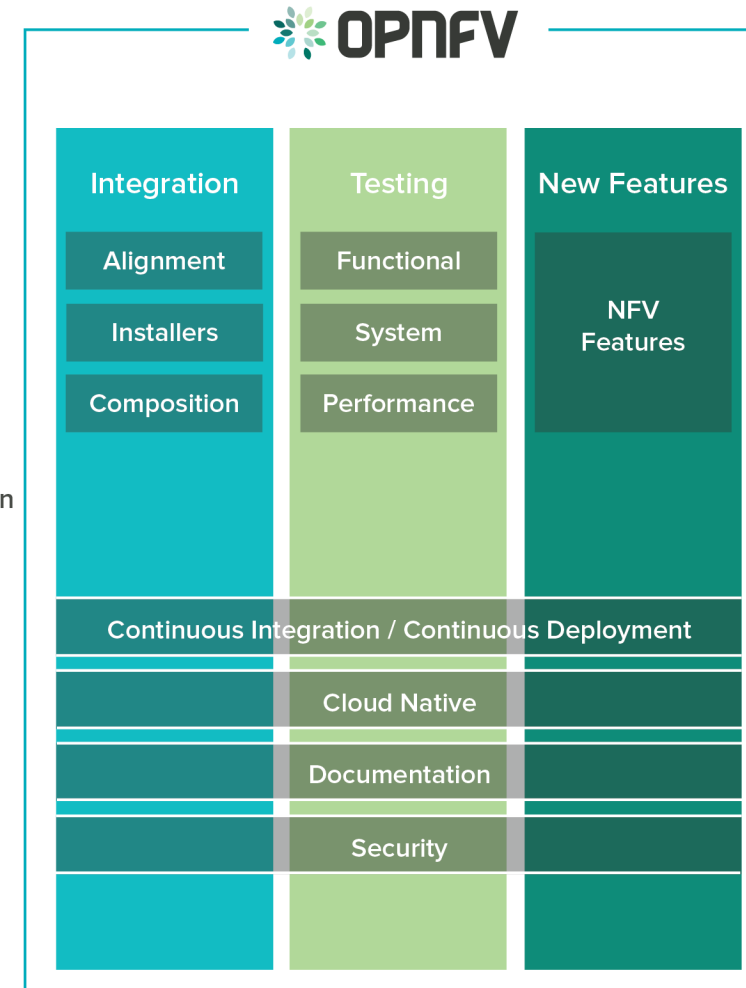

- › VVP/VNFSDK <-> Dovetail Integration
 - › Test Triggering via Dovetail for vendors
 - › Test Result/Debugging/VNFREQ pointers for vendors testing in VNFSDK
 - › Final Portal Presentation
-
- › Project Plan and Dependencies (In Progress): <https://wiki.opnfv.org/display/dovetail/Dovetail+Home>

Alignment Constraints and Challenges

OPNFV NFVI Complexity and Choice

Upstream Project Collaboration

Scope for OVP 2018.08

Funcetest

- Tempest compute (smoke)
- Tempest identity v2 (smoke)
- Tempest identity v3 (smoke)
- Tempest image (smoke)
- Tempest network (smoke)
- Tempest volume (smoke)
- Tempest Neutron Trunk ports
- Tempest BGPVPN Tempest tests

- Security: Patrole RBAC tests

- OPNFV SNAPS smoke tests

- VNF testing vIMS
- VNF testing vEPC

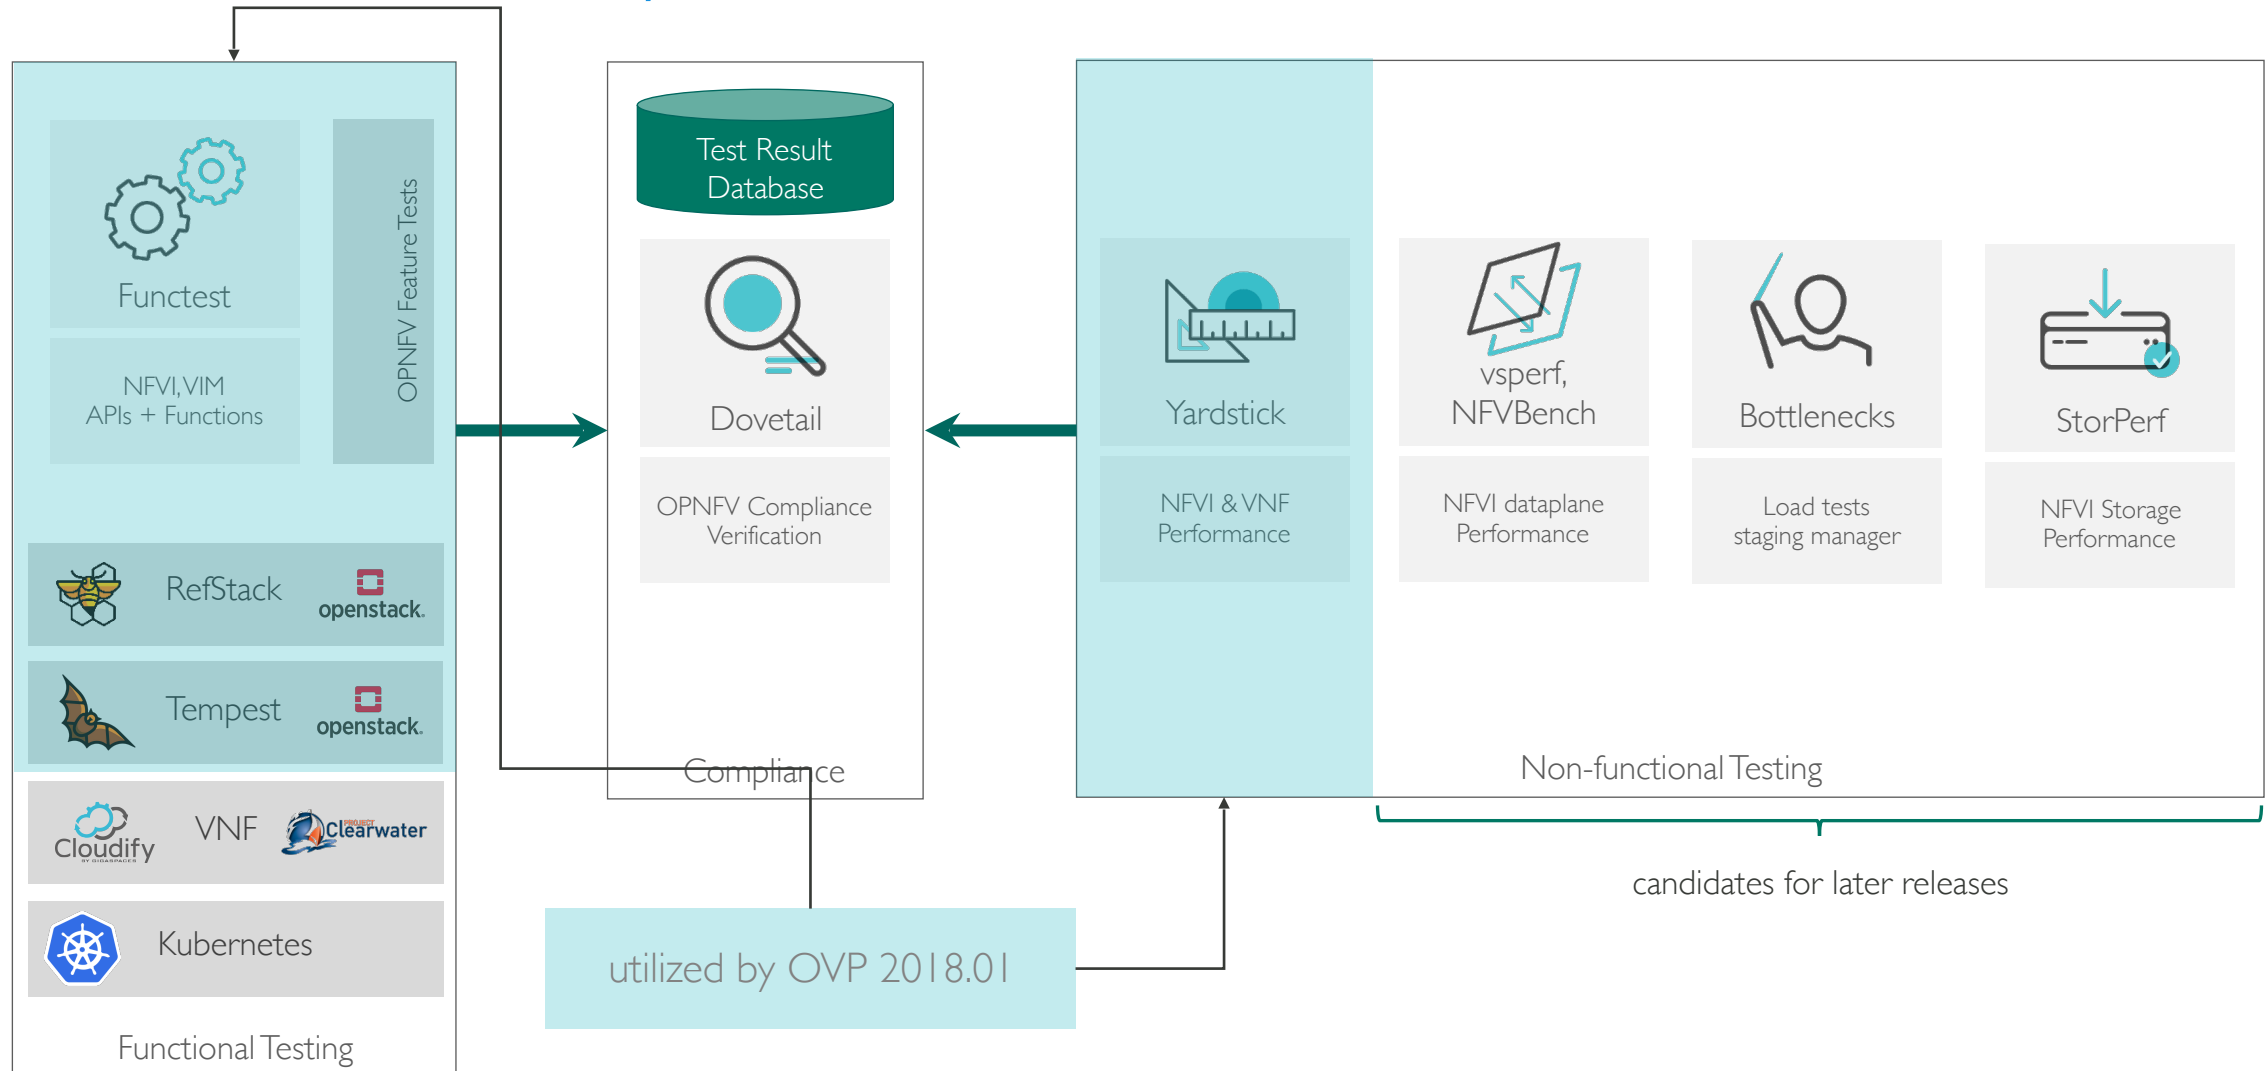

Yardstick

- High-availability of one controller (restart)
- High-availability of message queue
- High-availability of Neutron L3 agent
- High-availability of OpenStack database

Bottlenecks

- Stress testing

OPNFV Test Ecosystem

Feedback Time – Is NFVI Consolidation Feasible?

- › Any NFVI Consolidation and related compliance program rests on Service Provider implementation consolidation
- › Four years ago – there was not enough agreement amongst service providers to converge on a single NFVI
- › Inputs/Next Steps:
 - › GSMA NFVI Profiling Work for 5G – Motivating Event?
 - › LF Networking EUAG relaunched next week – possible task force focused on this area
- › Operator Input: Has the Market Changed? Is this a feasible task?
 - › 1, 2, 5, 10 choices as a goal?

Note: It's also true for VNFs as we move forward

- › Several Major Options in VNF features required by ONAP
 - › Where VNF needs only support one option
 - › Lots of subsidiary requirements in that option
 - › VNF unlikely to implement multiple options (substantial functionality cost)
 - › Option likely long lived (would take >2 ONAP releases to converge)
- › Major options identified:
 - › VNF Package – HEAT / TOSCA / HELM (+ documentation, preload, etc)
 - › Management Interfaces – VFC / Netconf/ Ansible / Chef
 - › Life Cycle Operations – SDNC/APPC, VFC, ETSI (SOL003)
- › BUT – VNF testing should
 - › have Specific meaning / Assurance of quality
