China Mobile's Practice of Intelligent Network Operation

1st large-scale full-fledged production-network practice world wide

- ◆ 5.5/6G/Fusion perception, high-precision position, etc

- ◆ connected and enhanced computing power by network
- ◆ flexible and efficient computing force network services

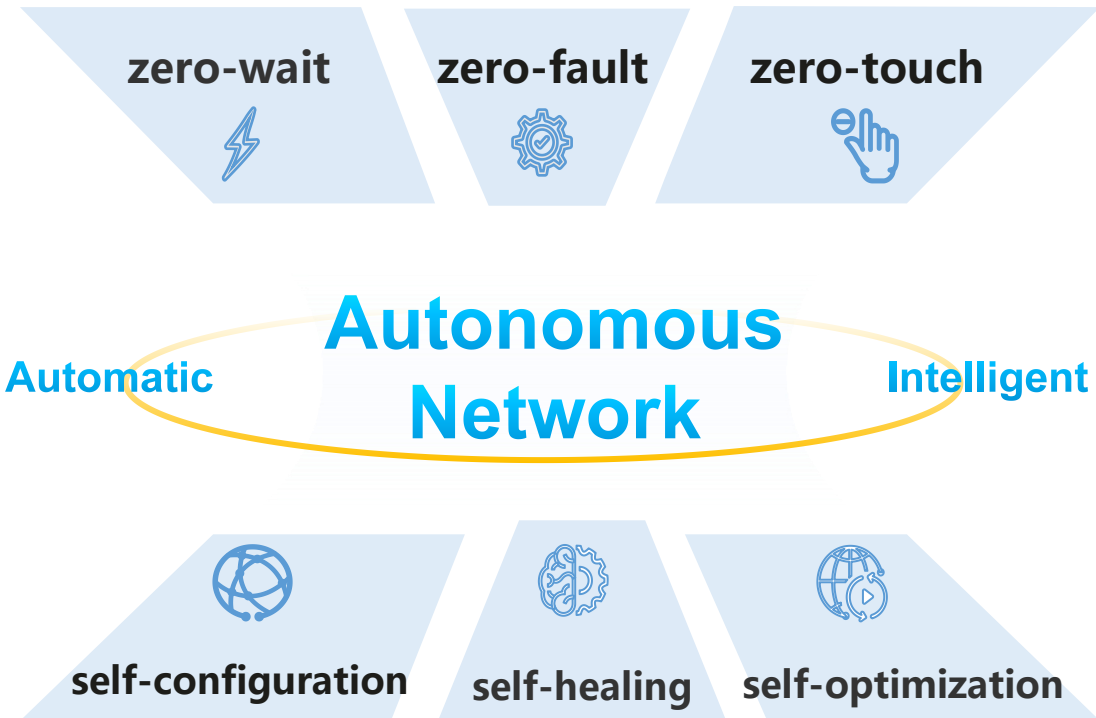

- ◆ Differentiated network services
- ◆ Deterministic network experience

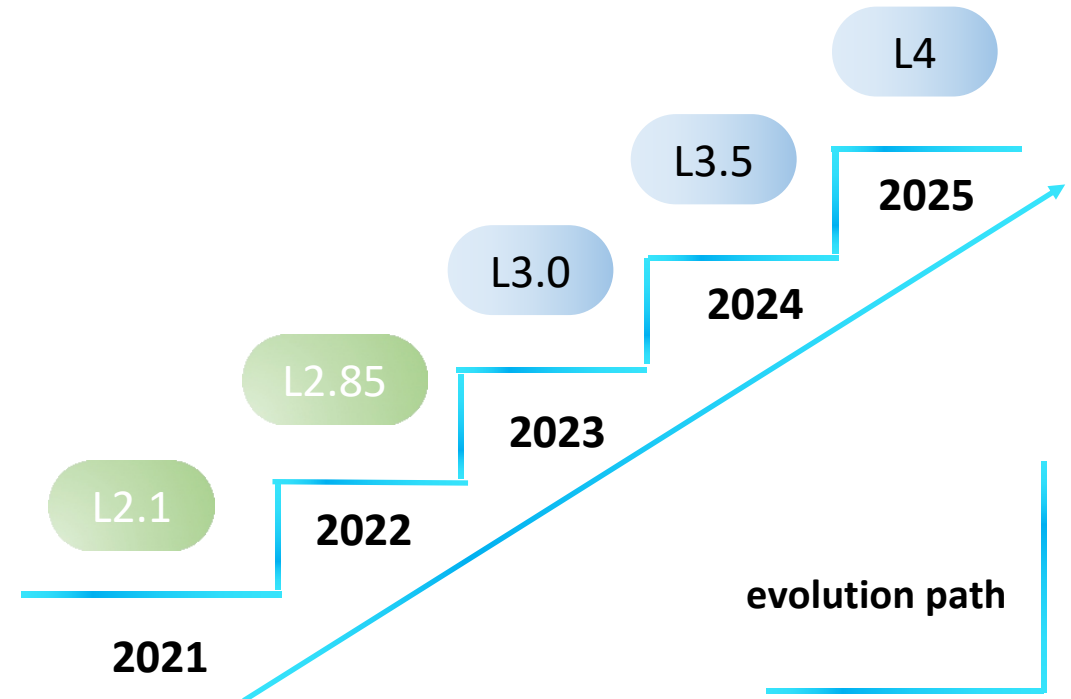

- ◆ High-quality network to ensure network security and stability, reduce costs and increase efficiency

China Mobile has repositioned itself as “A world-class information service technology innovation company”.

1st to propose the concept and vision of Autonomous Network

1st to carry out large-scale Autonomous Network practice

Automatic handling of massive alarms

auto-collecton of network alarm

100million/day

auto-correlation of alarms/ auto-dispatching

150k /day

alarms/tickets

600:1

Automatic configuration and deployment

auto-collection of config data

450million+/day

service auto-dispatching of provision/scheduling orders

6million+/day

auto-dispatching of inspection orders

50million+/day

Automatic analysis of service quality

network data collection and processing

3PB+/day

ToC、ToH service quality degradation delimitation accuracy

90%+

5G ToB quality degradation auto-delimitation time

2 hours->15mins

Automatic network security incident

auto-collection of security alarms auto-id of security event

1

20k+/day

processing time of security event

120 hours->19hours

Intelligent network O&M framework

AI capabilities 2600+

applications 2200+

daily API call 3.8 billion

engaged R&D entities 25

low-code operators 160+

3 scenarios

Image recognition of on-site task
e.g. program acceptance, service inspection

network big data analysis
e.g. complaints diagnosis, network fault delimitation, risk alarm, voice quality rate, business capacity predict.

complex computing of network policy
e.g. parameter configuration, routing computation

4 capabilities

Perception Intelligence
Data identification & assessment

Diagnosis intelligence
Fault location

Prediction intelligence
alarm and prediction

Policy intelligence
Configuration & optimization

algorithm

Voice & image
Bert/YOLO/R-CNN

Anomaly detection
Pyod/MSCREED

Correlation analysis
FP-growth/Apriori

Casual reference
NOTEARS/GraN-DAG

Time-domain prediction
ARIMA/ DeepAR

Optimal analysis
A2C/DQN/Policy-Gradient

1

data

Non-structured data
(text/voice/image)

Structured data
(resource/alarm/performance/log/DPI/MR/MDT/ticket)

computing

GPU/CPU/NPU

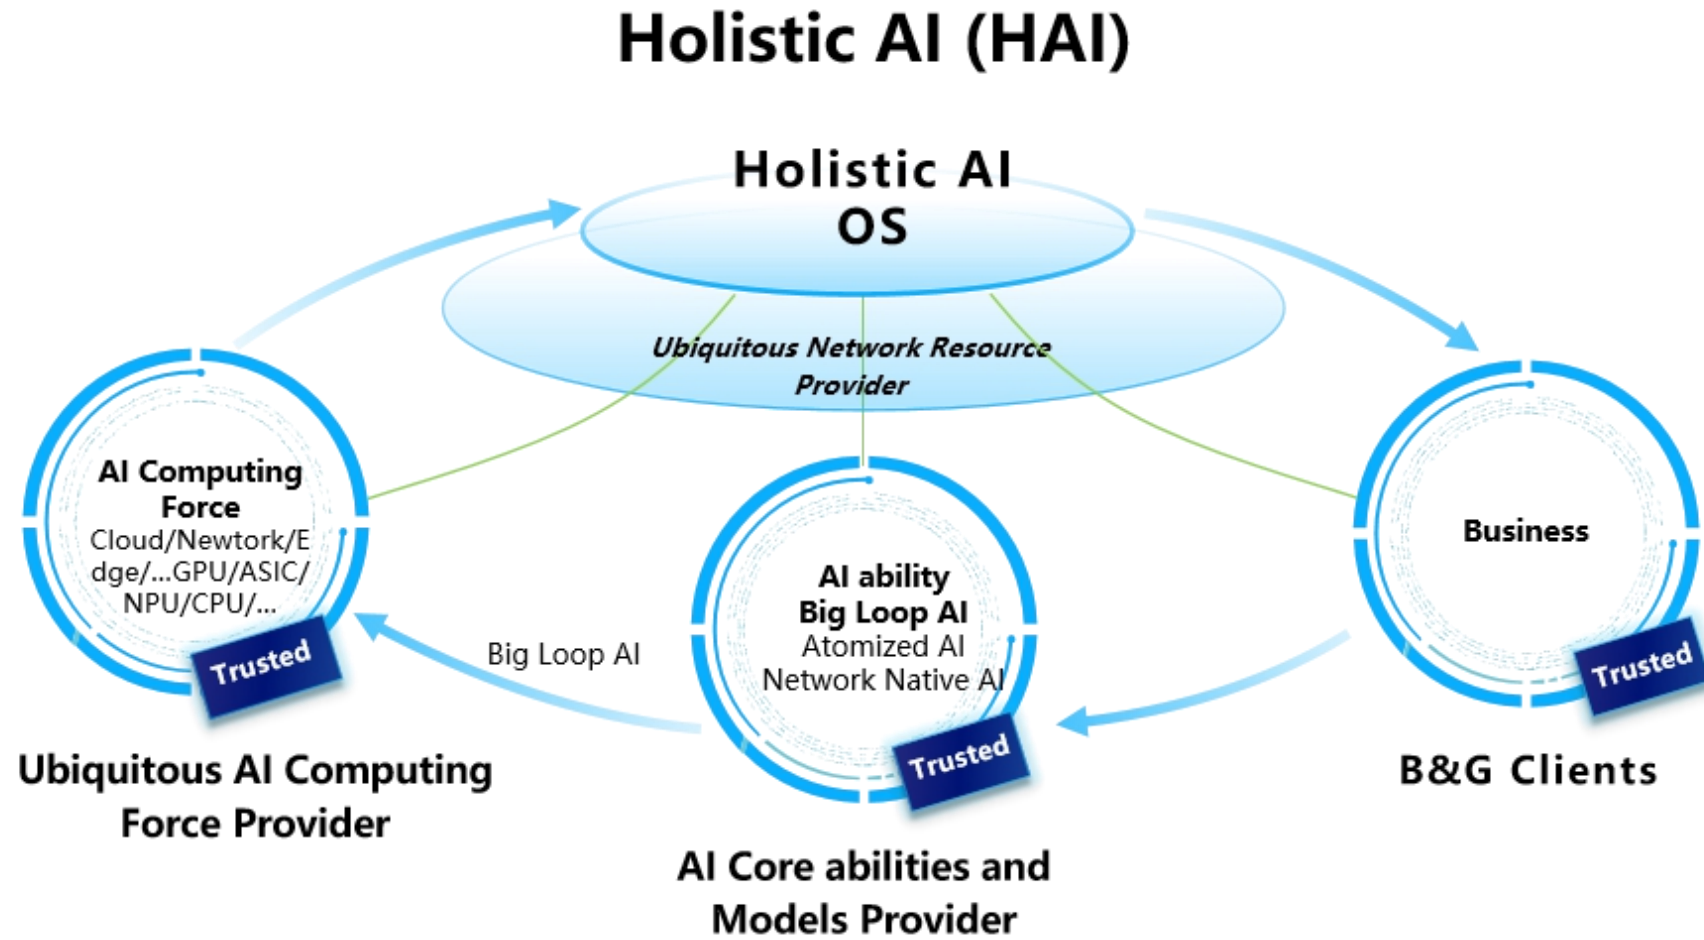

中国移动
China Mobile

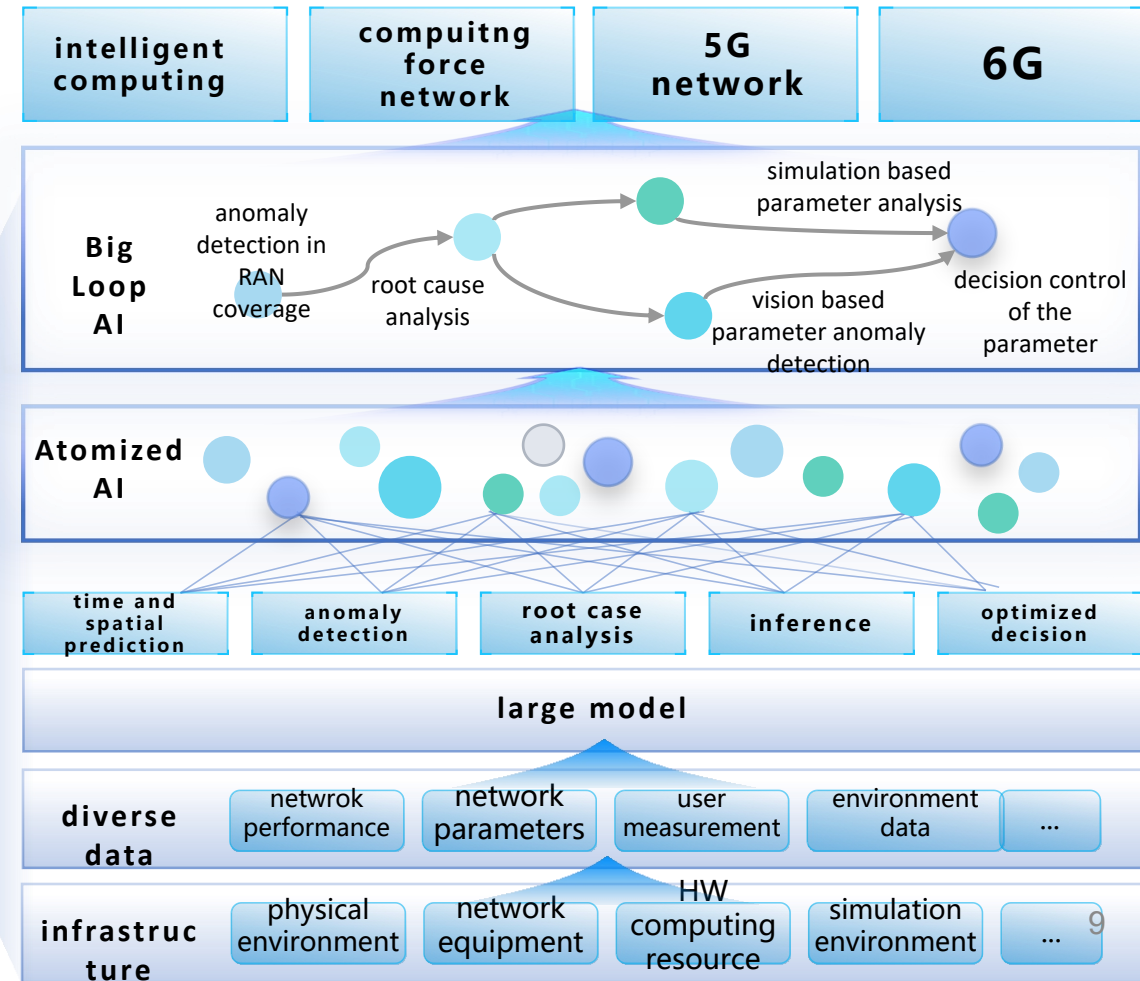

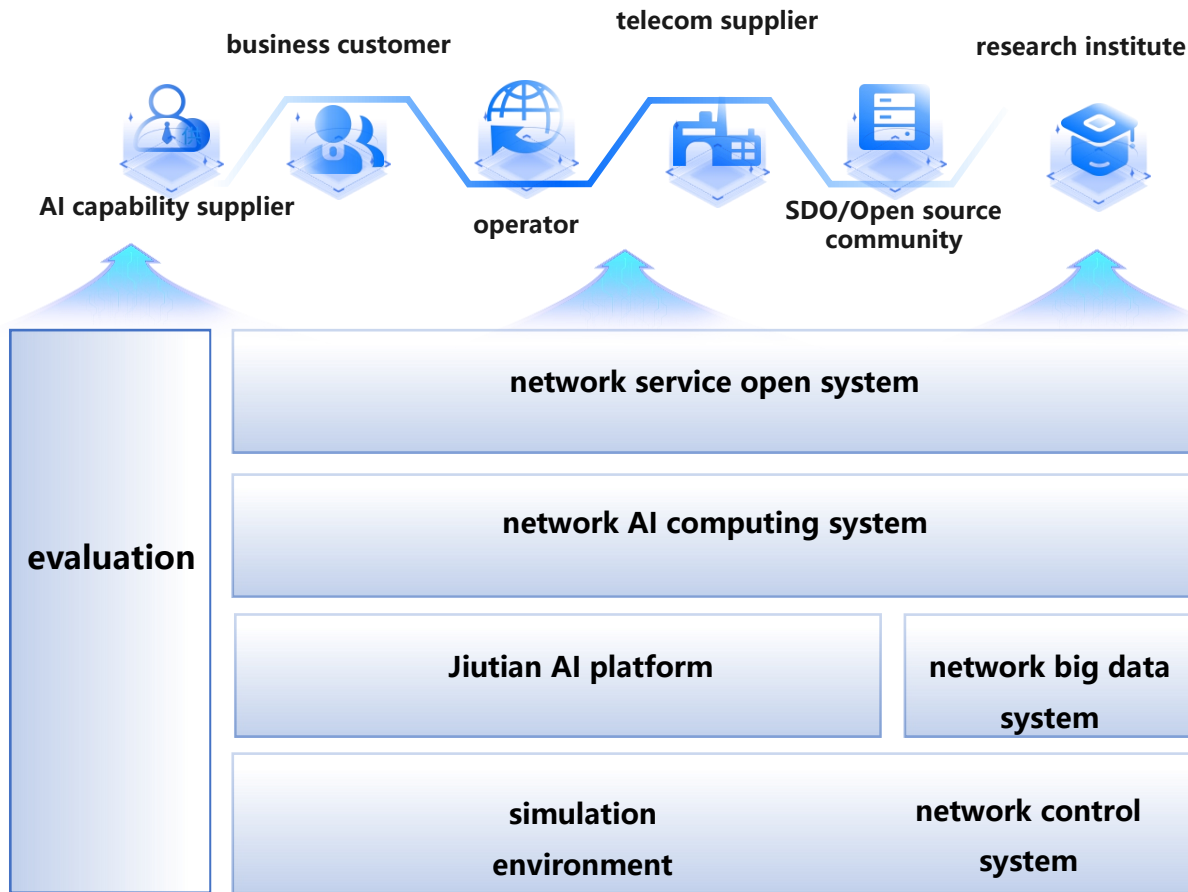

China Mobile's Open Innovation Platform for Network AI

1st End-to-End Open Platform for network AI innovation world wide

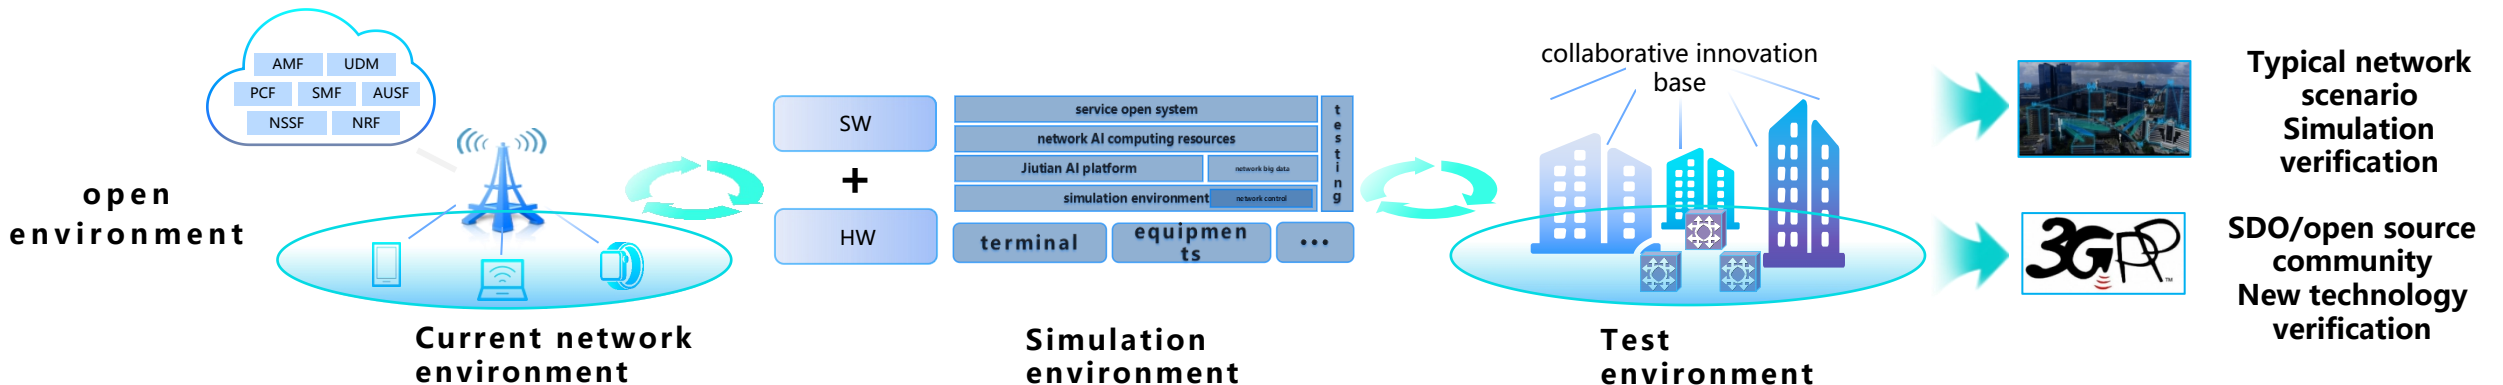

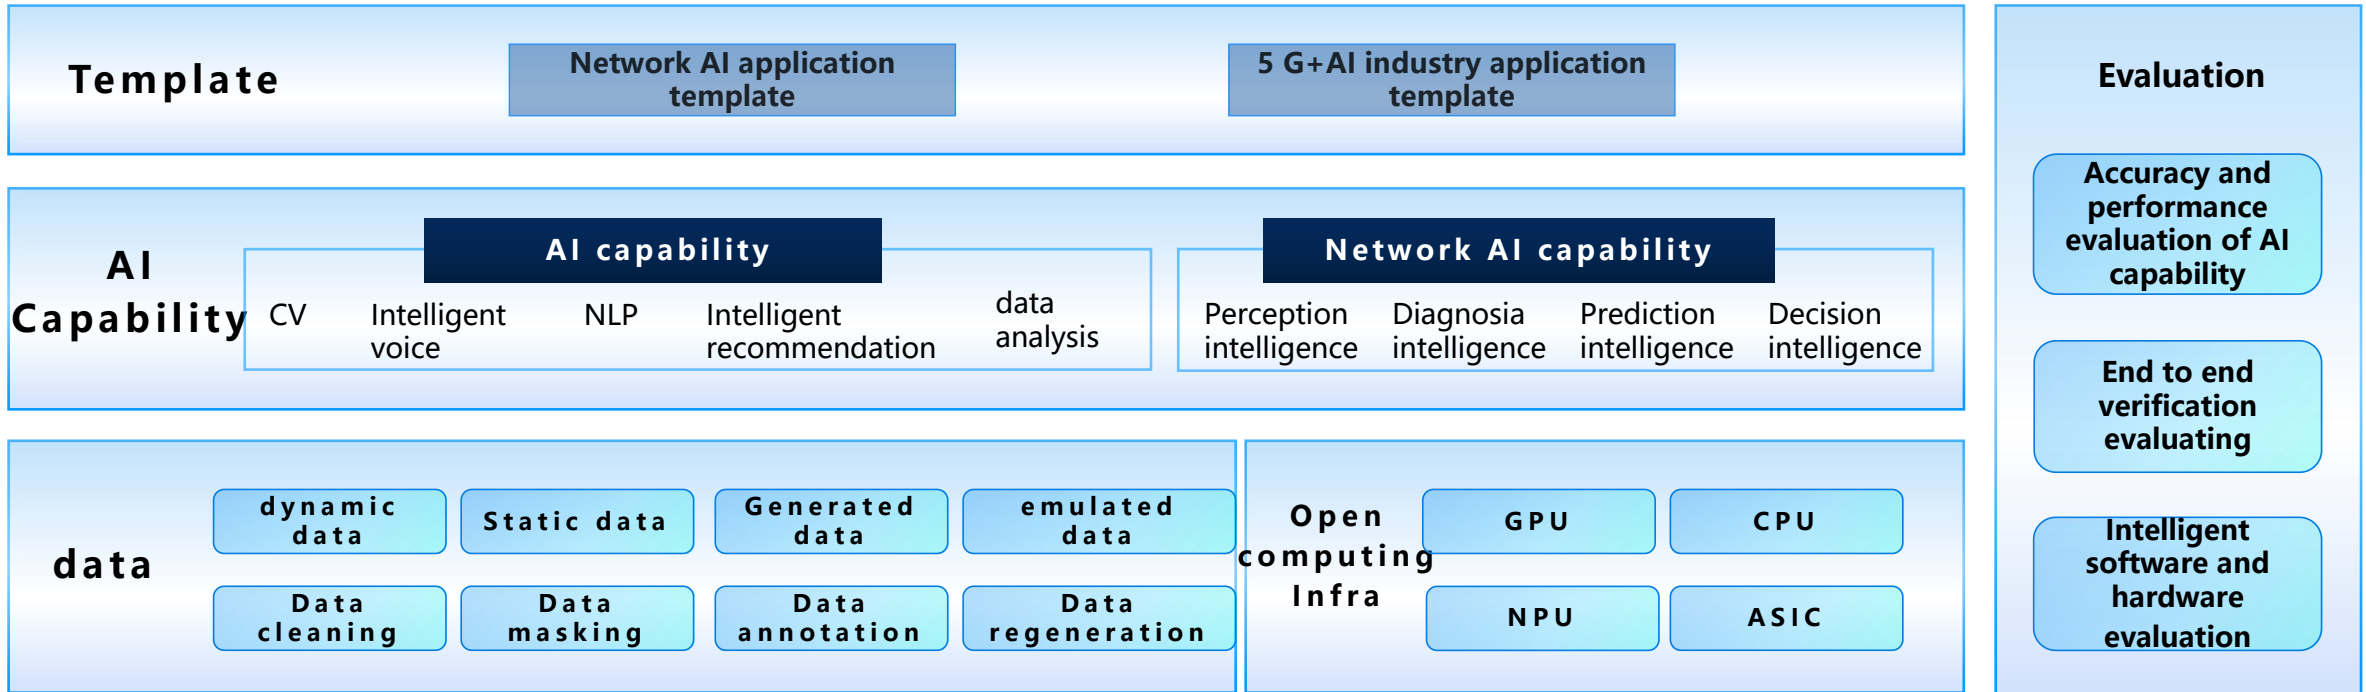

Holistic AI (HAI)

Platform development Pathology

Available Resources of the platform

Empowering education and academic research

teaching

- AI lessons
- AI Labs
- practice environment

research

- computing resources
- pre-set major frameworks
- advanced performance

practice

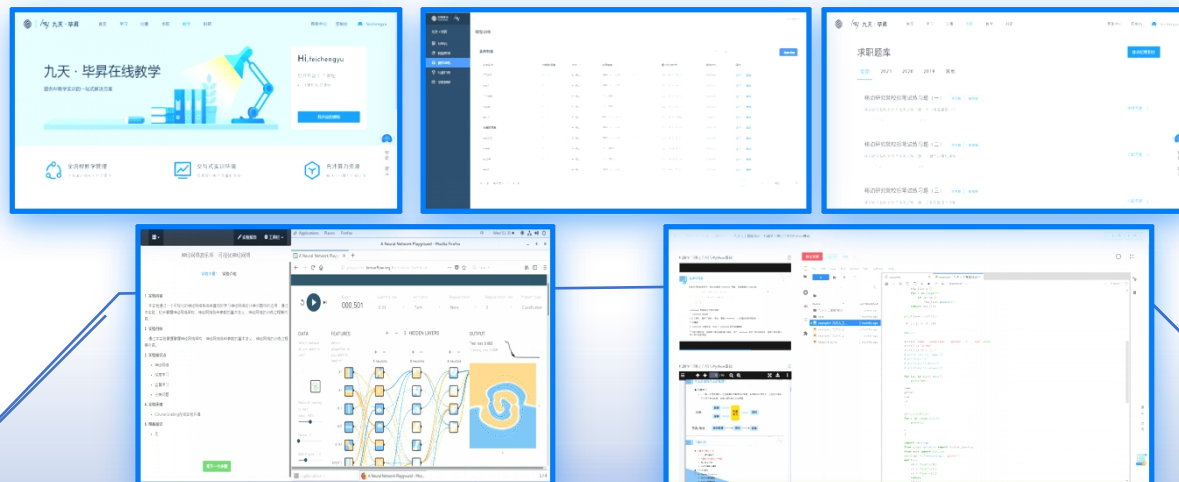

- AI contests
- challenges
- individual project support

jobs

- online testing
- internship offering

**Accumulated 154 AI courses,
Serving more than 200 colleges and universities and
over 95,000 teachers and students.**

Hosting AI contests

Accumulated support for more than 20 competitions and more than 10,000 candidates.

Industrial quality inspection competition

Complex network modeling competition

Wireless big data competition

Smart city thematic competition

Ocean target challenge

RAN big data competition

Network AI modeling competition

AI+ Innovation and Entrepreneurship Competition

Liaoning AI creative competition

Mobile cloud API contest

China Mobile Chuangmasai

Internet + Entrepreneurship

Xingzhi Cup Artificial Intelligence Thematic

Computer design competition

CCF Data and Computing Intelligence Competition

China Software Cup Competition

JIUTIAN Cup AI Tournament

JIUTIAN AI Ecosystem

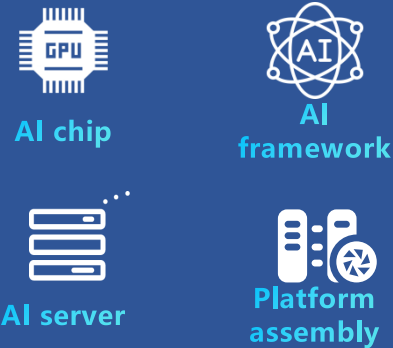

Joint research on key technologies

Accelerate the key technology research

Aggregating SW/HW

Jointly build open AI infrastructure

Introduce diversified AI capabilities

Jointly build a perfect ability system.

Gather excellent ISV partners

Share broad opportunities with whole industry.

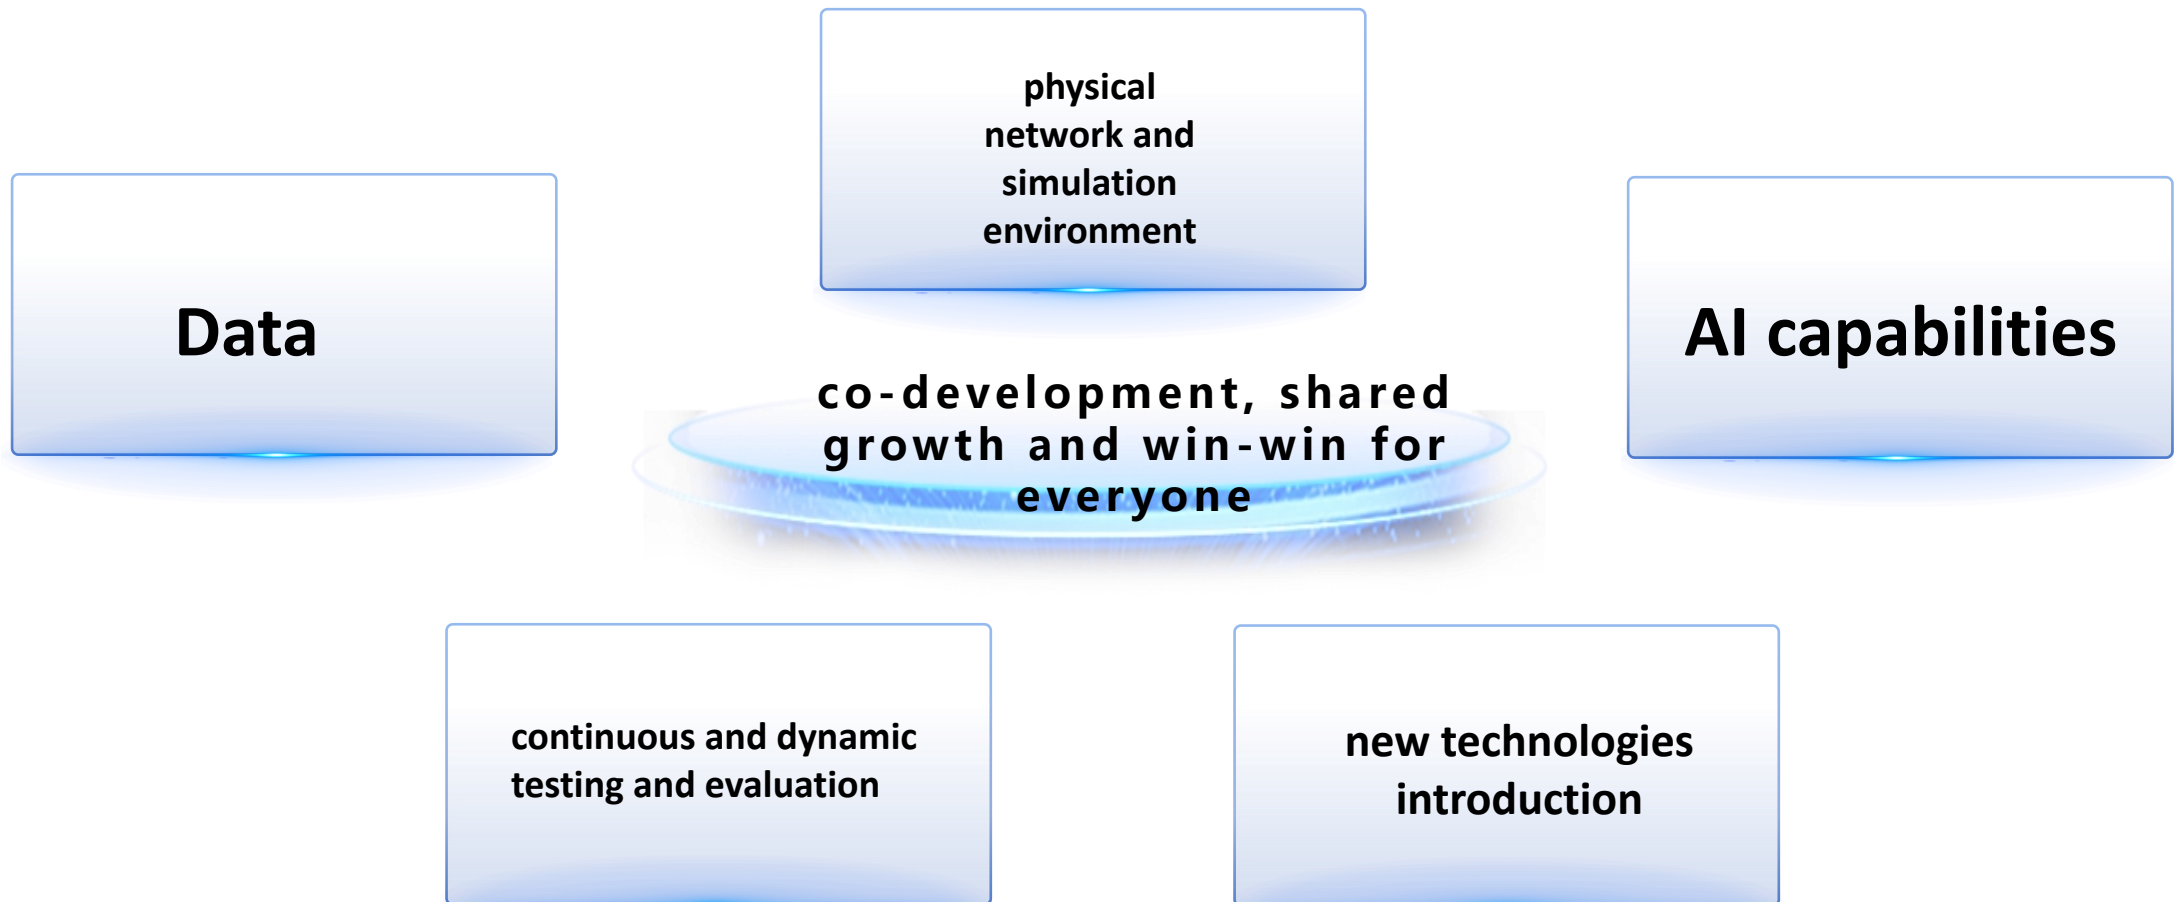

China mobile Collaborative Innovation Base

Contents

- China Mobile's Practice of Intelligent Network Operation
- China Mobile's Open Innovation Platform for Network AI
- Input to AI TF Planning

Discussion on the open mechanism of co-development, shared growth and win-win for everyone
