Provide advice, feedback and guidance as requested regarding:

- Top of mind for issues related to recent or upcoming LFN software releases
- The identification of functional and/or operational concerns which are inhibiting the adoption of LFN solutions
- Areas of focus to address short term business requirements
- Project testing environments, test cases, and/or Proof of Concepts
- Strategy and long term planning of feature and functionality alignment across LFN Projects
- Providing end user perspectives on value and usability of LFN technology

Provide an open discussion forum for end users of open source software, to share perspectives on progress and priorities including but not limited to architectures, technical requirements and challenges, common strategy in certain areas to influence relevant open source communities and other forums

Represent the non-confidential views of the Advisor and the broader user community;

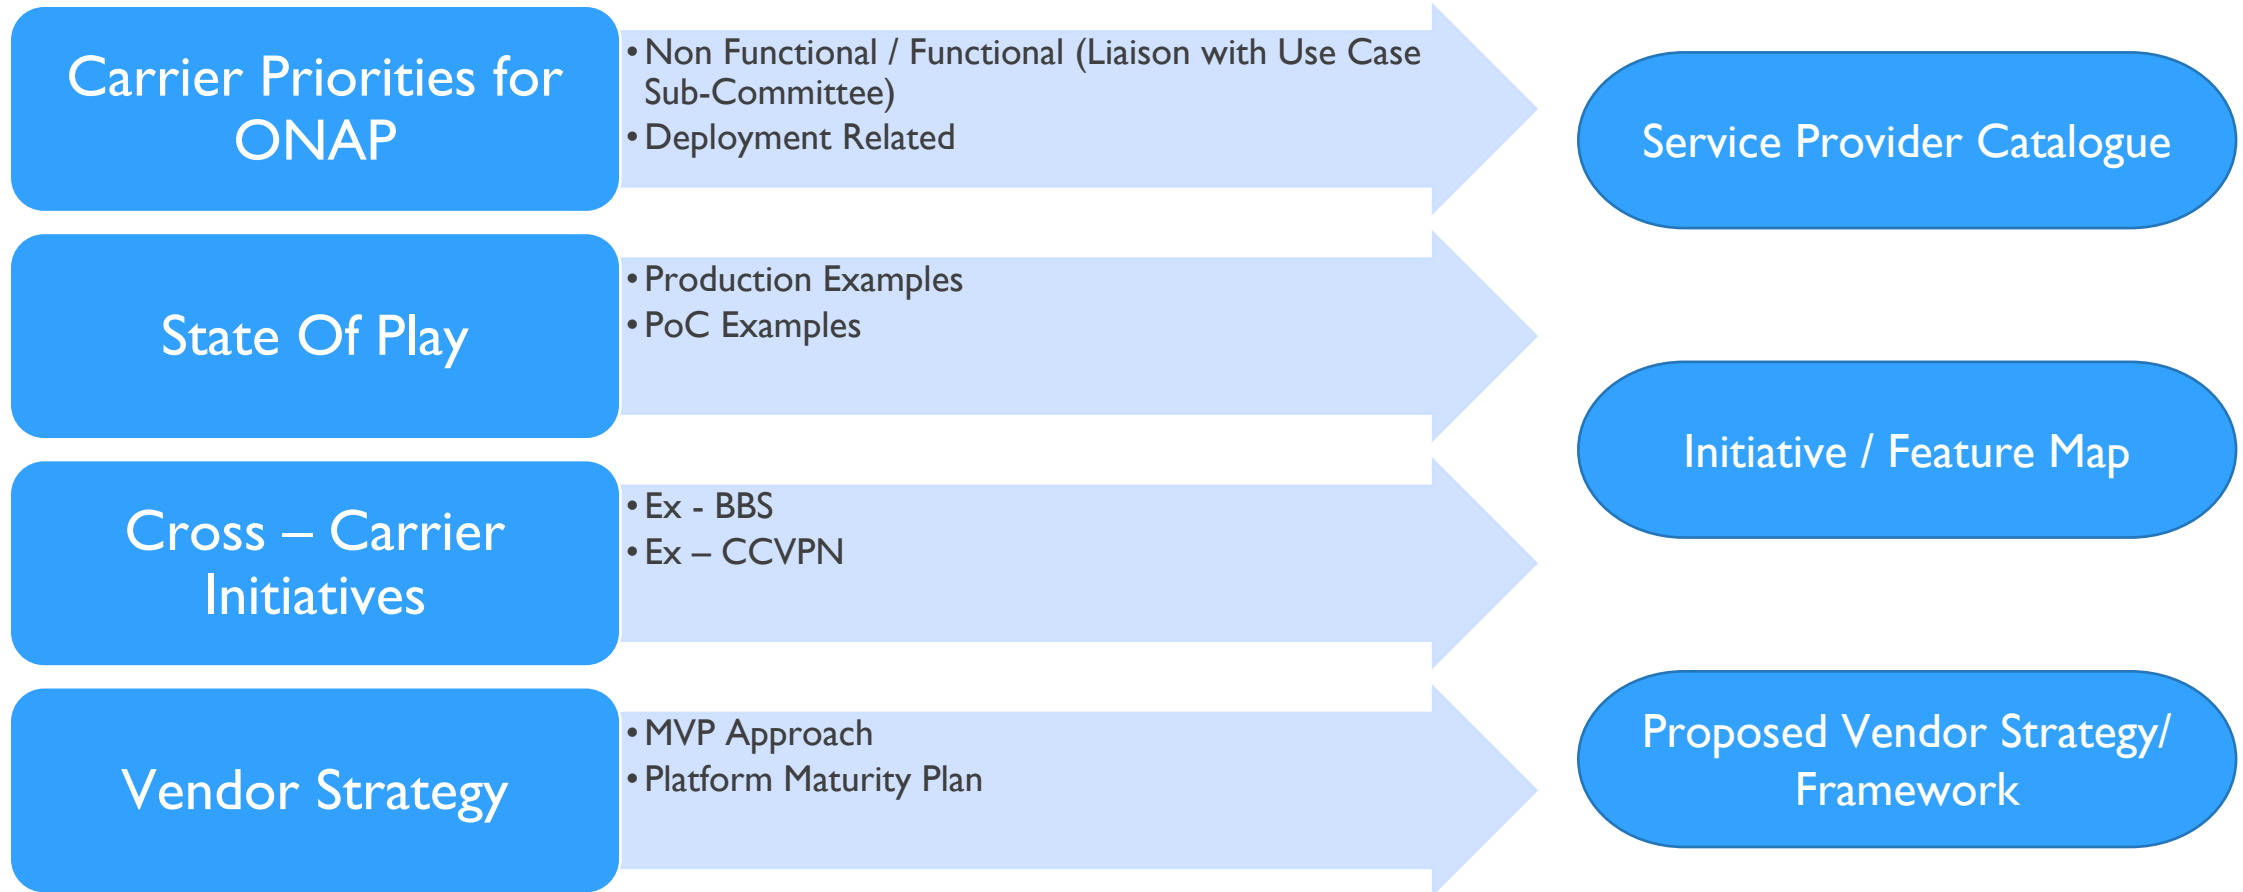

Represent the Advisor's region and business industry; and

Assist in the recruitment of new Advisors, supporters and other LFN participants.

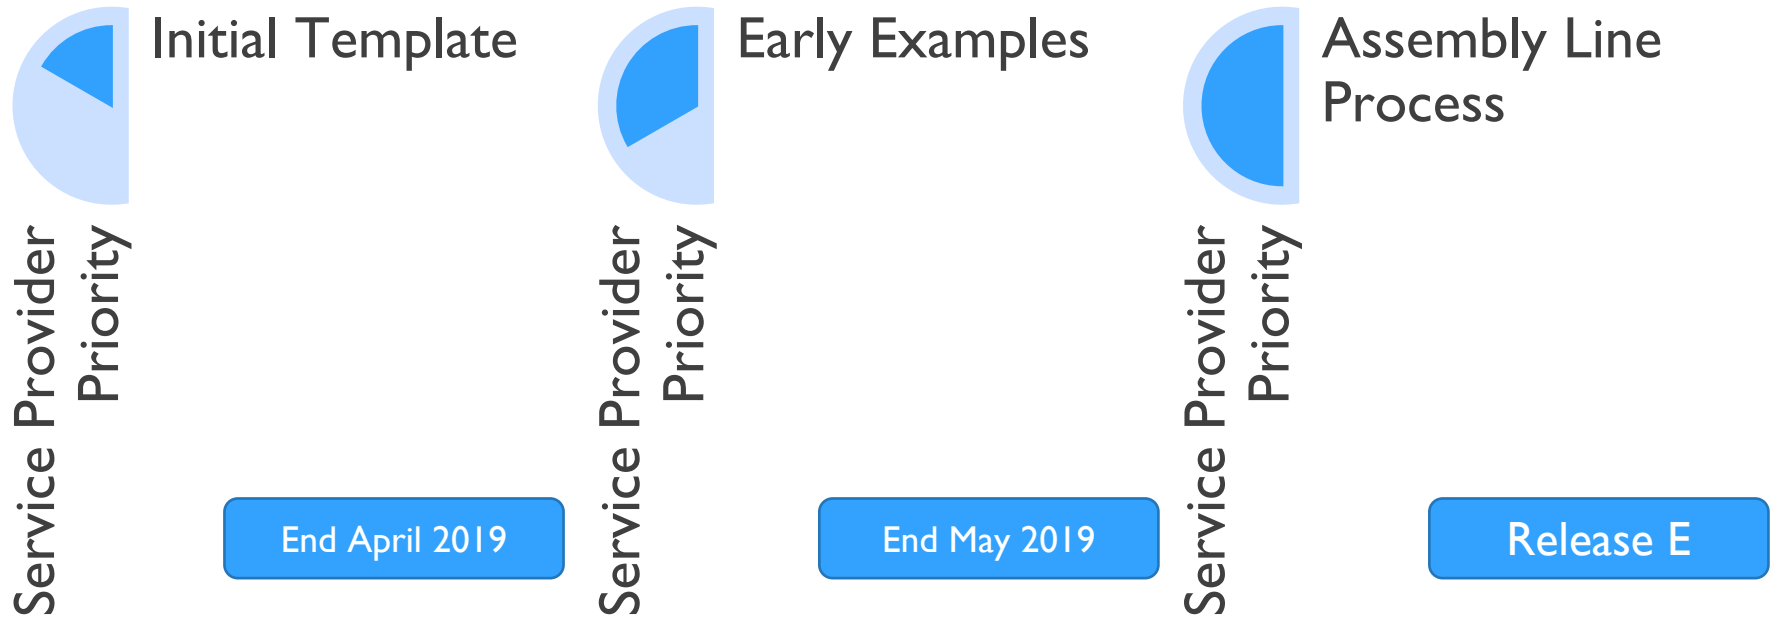

Proposed Re-Boot

- › Predominant focus is ONAP, OPNFV
- › Suggestion is to kick-off EUAG Pilot - “ONAP/OPNFV” EUAG working group - to define EAUG processes and operating model
- › Define the Mission statement for the “EAUG ONAP/OPNFV working group”
- › Define carrier’s priorities for ONAP/OPNFV (starting with)
 - › Share production/POC experiences
 - › Initiate Cross-carriers initiatives i.e. BBS, CCVPN
 - › Define Vendors strategy for the ONAP/OPNFV
