

DCAE Dublin Features Highlights

06-12-2019

Vijay Venkatesh Kumar
(vv770d@att.com)

AGENDA

Platform Enhancement

New Service Components

DCAE Dublin Deployment updates

Onboarding Tools evolution

Demo

Future release planning

Data Collection Analytics and Events (DCAE) – Project Scope

- DCAE encompasses platform and service components
- Platform Components provides functions to deploy, host and perform LCM of service components.
- Service components collectively fulfill ONAP data collection needs from network elements and performing intelligent analytics for triggering root cause CL Events.
- DCAE architecture is flexible, plug-able, micro-service oriented, model-based component deployment and supports dynamic service composition.
- Supports multi-site collection and analytics operations which are essential for large scale deployment.

DCAE Dublin (R4) Platform Enhancement

- Multisite K8S cluster deployment support for DCAE services (via K8S plugin)
- Support helm chart deployment in DCAE using new Helm cloudify plugin
- DCAE Healthcheck enhancement
- Dynamic AAF based topic provisioning support through Dmaap cloudify plugin
- PolicyHandler Enhancement to support new Policy Lifecycle API's
- Blueprint generator tool to simplify deployment artifact creation
- Dashboard Integration (UI for deployment/verification)
- Cloudify Manager resiliency

Multisite K8S support for DCAE Services

```
tosca_definitions_version: cloudify_dsl_1_3
```

```
description: >
```

```
Simple blueprint to launch nginx as a "service component"
```

```
imports:
```

```
- http://www.getcloudify.org/spec/cloudify/3.4/types.yaml
```

```
- https://nexus.onap.org/service/local/repositories/raw/content/org.onap.dcae2.platform.plugins/R4/k8splugin/1.4.12/k8splugin_types.yaml
```

```
inputs:
```

```
location:  
  type: string  
  default: site-00
```

```
node_templates:
```

```
web_server:  
  type: dcae.nodes.ContainerizedServiceComponent  
  properties:  
    service_component_type: 'nginx-web'  
    location_id: {get_input: location}  
    image: nginx  
    docker_config:  
      healthcheck:  
        type: "http"  
        endpoint: "/"
```

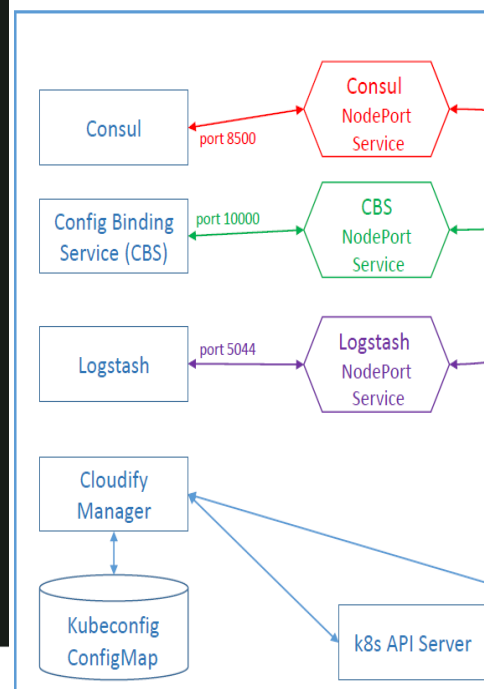

```
interfaces:
```

```
cloudify.interfaces.lifecycle:
```

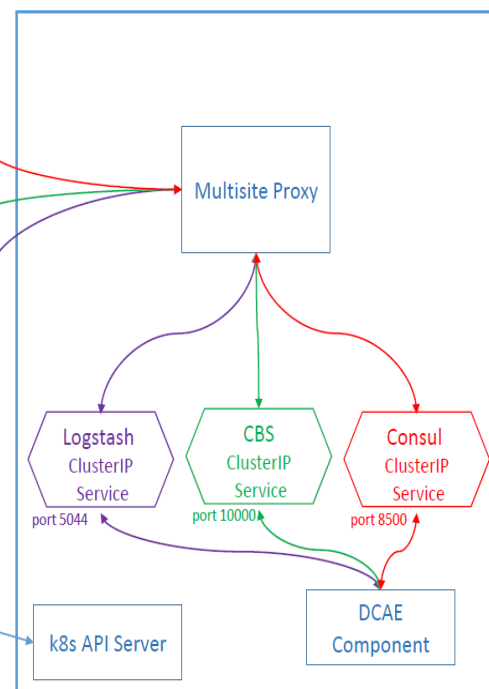

```
start:
```

```
inputs:  
ports:  
  - '80:0'
```

central cluster

site-00 cluster

Healthcheck Enhancement

- Single API for all DCAE components
- Sample execution

```
curl dcae-health
{"type": "summary", "count": 14, "ready": 12, "items": [
  {"name": "dev-dcaegen2-dcae-cloudify-manager", "ready": 1, "unavailable": 0},
  {"name": "dev-dcaegen2-dcae-config-binding-service", "ready": 1, "unavailable": 0},
  {"name": "dev-dcaegen2-dcae-inventory-api", "ready": 1, "unavailable": 0},
  {"name": "dev-dcaegen2-dcae-servicechange-handler", "ready": 0, "unavailable": 1},
  {"name": "dev-dcaegen2-dcae-deployment-handler", "ready": 1, "unavailable": 0},
  {"name": "dev-dcaegen2-dcae-policy-handler", "ready": 0, "unavailable": 1},
  {"name": "dep-dcae-ves-collector", "ready": 1, "unavailable": 0},
  {"name": "dep-dcae-tca-analytics", "ready": 1, "unavailable": 0},
  {"name": "dep-dcae-prh", "ready": 1, "unavailable": 0},
  {"name": "depdep-dcae-hv-ves-collector", "ready": 1, "unavailable": 0},
  {"name": "dep-dcae-dashboard", "ready": 1, "unavailable": 0},
  {"name": "dep-dcae-snmpttrap-collector", "ready": 1, "unavailable": 0},
  {"name": "dep-holmes-engine-mgmt", "ready": 1, "unavailable": 0},
  {"name": "dep-holmes-rule-mgmt", "ready": 1, "unavailable": 0}
]}
```

- Support dynamic service deployed from CLAMP/Dashboard

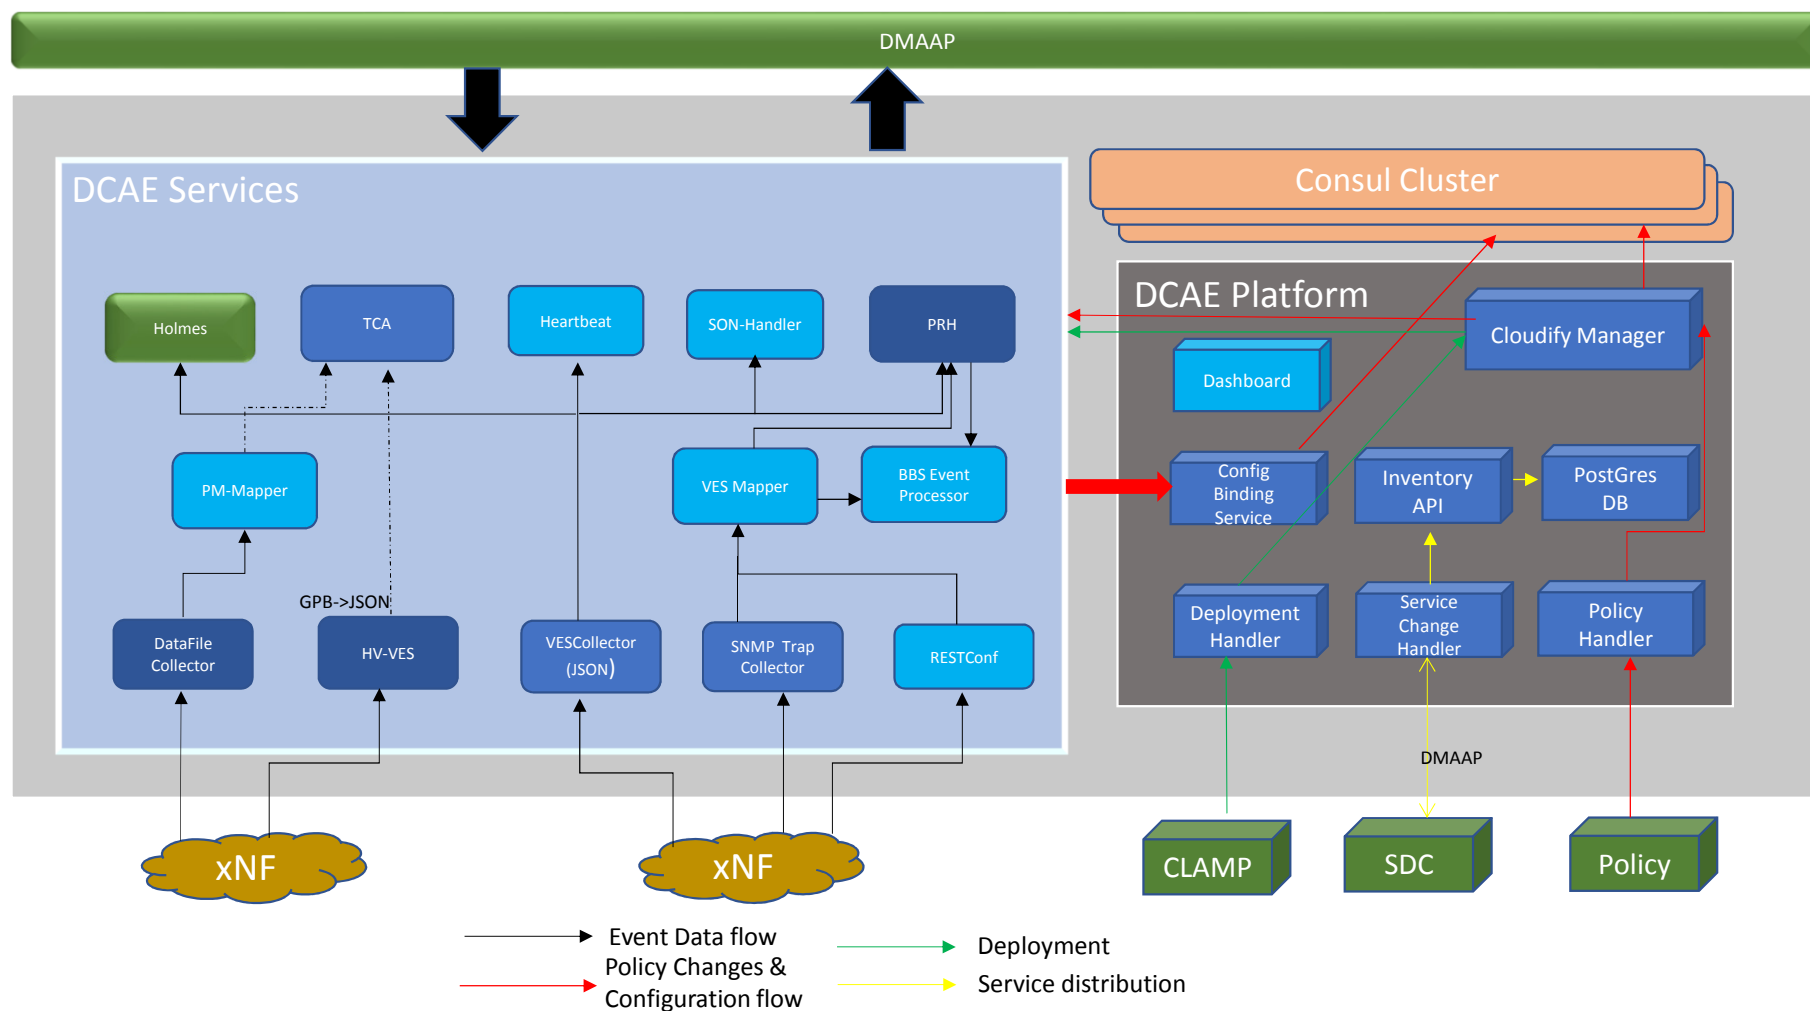

```
curl dcae-healthcheck | python -m json.tool
{
  "count": 13,
  "items": [
    {
      "name": "dev-dcaegen2-dcae-cloudify-manager",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dev-dcaegen2-dcae-config-binding-service",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dev-dcaegen2-dcae-inventory-api",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dev-dcaegen2-dcae-servicechange-handler",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dev-dcaegen2-dcae-deployment-handler",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dev-dcaegen2-dcae-policy-handler",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dep-dcae-ves-collector",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dep-dcae-tca-analytics",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dep-dcae-prh",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dep-dcae-hv-ves-collector",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dep-dcae-dashboard",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dep-dcae-snmpttrap-collector",
      "ready": 1,
      "unavailable": 0
    },
    {
      "name": "dep-holmes-rule-mgmt",
      "ready": 1,
      "unavailable": 0
    }
  ],
  "ready": 13,
  "type": "summary"
}
```

DCAE Dublin (R4) - New MS

- Collectors
 - RESTConf collector
- Event Processors
 - VES/Universal Mapper
 - 3gpp PM-Mapper
 - BBS Event processor
 - DL Handlers (POC) (<https://wiki.onap.org/display/DW/DataLake+POC>)
- Analytics/RCA
 - SON-Handler
 - Heartbeat MS

RTD : <https://onap.readthedocs.io/en/dublin/submodules/dcaegen2.git/docs/sections/services/serviceindex.html>

ONAP DCAE R4 ARCHITECTURE

DCAE Dublin (R4) Deliveries (Contd.)

Common SDK design for DCAE services

- Dmaap pub/sub
- Configbindingservice
- A&AI client

Enhancement to existing DCAE components

- VES Collector (security)
- HV_VES (logging)
- PRH (common sdk + BBS)
- DataFileCollector (security enhancement + resiliency support)

DCAE Deployment updates for Dublin

DCAE R3 Deployment

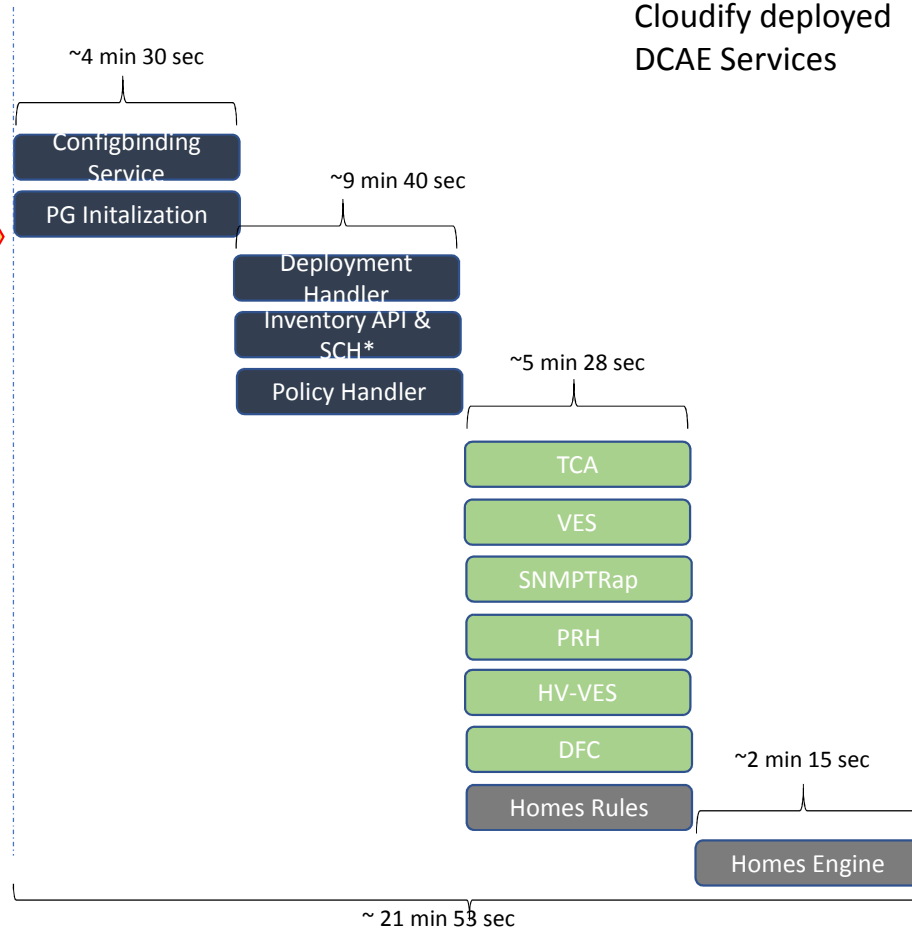

Helm
deploy/
install
(OOM)

- Consul
- Postgres
- Cloudify
- Healthcheck
- Redis DB
- Bootstrap

~10-20 min

Cloudify deployed
DCAE Services

Dublin Deployment Strategy

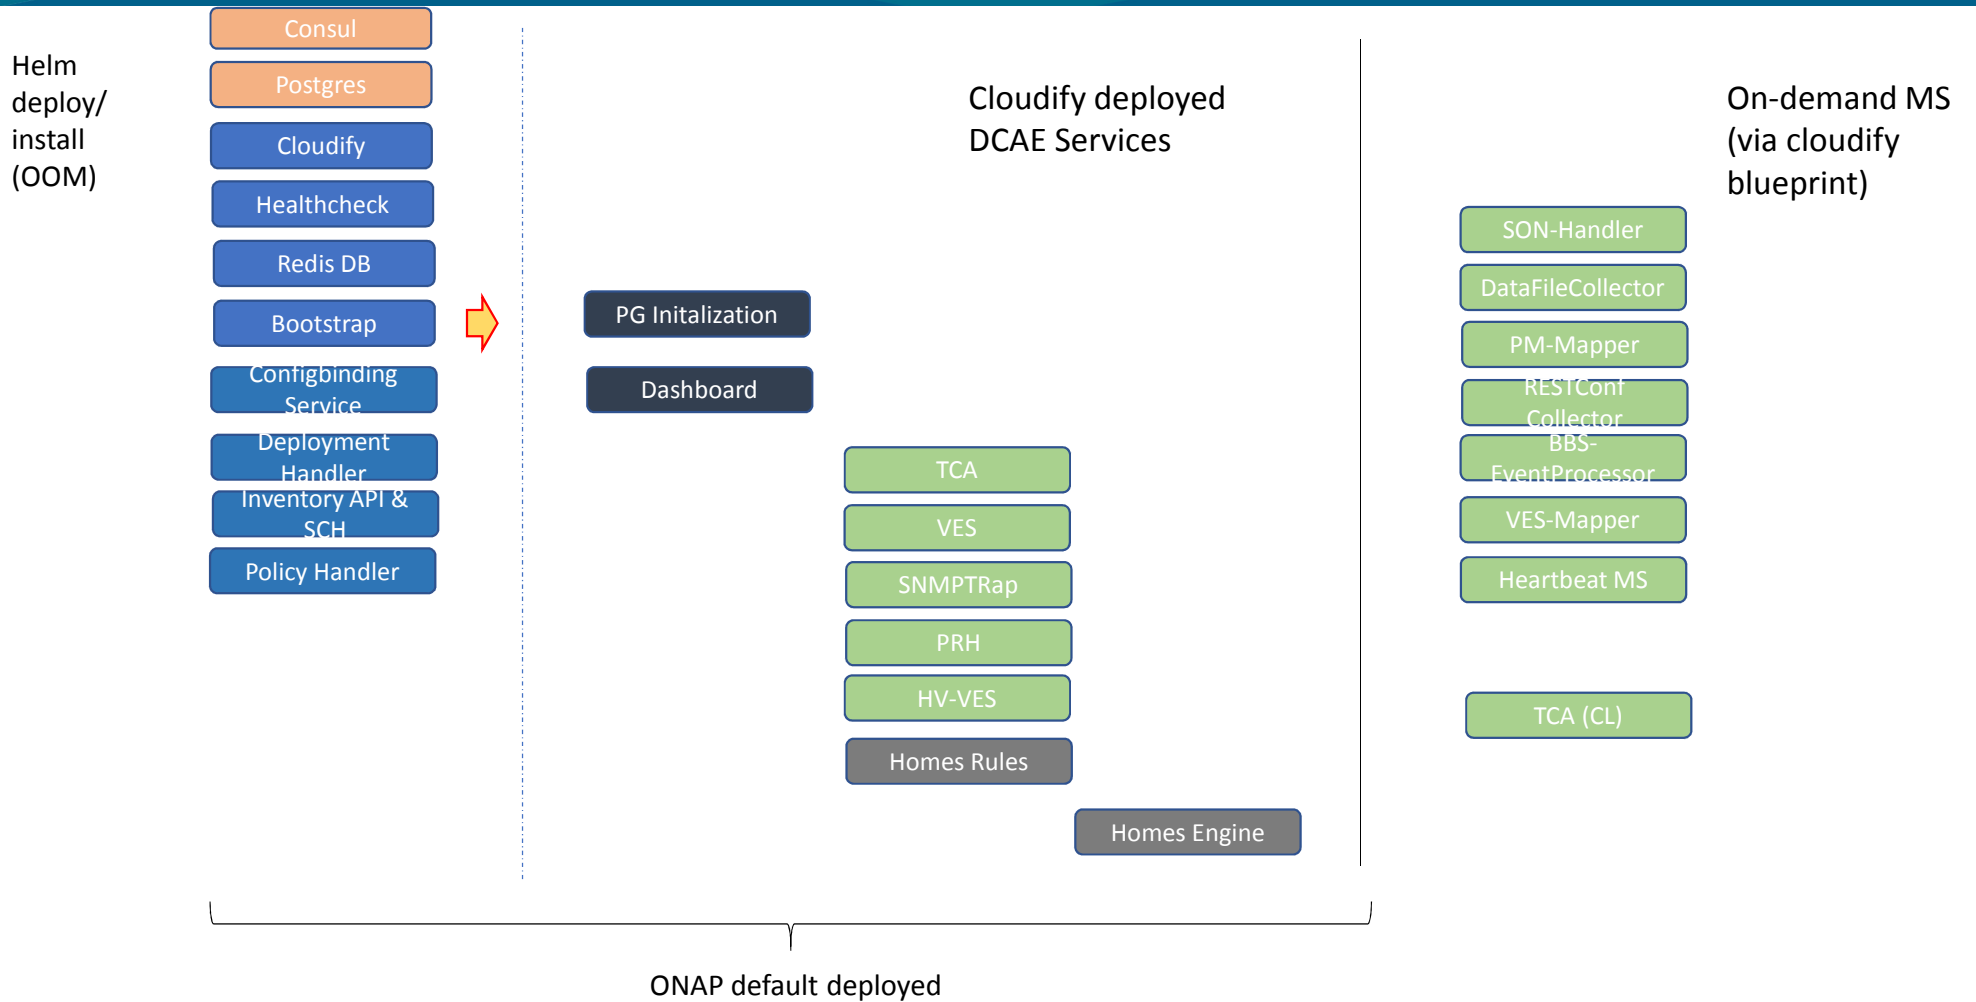

DCAE Platform

- Migrated to helms charts for all prior components
- Cloudify Blueprint for R4 new components

DCAE Services

- Option 1 : Static Components (instantiated through DCAE-bootstrap)
- Option 2 : On-demand deployment through CLAMP
- Option 3 : On-Demand deployment through DCAE-Controller cli

DCAE Dublin Deployment

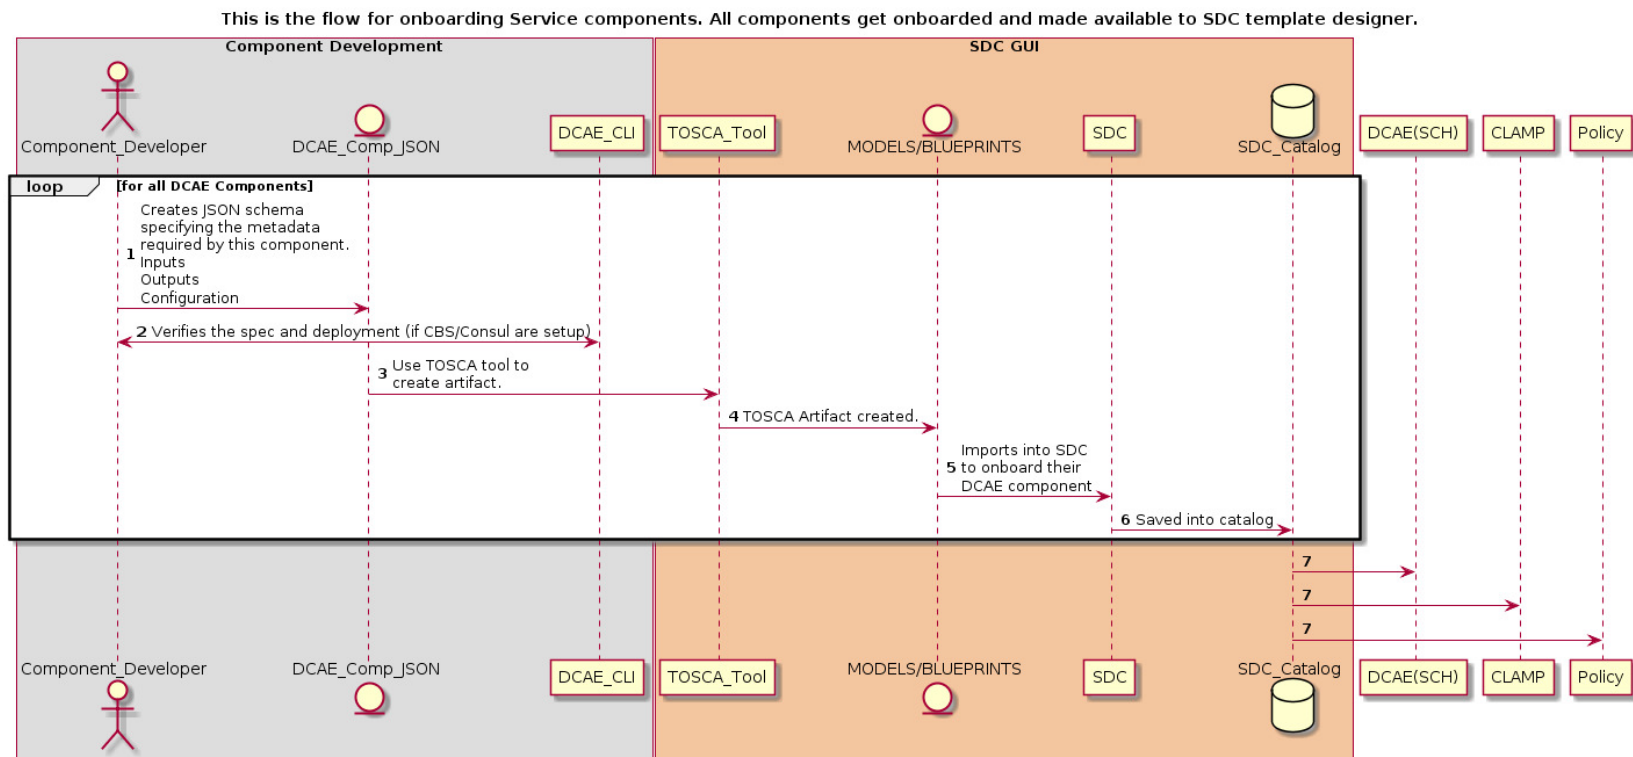

ONAP MS Onboarding Evolution

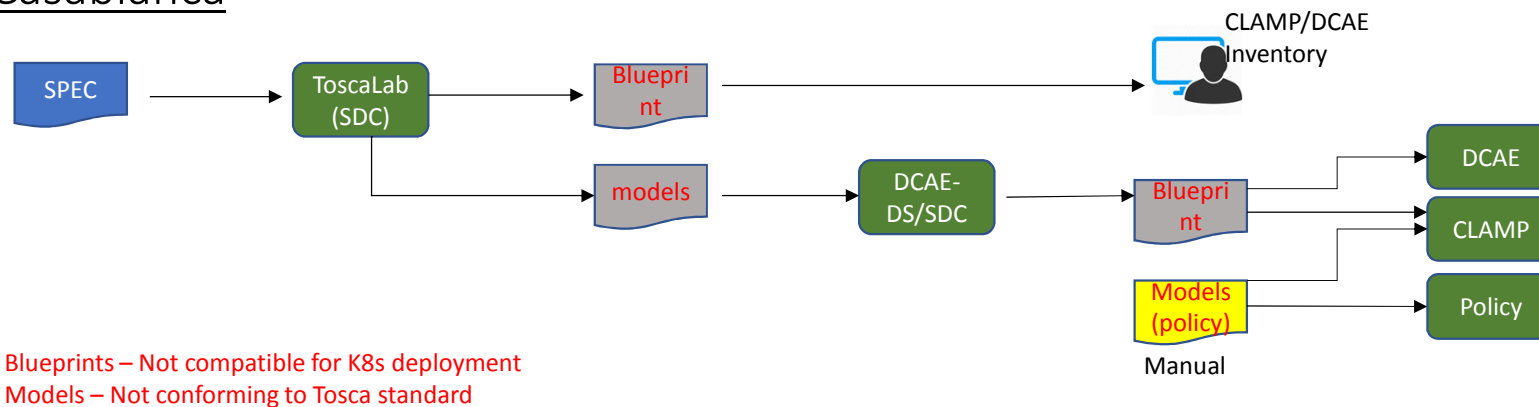

Control Loop Onboarding Flow (Target)

<https://wiki.onap.org/display/DW/MicroServices+Onboarding+in+ONAP>

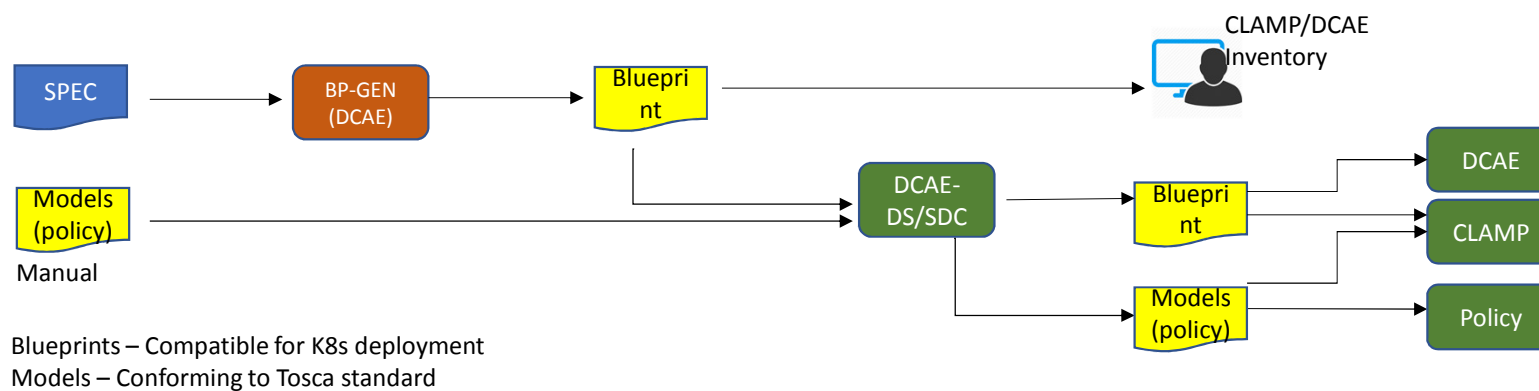

ONAP Control Loop Design Flow (Single MS)

Casablanca

Dublin

DEMO – Cloudfy blueprint generation & Deployment (via Dashboard)

Demo Walkthrough

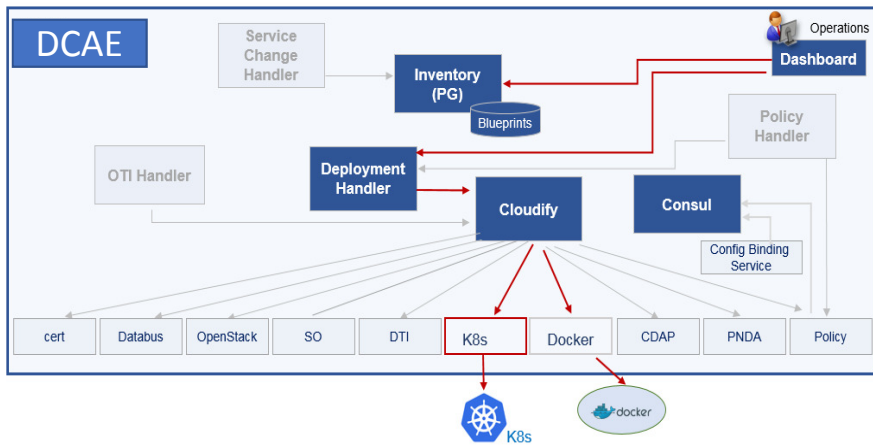

- Sample Spec file review
- Introduction to Blueprint-generator Tool
- Blueprint generation
- Dashboard Overview
- Sample Deployment into K8S

Dcae_cli/spec support (Onboarding pre-requisite)

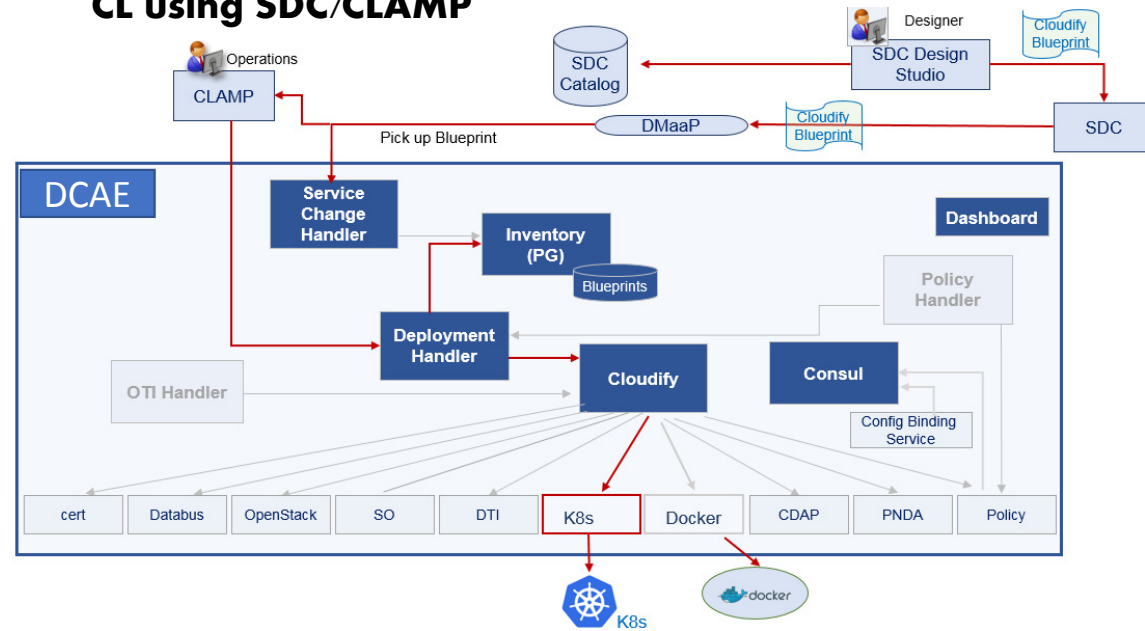

<https://docs.onap.org/en/dublin/submodules/dcaegen2.git/docs/sections/components/component-development.html>

DCAE Application – Deployment Workflow

Stand-alone (DCAE)

CL using SDC/CLAMP

Service Components (MS) DCAE Integration/Onboarding Impact

- [Option 1 : Static Components \(instantiated through DCAE-bootstrap\)](#)

Requires CBS integration

- [Option 2 : On-demand deployment through CLAMP](#)

Requires CBS integration + policy modelling + onboarding through SDC/CLAMP/Policy/DCAE flow

- [Option 3 : On-Demand deployment through DCAE-Controller cli/Dashboard](#)

Requires CBS integration + policy modelling

Note: Standalone with static configuration is also supported but current none of DCAE MS fits under this model

- ❖ Dashboard, Dmaap Plugin under CCSDK project
- ❖ Helm charts under OOM repo
- ❖ ChinaMobile, QCT contribution not recorded

El-Alto and Frankfurt Planning

E and F Release Planning under-way

- El-Alto release - <https://wiki.onap.org/display/DW/El-ALTO+-+Tracker>

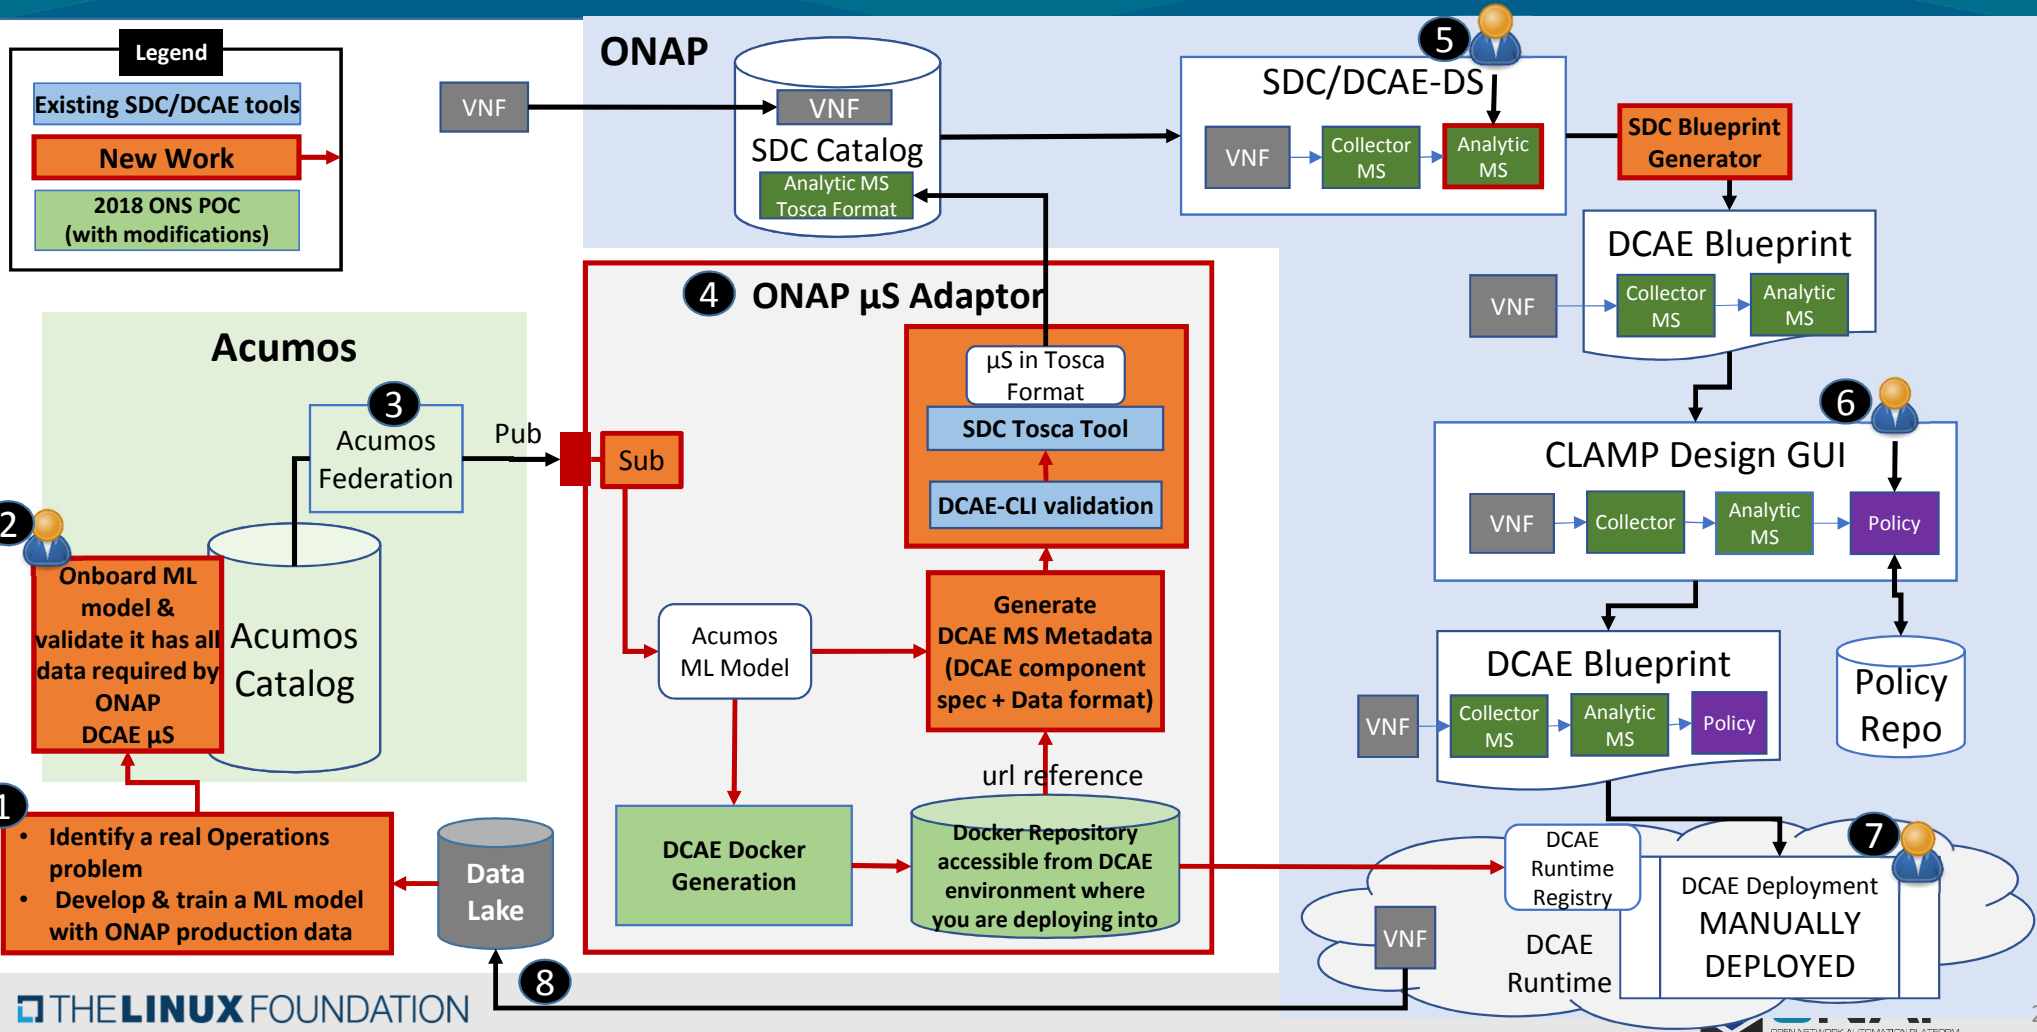

- Security
- Prototyping components for secure topic/feeds
- CL enablement for additional MS
- Blueprint-generator (policy model & dmaap-plugin integration)

- Frankfurt release

- Design Flow enhancement
 - Acumos Integration
 - DCAE-DS integration and re-tooling
- ONAP Topology based event reconfiguration of MS
- DCAE PNDA Integration
 - 1) Leverage DMAAP/Kafka for PNDA instead of native
 - 2) Integrate PNDA apps with ONAP onboarding flow (SDC/CLAMP/Policy)
 - 3) PNDA adapter for supporting dynamic deploy and configuration support
 - 4) PNDA platform containerization and deployment via HELM for ONAP Central

Acumos-ONAP Integration Phase 1 Dataflow (3Q 2019)

Demonstrate with a Control Loop Use Case

Q&A
