

TM Forum Report ONAP workshop Antwerp Sept 2019

Open API and ExtInt

Ext Int APIs

- Use TM Forum APIs (Apache2.0)
 - [TMF641 ServiceOrder](#)
 - [TMF633 ServiceCatalog](#)
 - [TMF638 ServiceInventory](#)
- Open APIs to Design Guideline 3.0 are extensible
- ExtInt uses TMF open APIs with MEF Payload

Success factors

- Proactive coordination between TMF Open APIs and ExtInt team (and MEF Legato)
- Single member lead Orange Ludovic Robert and team

Modelling

SDC models & TM Forum Information Framework (aka SID)

- Continuous exchange of experience between SDC & Modelling teams and Inf Framework
- Success factor**
- Proactive coordination between teams
 - Single member lead Kevin Scaggs

Catalyst: Agile OSS for New Age Services & Hybrid Networks DTW 2018

- ONAP implementation A&AI, SO , Resource catalogue

Success factor

- Proactive input of experiences to ONAP thru CR
- Lead Nishi Mathur Infosys

(contributing to collaboration program)

- 5G Riders on the Storm - Phase II

focuses on the operational use cases required to support lifeline communications both during and after extreme weather events such as storms and flooding. Public safety relies on functional emergency services that in turn rely on CSPs providing an assured level of 5G services that enables first responders to do their job

- 5G Optimized Capacity & E2E Experience - Phase II

guaranteeing assured service quality across multiple slices requires elimination of prohibitively expensive, resource over-allocation and cross-CSP co-ordination.

This Catalyst demonstrates real-time, dynamic, automated planning, operation and spectrum optimization for multiple SLA guaranteed slices, with blockchain-based settlement, spanning multiple CSPs.

- Skynet

advanced eHealth and tele-medicine services across seamlessly coordinated, geographically distributed service providers to support medical crises where global collaboration is needed.

We will demonstrate the value of industry standard frameworks and APIs to support complex Network Services Orchestration, Service Assurance, monetization and capabilities offered by 5G network slices and physical networks.

- 4G & 5G NaaS for B2B & B2I Business Ecosystem

demonstrate the concept of network capability openness via APIs to enable service agility, and build a digital service ecosystem based on China Unicom's ONS Capability Center empowered by DevOps process and an open platform

Catalyst	Contribution	Status
Skynet	Contribution to ONAP: White paper 12.2 ODA-194 - Contribution to ONAP: White paper 12.2	Registered
5G: Optimized Capacity & E2E Experience - Phase II	The document provides information on merging architecture, components and concepts from TMF Open API, 3GPP, ONAP, GSMA and MEF to realize a solution for effective 5G slicing ODA-240 - The document provides information on merging architecture, components and concepts from TMF Open API, 3GPP, ONAP, GSMA and MEF to realize a solution for effective 5G slicing	Registered

Challenge is how to feed these results into ONAP

Skynet

Borderless Remote Health Care: A Reality with 5G

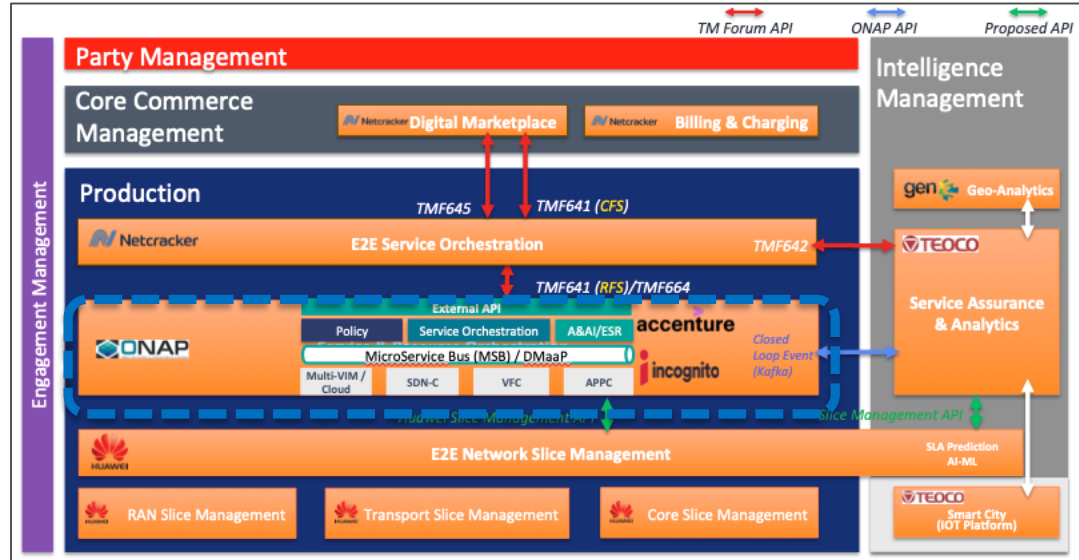

Supported the fulfillment of

"RIDERS in the STORM"

That thanks to the collaborative work of

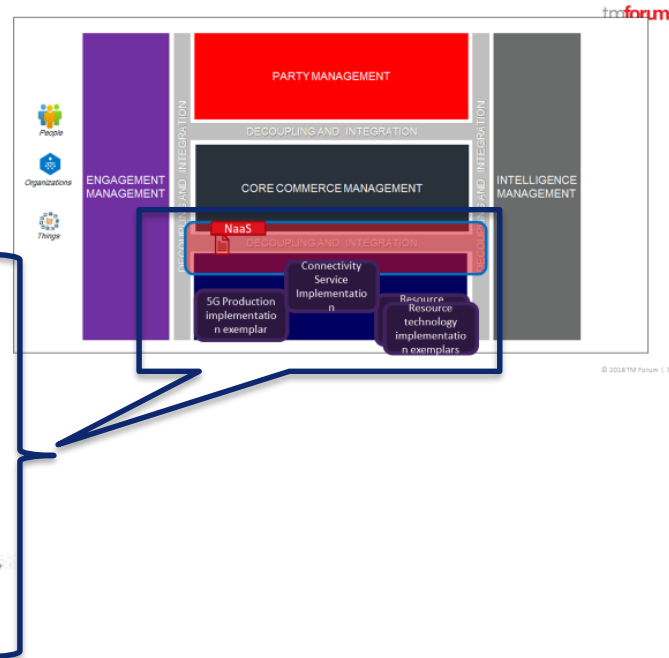

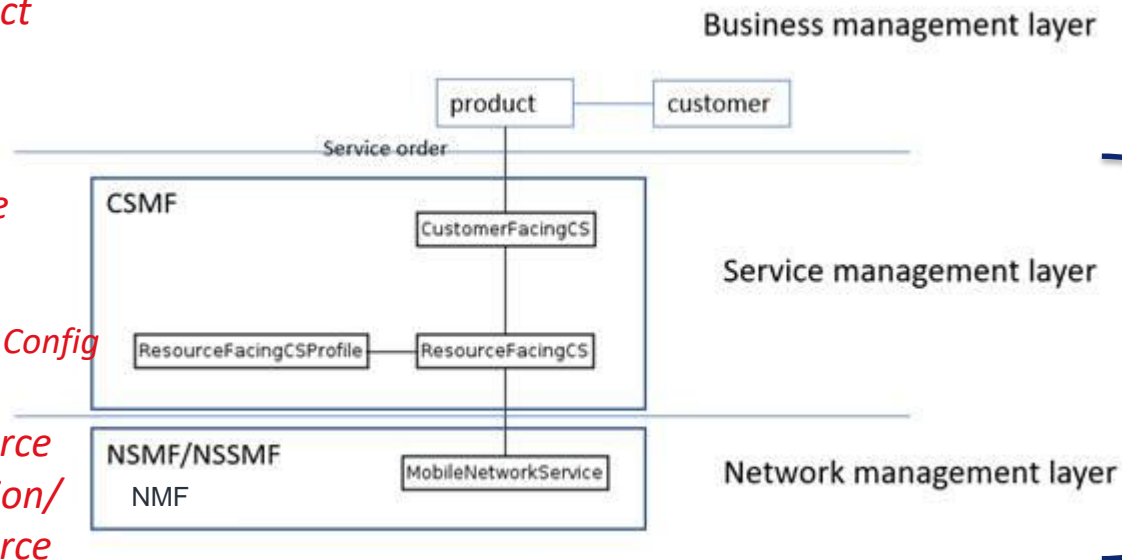

Telecommunication management; Study on management aspects of communication services

ONAP TSC Requirement	ONAP Team	TM Forum Asset	TM Forum Team
5G / ORAN & 3GPP Standards Harmonization	?	IG xxx Services not slices https://github.com/5g-ridersonthestorm/gsma-gst TMF664 RFAC API	ODA Production Open API
All Control Loop Policy Models should be TOSCA Compliant	?	GB999 IG1176 TOSCA Guide for Model-Driven Automation R19.0.0	ODA Production
Modeling: Network Slicing modeling	?	IG xxx Services not slices https://github.com/5g-ridersonthestorm/gsma-gst	ODA Production Frameworkx SID
LCM API Evolution	?	IG1176 TMF664 RFAC	ODA Production Open API
Third Party Operational Domain Manager	?	TMF909 NaaS API Component Suite	Open API
xNF License Management use case		IG1141 Onboarding Automation	ODA Production

TM Forum's thoughts on Top Four collaboration opportunities for R6 Frankfurt

1. Continue with APIs
 - e.g. Ext Int adoption of TMF 909 Networks as a Service API Component Suite
 1. Internal Closed Control Loop APIs GB999 ODA Production and Open APIs
 2. Catalyst API findings (described earlier)
2. Use of the TOSCA templates for SDC and ONAP Runtime
 - [IG1176 TOSCA Guide for Model-Driven Automation R19.0.0](#)
3. Modeling/API 'Meet in the Middle' approach
 1. GSMA GST practical use through JSON in Open APIs
 2. Connectivity Service models - network technology neutral
 3. Alignment with Fx Information Framework and SDC models
4. License model –
 - Share work on Licensing Models IG1141 and ONAP activities

We need champions for each opportunity that are working in or coordinating across both organizations.

Borderless Remote Health Care: A Reality with 5G

As recent history has proven, **epidemic outbreaks** are still happening frequently, even in well developed countries and **swift, coordinated handling is crucial**: pandemic influenza, bird flu, swine flu, Nipah and Ebola still have a global impact.

How telecoms can help the eHealth sector?

The Skynet model can ultimately enable an **unprecedented medical collaboration** around the globe.

5G Riders in the Storm

Catastrophic floods cause human tragedy, endanger lives and bring heavy economic losses.

A Severe Weather Event Inspired by the Genova Storm 2014 was our Use Case but

.... during the last five years Europe has suffered over 100 major damaging floods

Licensing was addressed as part of ODA /ZOOM Onboarding Automation initiative

- Key Results in
 - [IG1141 Procurement and Onboarding Suite R18.0.1](#)
 - [IG1141A Onboarding Automation: Package ID, Software Assets and License Management Support R18.0.1](#)
 - [IG1141M Onboarding Automation: Metrics Support R18.0.1](#)
 - [IG1141C Onboarding Automation: VF Categorization and Orchestrability R18.0.1](#)
 - [IG1141 Procurement & Onboarding of Virtualization Packages R18.0.1](#)
- **Context: Need to understand how to automatically onboard both network software applications, network appliances**
 - [IG1176 TOSCA Guide for Model-Driven Automation R19.0.0](#)
 - IG1141 identified licensing conditions for Software Application inc. VNF as a critical challenge)
 - CSP did not want licence management software in their critical infrastructure
 - Approach is based on extending ISO. (2012). *ISO/IEC 19770 Software asset management (six parts*
 - <https://www.iso.org/standard/56000.html>

Key entities in Software Asset Management ISO/IEC 19770 extended –from IG1141
