Security priorities

Frankfurt security requirements:

- Containers configured per secure recommendation
- Code coverage – increase to 60% -> each project should provide own proposal of % increase
- Python 3 migration from version 2 (already in the requirements list)
- Java 11 and 13 migration from v8
- CII badging – meet targeted Silver and Gold requirements
- Complete the OJSI backlog
- HTTPS communication vs. HTTP which should be declined, eventually well documented/justified
- Password removal from OOM HELM charts (Krzysztof) – recommendation required
- Communication Matrix (Natacha)
- Containers and Kubernetes secure configuration recommendation (Amy)
- Coverity integration by end of Frankfurt (Artem) – no progress
- Ingress controller (Lucjan)
- ISTIO POC – limited ONAP deployment scope (Sylvain)
- Secure communication for 5G – AAF contribution – CMPv2 protocol trial usage (Hampus)
