Dear all,

I am sending out the meeting notes that Lincoln Lavorie took during the call. Thanks Lincoln!

Agenda:
1. Feedback from Board on documentation
2. OPNFV OVP Infra 2018.08 Status
3. Recap of OVP evolution discussions at ONS
4. ONAP VNF Program Status
5. Vice-chair / Chair Status (Chris' Departure)
6. Any other business

Feedback from Board on documentation
* Approved gov and lab documents
** Need get these document versions published (Action Item: Lincoln)
* Board recommended / suggested consideration for automation of workflow / processes
** Should review process documentation, currently defined. This will also drive some of the Dovetail portal work as well.

OVP Infra 2018.08 Status
* Announced at ONS and tool is available on the website.
* No platforms verified yet, have been asking for feedback during Dovetail calls, believed some companies have internal testing in progress.
* Heather is starting to see service provider interest increase, and this could results in inclusion in RFPs, etc.

Recap of OVP evolution discussions at ONS
* Unconference during ONS Europe event.
* Definition of KPIs through yardstick would be of interest to service providers.
* Push for standardization of those KPIs (i.e. setting a higher bar).
* Morgan presented an approach to derive the KPI from the pharos lab data for yardstick.
* Morgan will help create an initial slide set to define the proposal for performance testing.

ONAP VNF Program Status
* No updates

Vice-chair / Chair Status (Chris' Departure)
* Action Item: Lincoln to work with LFN to bring the leadership back to 2 filled positions.

Any other business
* None
