ONAP (onap) - 36.53%
OpenDaylight (odl) - 63.47%
Key Takeaways:

- ODL had 63.47% of the total job costs this month and odl-csit was the highest job category cost (integration testing)
- Caveats:
  - New Feature of Global Jenkins Job Builder provides build data where available (work in progress)
  - Job counts are an indication of how much change happened to the code bases
  - Total costs are based on cost data returned from cloud compute resources used for the duration of a job
  - Only ODL and ONAP are included for now, as their standard tooling provides the best coverage. We are looking into ways to include more projects in the future.
