OpenDaylight (odl) - 49.49%

ONAP (onap) - 50.51%

Key Takeaways:

- ONAP had 50.51% of the total job costs this month and other jobs (non-verify, merge, or csit) was the highest job category cost.
- Caveats:
    - New Feature of Global Jenkins Job Builder provides build data where available (work in progress)
    - Job counts are an indication of how much change happened to the code bases
    - Total costs are based on cost data returned from cloud compute resources used for the duration of a job
    - Only ODL and ONAP are included for now, as their standard tooling provides the best coverage. We are looking into ways to include more projects in the future.
