

# 04/20 LFN Apr 2021 Report

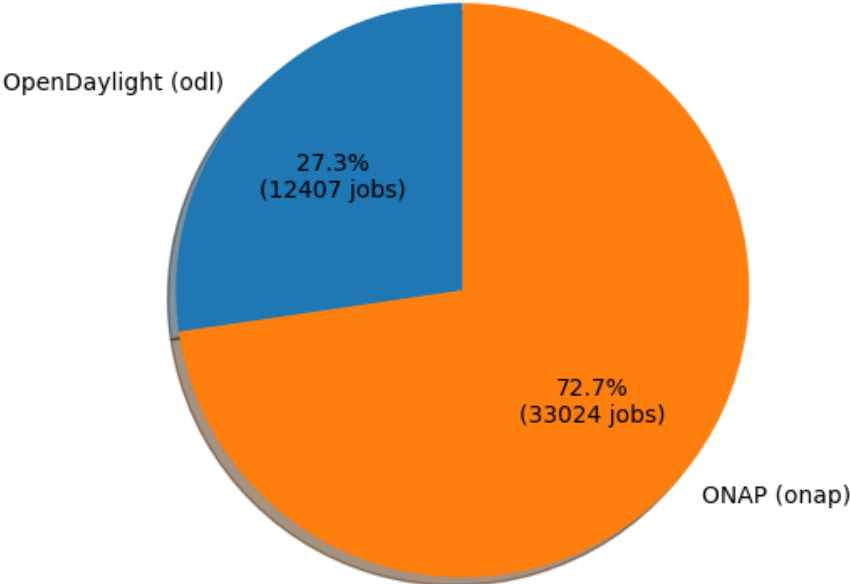

## LFN IT Summary - Apr 2021

### Job counts

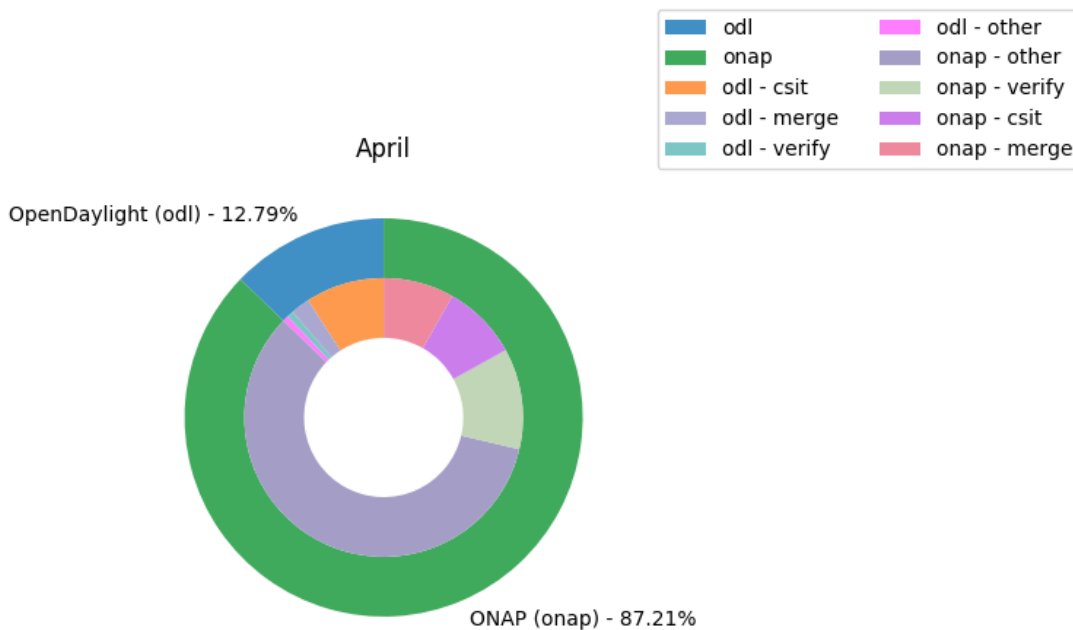

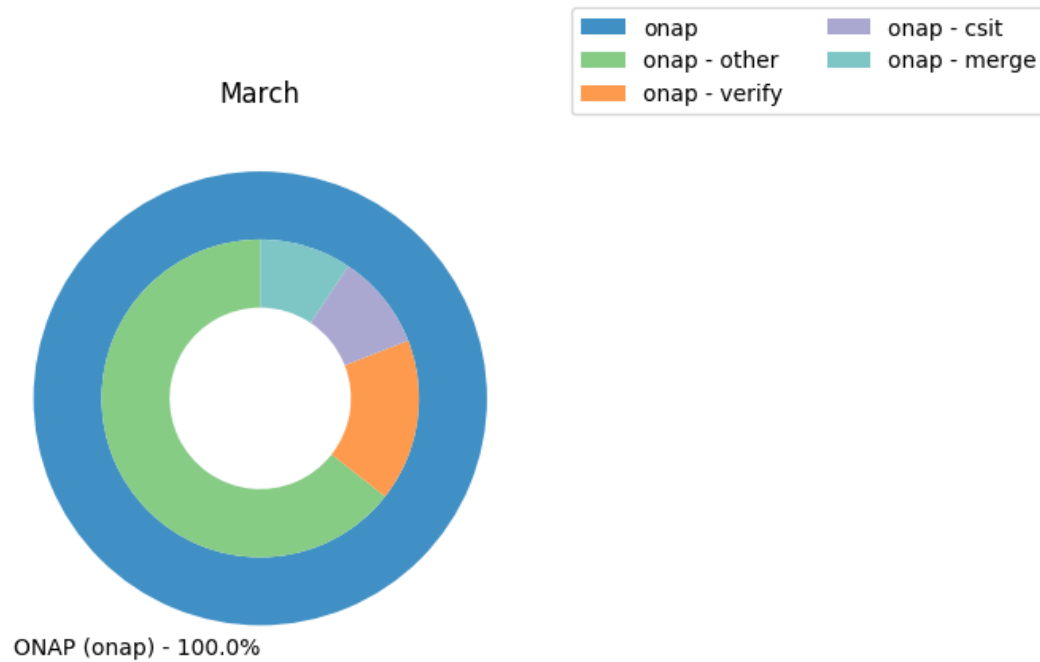

March

April

## Job costs

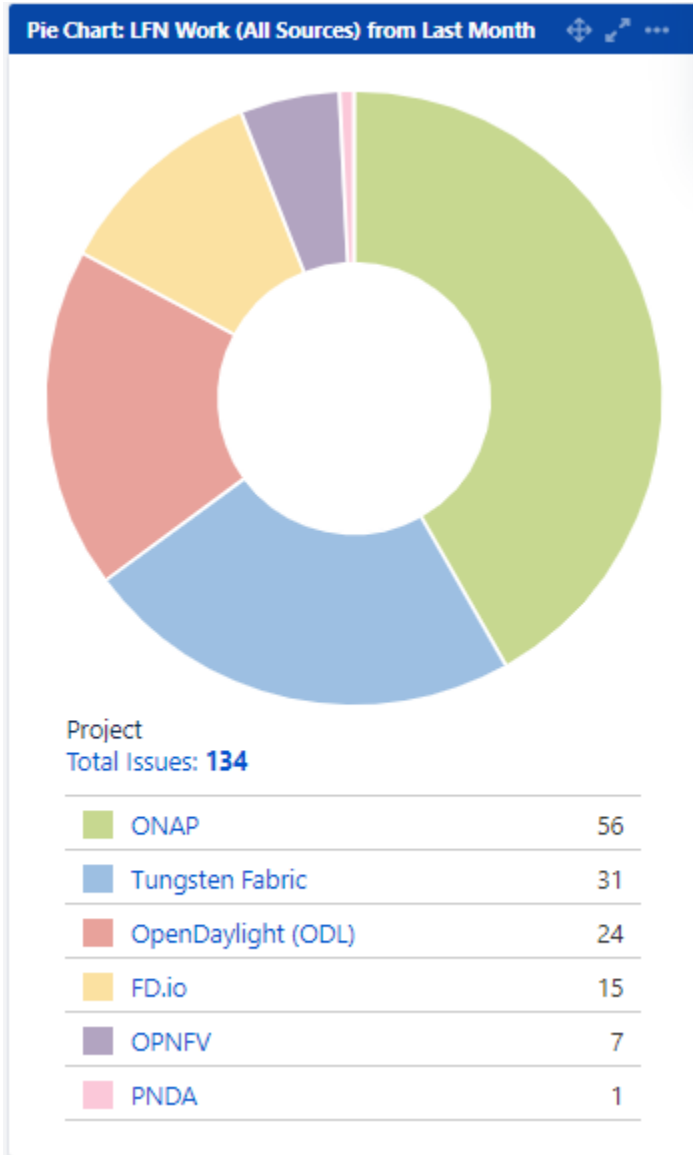

### Key Takeaways:

- The API issue has been resolved by the vendor. We have yet to have time to try and regenerate the missing cost data. As such, ODLs cost percentage is less than actual. ONAP was also affected by the error we had which is throwing off the charts. Next month's chart should be accurate and will we endeavor to regenerate the cost data as we can and may likely restate job cost charts.
- Notes:
  - Job counts are an indication of how much change happened to the code bases
  - Total costs are based on cost data returned from cloud compute resources used for the duration of a job
  - Only ODL and ONAP are included for now, as their standard tooling provides the best coverage. We are looking into ways to include more projects in the future.
