

# 04/20 LFN April 2020 Report

## LFN IT Summary - April 2020

### Job counts

### Job costs

**Key Takeaways:**

- New Feature of Global Jenkins Job Builder provides build data where available (work in progress)
- March job counts were updated as our cost and count scripts were misconfigured for acquiring data
- ODL had 86.53% of the total job costs this month and odl-csit was the highest job category cost (integration testing)
- Job counts are an indication of how much change happened to the code bases
- Total costs are based on cost data returned from cloud compute resources used for the duration of a job
- Only ODL and ONAP are included for now, as their standard tooling provides the best coverage. We are looking into ways to include more projects in the future.
