

07/20 LFN July 2020 Report

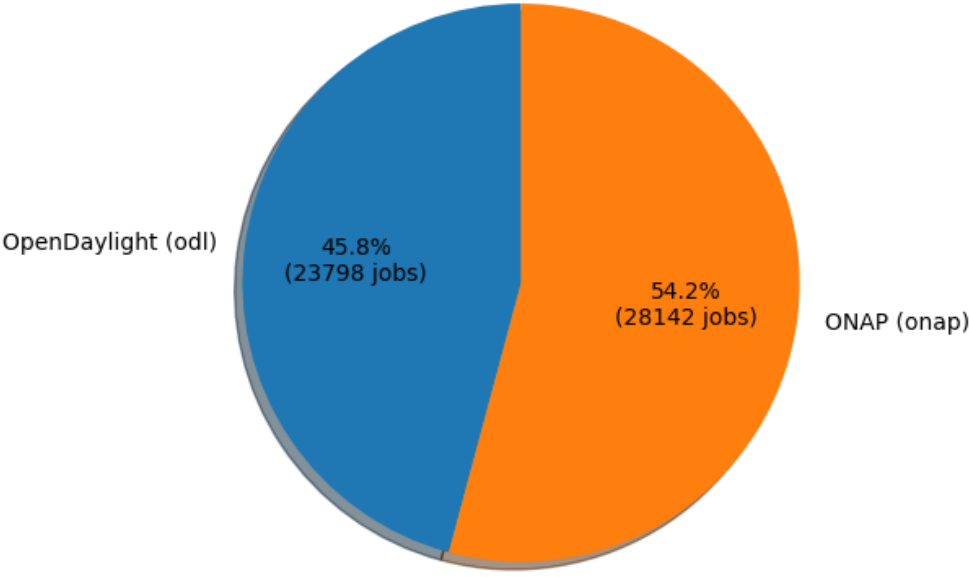

LFN IT Summary - July 2020

Job counts

June

July

Job costs

June

July

Key Takeaways:

- ODL had 70.68% of the total job costs this month and odl-csit was the highest job category cost (integration testing)
- ODL and ONAP both had higher operational runs for July, the calculated data is with an expected variance given the increase in job runs that was seen in both projects
- Caveats:
 - New Feature of Global Jenkins Job Builder provides build data where available (work in progress)
 - Job counts are an indication of how much change happened to the code bases
 - Total costs are based on cost data returned from cloud compute resources used for the duration of a job
 - Only ODL and ONAP are included for now, as their standard tooling provides the best coverage. We are looking into ways to include more projects in the future.
