Community Update

- › Unfortunately ODL contributor Lumina had a closure of business last month.
- › Ex-Lumina Engineers are helping us get the current release Aluminum (Sep 24) out the door.
 - › Big thanks!
- › There are several other contributor companies to ODL (see picture of last 90 days contributions on the right).
 - › So ODL not going anywhere.
- › Having said that - contributions from other companies are highly needed - especially from companies consuming OpenDaylight (either as a product vendor or an end user)
- › Areas of special need:
 - › Release Pipeline activities (Release engineering, integration test, integration packaging, etc.)
 - › OpenDaylight Platform Projects (Kernel Projects)
 - › Documentation
