OpenDaylight Documentation talk

02/04/2021

@OpenDaylightSDN

Agenda

- Quick status
 - Newcomers guide
 - Documentation new structure
 - Best practices migration
 - Spellchecker
- Call for contributions
- Open Discussion

Newcomers guide

- Started from an email discussion with the former TSC

<https://lists.opendaylight.org/g/Discuss/search?q=Drawing+new+contributors+with+simple+tasks>

- need a **straightforward guide for newcomers**
- that references all the necessary materials

=> one available in TransportPCE wiki

<https://wiki.opendaylight.org/display/ODL/Contributor+Guidelines>

- This old guide has been reworked and integrated to the official documentation in RST

<https://docs.opendaylight.org/en/latest/contributor-guides/newcomers-guide.html>

Documentation new structure

contribution guides before project documentation, some pages split too

Welcome to OpenDaylight Documentation

The OpenDaylight documentation site acts as a central clearinghouse for OpenDaylight project and release documentation. If you would like to contribute to documentation, refer to the [Documentation Guide](#).

Getting Started with OpenDaylight

- [OpenDaylight Downloads](#)
- [Release Notes](#)
- [Getting Started Guide](#)
- [Developing Apps on the OpenDaylight controller](#)

OpenDaylight Project Documentation

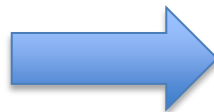

Managed Projects

- [AAA Documentation](#)
- [BGPCEP Documentation](#)
- [Controller Documentation](#)
- [DAEXIM Documentation](#)
- [Genius Documentation](#)
- [Infrautils Documentation](#)
- [JSON RPC Documentation](#)
- [LISP Flow Mapping Documentation](#)
- [MD-SAL Documentation](#)
- [NetConf Documentation](#)
- [NetVirt Documentation](#)
- [OpenFlowPlugin Documentation](#)
- [OVSDB Documentation](#)

Self-Managed Projects

- [TransportPCE Documentation](#)

OpenDaylight Contributor Guides

Welcome to OpenDaylight Documentation

The OpenDaylight documentation site acts as a central clearinghouse for OpenDaylight project and release documentation. If you would like to contribute to documentation, refer to the [Documentation Guide](#).

Getting Started with OpenDaylight

- [OpenDaylight Downloads](#)
- [Release Notes](#)
- [Getting Started Guide](#)
- [Developer Guides](#)

Contributing to OpenDaylight

- [Contributor Guides](#)
- [Infrastructure Guide](#)
- [Integration Testing Guide](#)
- [Integration Distribution Guide](#)
- [Integration Packaging Guide](#)
- [Release Process Guide](#)
- [Documentation Guide](#)
- [Javadocs](#)

OpenDaylight Project Documentation

Managed Projects

- [AAA Documentation](#)
- [BGPCEP Documentation](#)
- [Controller Documentation](#)
- [DAFXIM Documentation](#)

Best practices migration

- Started from the same email discussion
 - <https://lists.opendaylight.org/g/Discuss/search?q=Drawing+new+contributors+with+simple+tasks>
 - many materials were on the old wiki and no more up-to-date
- Migration from mediawiki to RST with pandocs
 - most of the contents migrated but many are still WIP
 - code block are usually not well formatted
- Some improvements
 - to separate coding guidelines from tutorials (in the dev section)
 - to have a coding guideline page per language
 - this eases parallel works and TSC approval

Spellchecker

- inspired from openStack
 - use PyEnchant via sphinx
 - available as a tox profile
- introduced to ease doc cleaning
 - => not done completely → so not enforced in the gate
- possibility to use several dictionaries
 - and to use a custom words list for false positives

Calls for contribution

- Need more reviewers
 - especially native speakers ! but everyone is welcome
 - some old patches are waiting for reviews
- Still many spellings to fix
 - and false positive to add to the word lists too !
- Still a few contents to migrate and rework
- Many coding guidelines still WIP
 - Some are almost empty
 - Some have still outdated contents

Thanks !

- what's your feedback and opinion ?
