Part 1 - NFV Testing and Automation Next Steps

› ETSI and 3GPP Testing work progress

› Any more use cases or requirements for supporting NFs testing considering 5G background?

Part 2- Network Intelligent Testing and Certification Requirements

› Scope for LFN network intelligent testing, and interactions with other AI platforms

› What Systems/Objects under test are concerned by operators?

› What are the cared testing use cases?

› What aspects should be conducted by LFN(Performance, forecast accuracy, etc.) ?

› How to construct data sets, should there has a shared data set, what kinds of data are expected to be provided?

› How to evaluate testing results?

Conclusion and Other Requirements

LF NETWORKING

Thank you !
