

Cloud Native Telecom Networking

Overall Strategy and Focus with LFN+CNCF

1. Vertical Specific Compliance with full stack (NFVi/VIM/MANO/VNF/CNF) - eg 5G Super blueprint
2. OVP2.0 Certification (Anuket Assured)
3. Integrated CI using CNF bench for Hybrid deployments

1. Cloud Native Principles, Definitions (TUG/WG)
2. CNF Test Suite
3. K8s Conformance

Notes:

1. Architecture strategy aligned across CNCF+LFN
2. CNCF hosts the definition of Cloud Native and its certification for applications on K8s. CNF (ie Workload/Application) is one of them.
3. All Vertical (Telco) specific compliance and verification in LFN's OVP program based on Anuket requirements and built using common building blocks
