Review of 2021 Updates to ONAP Release Process

[redacted]

@twitterhandle

Introduction

- In the spring of 2021, the ONAP TSC approved a recommendation to make two significant changes to the ONAP release process
  a. Introduction of a new milestone (M4) to separate gerrit reviews from code completion
  b. Assume only one release candidate (RC) unless another is determined to be necessary (i.e., vs planning for 3)
