LFN Developer & Testing Forum
2022 TSC priorities and Action Plan

Catherine Lefevre
2022 TSC Priorities

- Pursue ‘Unmaintained” Project recommendation implementation, in particular to address any Security issues i.e. log4j; define ONAP MVP and Alternatives
- Execute our CNF/Cloud Native Roadmap & Accelerate our Enterprise Roadmap, engaging additional companies to help us on the development/testing
- Migrate to Gitlab
- Promote “What We Have Done” (Webinars, Trainings, Demos, Certifications) & “What We Collaborate with Others”& Rewards
- Implement TAC Badging Proposal
- Continued evolution to leverage emerging technologies to support DMAAP/DCAE, CNF-O Transformation, ONAP package for SMO, etc. and IBN, 5G/Network Slicing Use Cases and alignment with other Open Source Communities (5G Blueprint initiative, etc.)
- Formalize ONAP as key player in open RAN @ O-RAN SC TOC Level
2022 TSC Action Plan
Topic for TSC Call on 1/20/2022

Priorities

- Pursue ‘Unmaintained’ Project recommendation implementation
- Define ONAP MVP and Alternatives
- Execute our **Cloud Native** Roadmap & Accelerate our **Enterprise** Roadmap
- Migrate to Gitlab
- Promote “What We Have Done” (Webinars, Trainings, Demos, Certifications) & “What We Collaborate with Others” & Rewards
- Implement **TAC Badging** Proposal
- Continued evolution to leverage emerging technologies to support DMAAP/DCAE, CNF-O Transformation, ONAP package for SMO, etc. and IBN, 5G/Network Slicing Use Cases and to align with other Open Source Communities
- Formalize ONAP as key player in open RAN @ O-RAN SC TOC Level
