Community & Ecosystem**

# Anti-Trust Policy Notice

- Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrustpolicy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

# Code of Conduct

- The Linux Foundation and its project communities are dedicated to providing a harassment-free experience for participants at all of our events, whether they are held in person or virtually. Linux Foundation events are working conferences intended for professional networking and collaboration within the open source community. They exist to encourage the open exchange of ideas and expression and require an environment that recognizes the inherent worth of every person and group. While at Linux Foundation events or related ancillary or social events, any participants, including members, speakers, attendees, volunteers, sponsors, exhibitors, booth staff and anyone else, should not engage in harassment in any form.
- For the complete Code of Conduct, please see <https://events.linuxfoundation.org/about/code-of-conduct/>

- Good news – much simpler than our standard DTFs!
- We'll be using this Zoom bridge all day – staff has opened, so no host keys, etc.
- Two 15 minute breaks
- We have skeleton minutes pages for each session pre-created:  
<https://wiki.lfnetworking.org/x/hJEZB>
- Please volunteer to scribe!

- This workshop is intended to progress key strategic discussions begun at our January event
- Day 1: CNFs, CNFs, CNFs
  - CNF to specific platform 1:1 as a deployment requirement does not and cannot scale.
  - What is the highest priority activity that will reduce the cost due to re-work for end users, platform vendors, workload (CNF) vendors?
- Day 2: ONAP/ECMO Alignment and Community Tooling and Documentation
  - ONAP/EMCO architecture, use case alignment, and deployment options
  - Documentation and tooling discussion follows from January plenary topic

# Cross-Community Interaction

- Each Session should have a clearly defined objective and scope statement.
- When offering your thoughts, please be concise. We ask you avoid monopolizing the conversation.
- When someone is speaking, please allow them to complete their thoughts.
- While debate is an underpinning of growth, decorum is the foundation of progress.
- The Facilitator/Presenter and Moderator will work to keep the discussion aligned with objectives and scope. Discussions that are not in alignment with objectives and scope will be deferred.
- The Moderator will record the deferred topics in a topic “Parking Lot” to be addressed by assignment to community representatives at the conclusion of the session.
- Each session should be served by a scribe

# Go Forth and

**Learn. Teach. Create. Listen. Collaborate. Be Kind.  
MAKE PROGRESS**
