

## Existing Open-source Project

- ✓ Download helm charts and images from existing repo, and include them in cloud native OAM builder
- ✓ No source code included
- ✓ Each category of functions is an independent helm chart

## Agent Layer code

- ✓ Each function will have an agent-layer functional module
- ✓ All agent layer functional module will be created as one microservice and packaged into one helm chart

## Data sharing + Processing Layer code

- ✓ Each function will have a data-sharing-layer functional module and processing-layer module, which are tightly related to each other
- ✓ To avoid creating too many microservices, for each function, data-sharing-layer functional module and processing-layer module are created as one microservice and packaged into one helm chart

## NF functions

- ✓ Reference for NF design, not included as code

# Cloud Native OAM Progress

No	Function	Progress	Target code uploading time
1	Authentication and authorization	Code completed. Compile and deployment checking	Middle Sept.
2	Subscription interface on observability data	Coding	Middle Sept.
3	NF alarm management function	Coding	Middle Sept.
4	NF log management function	Coding	Middle Sept.
5	Topology management function	Coding (adding northbound interface on Mavenir TMaaS)	Early Oct.
6	NF performance management function	Not Start	Early Oct.
7	NF configuration management function	Not Start	Early Oct.
8	NF register function (jar)	Code completed. Compile and deployment checking	Middle Sept.
9	NF management function (jar)	Coding	Middle Sept.
