Folks -- Queuing up a couple of quick questions for tomorrow, which arose in our work to finalize the documents.

For Technical Charter (TC):

- Does inception of the project occur immediately upon adoption of the TC or can it be at a later time?
- The TC requires us, upon project inception, to set forth Committers within a certain file in the s/w repo. We don't currently have a github for ProD3. Should we ideally create and populate a ProD3 github before project inception?
- Any guidelines on creating such a github?
- Confirm that we can initially have two Committers (we expect this to be Steve and Latha).
- Confirm that a Committer can resign. Section 2.c.iii of the TC discusses removal, but does not address resignation.

For Contribution Agreement (CA):

- See attached with an edit related to copyright, per our email correspondence. Lmk if this looks OK.
- As above, do we need to establish the github first, so we can enter the URL in CA Schedule 1?

We look forward to speaking with you tomorrow.

Diane E Duffy  
Program Director (Tech)
