Antitrust Policy Notice

- Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at http://www.linuxfoundation.org/antitrustpolicy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.
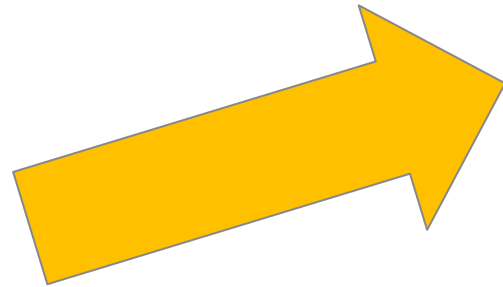

Code of Conduct

- The Linux Foundation and its project communities are dedicated to providing a harassment-free experience for participants at all of our events, whether they are held in person or virtually. Linux Foundation events are working conferences intended for professional networking and collaboration within the open source community. They exist to encourage the open exchange of ideas and expression and require an environment that recognizes the inherent worth of every person and group. While at Linux Foundation events or related ancillary or social events, any participants, including members, speakers, attendees, volunteers, sponsors, exhibitors, booth staff and anyone else, should not engage in harassment in any form.

- For the complete Code of Conduct, please see https://events.linuxfoundation.org/about/code-of-conduct/
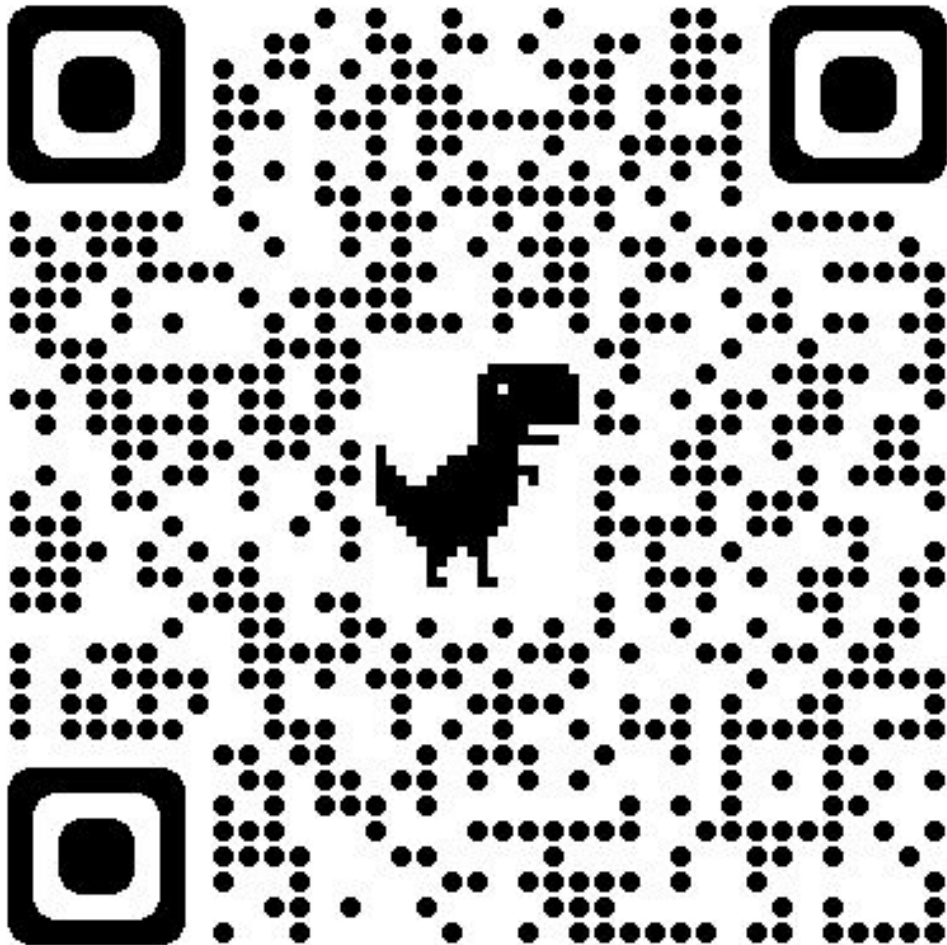

PLEASE REGISTER!

- This is a personal request from the staff as it makes our lives much, much easier to manage events. :-)

- **Register Here** or follow the link on the LFN wiki page

Event Survey

- LFN depends upon this input to adapt and adjust these events to meet community needs

- It is also another tool that is super important to the staff ;-)

- This is in addition to the Ops Survey (overall technical operations)

- Please give us as much feedback as possible

https://linuxfoundation.surveymonkey.com/r/LFNJune23

Cross Collaboration

- Collaboration remains top of mind for most people

- Folks are much less satisfied in this area year-over-year

- LFN staff's strategic role is to help *facilitate* collaboration
- *Should* be one of LFN's core strengths

Project Collaboration Within LFN

Project Collaboration Outside LFN

Cross Collaboration was **the** pervasive tenor of this year's survey

In written comments cross Project collaboration towered above all else, with the majority of responses containing 2 or 3 of the 4 themes below:

- **Gratitude** for the number of cross collaboration opportunities we have provided for our communities

- **Confusion** over the fact that so few Projects actually took advantage the opportunities we have given them

- **Frustration** over external communities completely ignoring LFN Projects when our Projects have reached out to collaborate

- **Dismay** that new networking Projects are constantly launched outside of LFN; Joining LFN should be the default

Let's make this a topic for Thursday's Town Hall session

Collaboration within LFN

- What are obstacles to collaborating with your sister projects?
- What are obstacles to collaborating with cross-community initiatives (e.g. 5GSBP)
- What would meeting/exceeding expectations look like for you and your project?
- What needs to change?
 - LFN staff can't be solely responsible for executing this

Collaboration beyond LFN

- What are obstacles to collaborating with projects outside LFN?
- What are the top priorities for collaboration (what technical work with which organizations)?
- What would meeting/exceeding expectations look like for you and your project?
- What are some next steps and AIs?
-

SAVE THE DATE!

- In-person event

- InterContinental Hotel, Budapest, Hungary (*contract pending*)

- More information soon!
