2023-06 LFN Developer Event Topics June

Tips for Advertising, Planning, and Managing your Topics

Virtual D&TF session guidelines

Topic Submission deadline is 19 May 2023

Session Info

- Plenary Topics
- General Interest Topics
- OpenDaylight Topics
- ONAP Topics
- Anuket Topics
- Tungsten Fabric Topics
- XGVela Topics
- ODIM Topics
- L3AF Topics
- 5G Super Blueprint Topics
- FD.io Topics
- Nephio Topics
- Adjacent Networking Topics

Create a topic Proposal by clicking on the appropriate template creation button below.

*** Please take a look at the topic guidelines page before creating a session! ***

Registration

- Event Schedule
  - Topics
  - Convince Your Boss to attend!
    << LOOK!
  - D&TF Slack Instance #hallway
  - Event Survey
  - Feedback events@lfnetworking.org

Plenary Topics

- 2023-06 - Plenary: Closing Town Hall — 60m
- 2023-06 - Plenary: CNF Certification values and Status — 15min Yan Yang
  Introduce CNCF CNF certification program and AAP CNF certification program
  explore the value of CNF certification for operators
  and cooperation between two certification programs
- 2023-06 - Plenary: Daily Summaries for '23 June Developer Event — 30 mins
  A brief recap of the most important highlights from the day's session from the perspective of our community leaders. Not recorded.
- 2023-06 - Plenary: Opening and Welcome — 60m, Heather Kirksey, Kenny Paul
  Opening session welcome to the community and event logistics

General Interest Topics

- 2023-06 - General: Cross community collaboration for ORAN IMS through O-Cloud Operator — 60m, Seshu Kumar Mudiganti VH Sunny Gupta
  The agenda of this slides is to give a brief intro to K8s Operator.
  Explain what and how K8s operator works and how Nephio uses them now. Use of a K8s operator in the automation through Gitops.
  We will then showcase this with a demo.
  #Nephio #ONAP #ORAN-SC #ECMO
- 2023-06 - General: LFX "Ask Me Anything" Panel — 60m, Henry Quaye, Asitha de Silva, Andres Tobon
  An AMA session centered around the LFX tool suite

OpenDaylight Topics

Content by label

There is no content with the specified labels
ONAP Topics

- **2023-06 - ONAP: CPS road to Gold security badge** — 60min Toine Siebelink, Lee Anjella Macabuhay, Tony Hansen
  
  Overview and CPS perspective of achieving high-quality software development and recognition through badging.

- **2023-06 - ONAP: Enhance general intent implementation solution in R12 and R13** — 60m, Keguang He
  
  Introduce the enhancements about the general intent implementation in R12, as well as the planned intent enhancement related work in R13.

- **2023-06 - ONAP: ONAP Java components performance improvement** — 30min, Dipankar Chatterjee Bhagyalakshmi R Roopashree Sakharayapatna Nayak
  
  Exploring alternate frameworks to Springboot based microservices in order to improve the cloud Native performance of Java based ONAP components.

- **2023-06 - ONAP: SECCOM Montreal update (30 minutes)** — 30min Pawel Pawlak, Amy Zwarico, Tony Hansen, Muaddasar Ahmed Byung-Woo Jun
  
  Overview of SECCOM requirements and updates for a Montreal release.

- **2023-06 - ONAP: Streamlining the process** — 60 min, Magnus Buhrgard Byung-Woo Jun
  
  Proposal and discussion on ONAP transformation following the new mission statement

- **2023-06 - ONAP: The deployment of IBN with CCVPN use case** — 30m, Zhen Li Henry Yu
  
  Introduce the deployment of IBN with CCVPN use case and discuss ML approaches to extract the intent feature.

  The experience of step-by-step deployment of ONAP usecase will be detailed introduced. Welcome to join in this topic and study how to deploy ONAP in your lab, further enhance your solution and contribute to ONAP.

- **2023-06 - ONAP: YANG Model Automation** — 30m, guanyu zhu
  
  Overview of YANG modules automation which manages YANG lifecycle helps and improve the efficiency of YANG development.

Anuket Topics

- **2023-06 - Anuket: How Sylva is leveraging Anuket Test Frameworks** — #m Cedric Ollivier & Luis Velarde
  
  to highlight how Sylva leverages Functest and Xtesting in its verification jobs

  to discuss next Sylva plans and possible upstream contributions/collaborations

- **2023-06 - Anuket: Kubernetes Reference Architecture (RA2) - Orinoco Release Update** — 60m, Riccardo Gasparetto Stori, Gergely Csatsari, Petar Torre
  
  Update on the Anuket RA2 Orinoco release and survey on the future direction.

- **2023-06 - Anuket: Value of Anuket** — #m - Gergely Csatsari Sandra Jackson
  
  The Anuket project is running a Task force to define the value of Anuket in the future. We are in the process to refocus the project based on the Task Force discussions. In this session we will re-iterate on the previous discussions to share what was discussed before and if time permits will move forward with figuring out the future target of the project.

Tungsten Fabric Topics

- **2023-06 - TF: Getting Started with Tungsten Fabric**
  
  Next topics will be covered in the presentation:

  - an implementation of IPv6 version of TF Metadata service (30 mins);
  - some consideration about improvement of VxLAN capabilities (15 mins).

- **2023-06 - TF: SDN for CloudStack Core and Edge Zones** — 60m Alexandre Mattioli
  
  Tungsten Fabric SDN for CloudStack Core and Edge Zones

XGVela Topics

Content by label

There is no content with the specified labels

ODIM Topics
L3AF Topics

- **2023-06 - L3AF: Integration with 5G-UPF (User Plane Function)** — 30m, SHANKAR MALIK, Shivank Chaudhary
  
  In this Event we will be showing the Integration of L3af with 5G-UPF (User Plane Function).

- **2023-06 - L3AF: Overview of L3AF Project and demo.** — 30m Santhosh Fernandes Jay Sheth
  
  L3AF Project Overview and Traffic Mirroring demo.

5G Super Blueprint Topics

- **2023-06 - 5G SBP: Edge Site Selection and Placement** — #m - Rodney Elder
  
  This discussion and working session will focus on Edge Site Selection and Placement of 5G standalone elements and architecture, with a focus on critical design and operational considerations. The goal is to cover aspects of UPF placement, networking considerations for traffic break out to achieve service level differentiation on an end to end application. This session will give participants the opportunity to present and discuss from their specific domain point the contributing components and functions, such as orchestration, interconnection, and capacity planning and performance. The session will provide insights into the networking framework and evolution of 5G Non-stand Alone (or 4G /LTE) and 5G SA MEC or edge cloud workloads, giving participants the opportunity to discuss and analyze the kinds of factors that will affect operational decision-making.

- **2023-06 - 5G SBP: Enterprise Multicloud NaaS Blueprint** — 0m, Withdrawn. Do not schedule. Oleg Berzin Amar Kapadia Ranny Haiby LJ Illuzzi
  
  A blueprint for a new type of use case is being launched under the 5G-SBP. We will explain what it is all about and how it can benefit participating parties. There will be an open discussion on implementation ideas and call for participation.

- **2023-06 - 5G SBP: SEDIMENT for IoT device security and authentication** — 45m, David Shur Yow-Jian Lin Rahul Jadhav
  
  SEDIMENT (SECure Distributed IoT Management) uses a combination of software root of trust, remote attestation (RA), and resource-efficient cryptography, to build a security system that operates across the entire scales of IoT devices, with special emphasis on resource-constrained endpoints. The attestation, which appraises the integrity and trustworthiness of devices, can be integrated with the 5G ONAP AMF to control network/application access. An RA use case, with SEDIMENT RA Verifier and Relying Party being containerized and deployed with KubeArmor to enforce runtime security, will be discussed.

- **2023-06 - L3AF: Integration with 5G-UPF (User Plane Function)** — 30m, SHANKAR MALIK, Shivank Chaudhary
  
  In this Event we will be showing the Integration of L3af with 5G-UPF (User Plane Function)

- **2023-06 - Nephio: Adding Nephio and ONAP to the 5G Super Blueprint** — 60m, Ranny Haiby Timo Perala
  
  Adding Nephio to the 5G Super Blueprint to enhance CNF orchestration capabilities

FD.io Topics

- **2023-06 - FD.io: CSIT Performance Dashboard** — 45min
  
  Overview and discussion of the new LFN FD.io CSIT Dashboard, csit.fd.io, covering VPP and DPDK network data plane testing, performance and telemetry.

- **2023-06 - FD.io: SONIC VPP platform Use Case** — 60m
  
  Introduction of the SONIC VPP platform project use of VPP in the SONIC software architecture.

- **2023-06 - FD.io: StrongSwan-VPP plugin Integration Testing** — 60m
  
  Overview of StrongSwan-VPP plugin use case & working session discussing automated StrongSwan-VPP use case testing.

Nephio Topics

- **2023-06 - Nephio: Adding Nephio and ONAP to the 5G Super Blueprint** — 60m, Ranny Haiby Timo Perala
  
  Adding Nephio to the 5G Super Blueprint to enhance CNF orchestration capabilities

- **2023-06 - Nephio: NBI Adapter for OSS Integration** — 45min Syed Atif Husain Shekhar Chauhan Girish Kumar
  
  Enhance Nephio via a new NBI Adapter to expose capabilities to manage Network Service Topology and Network Service Lifecycle Operations.

- **2023-06 - Nephio: Nephio Today, What's in R1** — Project Nephio is about release its first release. We provide audience with a view of what this first release is all about, what is delivered

- **2023-06 - Nephio: O2 IMS with Nephio** — 30 mins, Sandeep Sharma, Alexis de Talhouët
  
  A discussion of work being done to bring Nephio to the O2 IMS

- **2023-06 - Nephio: Outlook, Nephio Beyond R1** — Project Nephio is just about to complete its first release. In this talk we provide insight to what are the community current plans for going forward, for release 2 and beyond, as well as long term architecture vision for Nephio.
