Welcome to the October Virtual Technical Meetings

Information:

The LFN Technical Meetings are being held concurrently over three days, October 13 - 15, 2020. Once again we will be virtually gathering the LFN technical communities to progress our releases, discuss architecture, and continue the forward momentum of open source networking. We will use a combination of online tools to create a productive and interactive virtual meeting environment. Registration is required and registrants can attend any of the LFN Technical Meeting sessions as desired.

Logistics:

October 13-15, 2020

View Event Website.

Register Here.

Note: Our registration system is now integrated with the Linux Foundation Single sign-on (SSO) platform. After clicking “Register Now”, you will be prompted to log in with your existing SSO account or to create a new one. If you have forgotten the password for an existing account, reset it by clicking “Forgot Password.” You will also be able to use 3rd party authentication providers (Gmail, GitHub, LinkedIn, and Facebook) to automatically generate your SSO Account. If you experience issues, click the “Contact Us” link on the Registration page to connect with our support team.

Details for Presenters:

- Please use the LFN Technical Meetings PowerPoint Template for your presentations.
- We request that you be on your assigned bridge 5 mins prior if possible and sharing your session’s cover slide
- We encourage you to use the following virtual background if your systems supports it: LFN Zoom Background Image
- Join before host is disabled for most bridges. This means that no one can connect to these sessions until they are started by the host account. The exceptions to this are "office hours".
- Auto-record to the cloud is set by default. If there is not a bridge change between sessions, please ensure that you end the recording and then start a new one.
- Please upload your presentation materials to your session on the Topic Proposals page.
- Each session should identify a scribe to take minutes for your session and add them to your community’s prefered location (if you have questions regarding that, please contact your community assistant)
- You or your scribe should add a brief post-session summary to the Daily Summaries page
