

# Project Proposal

## Proposal Submission Guidelines

- Active contributors and community members are welcome to submit a mentorship project proposal for consideration.
- Multiple mentors supervising one mentee per project would be desirable as this helps spread the workload and reduce the challenge of coverage caused by working remotely with a mentee in a very different time zone.
- The mentor(s) need to be familiar with the project and is/are expected to *directly* supervise the mentee's technical work.
- The proposed project needs to be clearly scoped and structured to be suitable for a mentorship project.
- The project should be related to one of the current LF Networking projects such as ONAP, ODL, FD.io, OPNFV, etc.
