- Attendees
- Agenda
- Hacking Track Status
- TOSCA VNF Validation Status
- HEAT VNF Validation Status
- ONS EU / CNTT Prep
- SDC Updates for support of OVP
- Any other business

Outstanding Action Items

Description	Due date	Assignee	Task appears on
☐ Lincoln Lavoie to create a list of documentation "modules" that need to be created for the 2020.r1 release and send that out to the cvc mailing list and submit a topic proposal for the October developer event.		Lincoln Lavoie	2020-09-14 CVC Meeting Minutes
☐ Trevor Lovett To update the VNF 2020.r1 planning page		Trevor Lovett	2020-03-16 CVC Meeting Minutes
☐ Kanagaraj Manickamto add a feature request to the Dovetail portal for the VNF applications		Kanagaraj Manickam	2020-03-16 CVC Meeting Minutes
☐ Lincoln Lavoie to post the Benu Network application to the live site once they activate their LFN membership.		Lincoln Lavoie	2020-03-16 CVC Meeting Minutes
☐ Lincoln Lavoie to work on the updated work flow for the portal to include the CNTT exceptions.		Lincoln Lavoie	OVP2020.r1

Minutes

Hacking Track Status

- Moving forward. There are slides / updates for the upcoming board meeting.
- Opportunity for a Webinar on this topic to help drive interest / participation into the session.

TOSCA VNF Validation Status

- Have almost completed all the development work, just bug fixes remaining.
- Weitao Gao confirmed the SDC enhancements are not required for the badge testing (El Alto will be able to fully support the badge).
- Looks of discussions about "ETSI Compliance" during OSN Days, and it would be good to understand how this work will impact the existing projects (VNFRQTS, VNFSDK, VVP, etc.)
  - Heather Kirksey to find more information.
- TOSCA test cast is still missing from VNFRQTS, this was assigned here: https://jira.onap.org/browse/VNFSDK-452, https://jira.onap.org/browse/VNFSDK-451
  - Rabi Abdel will follow up with the assignee.

HEAT VNF Validation Status

- All code review is completed and merged.
- Working on last minute testing and documentation.
- Lincoln Lavoie to work with Trevor Lovett to spec out requirements for user documentation for the upcoming OVP release (i.e. running testing without Dovetail).

ONS EU / CNTT Prep

- Lincoln has submitted some slides to CNTT meeting to provide an overview of CVC, its structure and relationship to the board and other projects
- ONS Un-conference will have a session CNTT testing framework, etc.
- CNTT will be discussing some future requirements / evolution for the OVP programs, which will likely drive our work plan for 2020.
- Keynote Panel Compliance & Verification (Topics to raise during discussions)
  - Lincoln will highlight up coming release in 2019 to support VNF Validation
  - Hacking Track for upcoming Plugfest / DDF, that is aimed at December / January time-frame
- Items for the LFN Board
  - Will provide an update on the expected 2019 release for VNF Validation Testing.
  - Where do we go from here and how will CNTT feed into these directions.
  - Lincoln Lavoie will provide the slides to the committee to review.

SDC Updates for support of OVP

- Represented the materials from last week (September 9, 2019) to larger audience.
- Lincoln Lavoie to setup a slot during the un-conference for this topic at ONS.

Any other business

- None
