2022-01-12 - ONAP: Unmaintained code handling and its impact on documentation

Topic Leader(s)
- Thomas Kulik
- Pawel Pawlak
- Amy Zwarico
- Eric Debeau

Topic Description
30 min, Thomas Kulik Pawel Pawlak
Discussion across ONAP community on how to handle unmaintained code and how it impacts ONAP documentation. Best practices from other projects are welcome.

Topic Overview
Across ONAP release new project appear and some projects are abandoned. It is crucial to agree on how to handle unmaintained code and how this would reflect ONAP documentation.

Slides & Recording
Live interactive session

LFN-2021-DDTF...ainedCode.mp4
Minutes

- Much time spent running tests / scans on unused code.
- Consensus that this needs to be addressed as a priority
- Need to stop being "scared" of deprecating unused code.
- Discussion of the role that obsolete wiki pages play in confusing what is relevant.
- ODL renames pages as "__DEPRECATED:"

Action Items

- Kenny Paul get discussion on a future TAC agenda 26 Jan 2022
- Kenny Paul look at kernel model for decision making around unmaintained code. 04 Feb 2022
