

Certification

Certification Focus Area

The goal for the group is to create a certification program that any cloud native application vendor (or end-user) can use to demonstrate that they are using cloud native practices. The CNTI Certification focus area operates under the aegis of LFN. The scope of this focus area is to define the process around Cloud Native certification. We collaborate with the [Best Practice](#) and [Test Catalog](#) focus areas who work on the associated use cases and best practices documentation and on the implementation and mechanics of the test catalog.

Key Areas of Focus

- Defines the requirements for certification
- Defines the various levels of certification
- Defines and maintains the process of certification
- Review the test results for vendors seeking certification
- Awards certification status to vendors who meet criteria
- Works with LFN marketing to attract vendor and end user participation

Not in scope for this Focus Area

- Identifying or defining best practices
- Identifying or implementing tests for the testing catalog

Meetings held every other Thursday at 8 AM PT
