Anuket TSC support

Internship Projects/Mentors

Title	Anuket documentation and TSC support tasks
Status	ACCEPTING APPLICATIONS
Difficulty	LOW

Description

Help the Anuket TSC in various tasks. In the area of release management: collect and summarize project specific input from the community, help to plan the next release. In the area of general TSC tasks: collect health metrics of the Anuket sub-projects and present them to the TSC. In the area of documentation: move the CNTT readthedocs project to Anuket, update the related references, update the readthedocs configuration. Move the Anuket documentation out form the opnfvdocs Gerrit repo to GitHub. Automate the GSMA document creation for RM and harmonize the automation scripts. Automate proofreading, manually check links in RM.

Additional Information

Due to the request being part time, Anuket is teaming with Toth (another Anuket project) so that the idea would be that the inter would be able to work on both projects.

Learning Objectives

Learn project and release management of open source projects, general tasks around open source governance. Learn basic tools for open source project production, like readthedocs, GitHub, git and the documentation toolchain.

Expected Outcome

- Anuket Pieman release progress tracking wiki
- Anuket Q release progress tracking wiki
- anuket.readthedocs.org project to be created from cntt.readthedocs.org
- github.com/anuket-project/anuket-documentation should be created from https://gerrit.opnfv.org/gerrit/gitweb?p=opnfvdocs.git;a=summary
- GitHub action to automatically generate RM GSMA docs
- GitHuub action in the Anuket specification repos for proofreading

Relation to LF Networking

Anuket

Education Level

Undergraduate is okay

Skills

Project management, wiki, git, GitHub, GitHub actions, some basic CI/CD skills

Future plans

Preferred Hours and Length of Internship

3 Months Part-Time or 1.5 Months Full-Time (½ of the LF Mentorship Program duration).

Mentor(s) Names and Contact Info

Mentor(s): Gergely Csatari , Nokia
