## E2E test design and strategy

## ONS EU Demo

There will be a demo at ONS EU Antwerp, Belgium to demonstrate TOSCA VNF validation.

## Demo Workflow

Seq	Description	Notes
1	User Onboard VSP into SDC. (upload CSAR file).	the onboard VNF will include vendor VNF and Opensource VNF
2	Validate VSP Package within SDC. (by clicking on Validation TAB).	
3	SDC retrieves available test cases from VTP.	
4	User invokes validation test case by selecting it form available list.	Inputs to be discussed during meeting
5	VTP perform validation test.	<p><a href="https://wiki.onap.org/display/DW/OVP+LCM+Support#OVPLCMSupport-HowTOSCAbasedVNFisinstantiated">https://wiki.onap.org/display/DW/OVP+LCM+Support#OVPLCMSupport-HowTOSCAbasedVNFisinstantiated</a></p> <p>blocked URL</p> <p>Questions:</p> <ol style="list-style-type: none"> <li>1. when trigger the first step</li> <li>2. Before VTP perform validation testing, VTP should create VF from onboarding VSP and assign the VNFM type to VF ,and encapsulate VF to NS. and then can execute on-board VNF and Service from SDC to VF-C</li> </ol>
6	VTP return results to user.	
7	SDC displays result to user.
