INACTIVE (EUAG) LFN End User Advisory Group

NOTE: The EUAG was disbanded in April 2022 as either most of the former member organization are either directly engaged directly with other projects, or are participating in the 5G Super Blueprint.

The LFN Governing Board has made provisions for having End User Advisory Group to assist and support LFN. It can be reactivated at any time. The LFN-EUAG is made of individuals from end-user organizations, including telecommunications carriers, cable operators, network, application, compute or storage service providers and enterprise users.
