## Outstanding Action Items

### Task report

Looking good, no incomplete tasks.

## Agenda

- Task report
- [Minutes](#)
- [NFVI Submission Review](#)
- [Plugfest Planning \(VNF Hacking Track\)](#)
- [OVP Release Planning](#)
- [VNF Testing Demos](#)
- [Any other business](#)

## Minutes

### NFVI Submission Review

- Expecting submission received from Ericsson (legal form received), will contact reviewers as soon as we have the results loaded for review.

### Plugfest Planning (VNF Hacking Track)

- Currently have about 80 participants registered for the October 22 Webinar.
- Week of January 13-17 is morning forward, and location will be in Europe

### OVP Release Planning

- Reviewed the [OVP 2019.12](#) release plan and made updates to status, etc.

### VNF Testing Demos

- TOSCA:
  - TOSCA team provided a demo of running the TOSCA VNF validation testing, including the ONAP CLI.
  - They are working with the Dovetail team to determine where the OVP results formatting should be handled (VTP or Dovetail).
  - Currently, VNF validation is run separately from compliance.
    - Need to ensure we can package the testing into a single run, so we can have a single submission to the OVP portal.
- HEAT:
  - Deferred until next meeting, Monday, October 21.

### Any other business

- Reviewed the CVC slides presented during the LFN board meeting during ONS.
  - Lincoln will work with LFN to get CVC slides to CVC members.
