## CNTT EUAG plan

- [Atul Purohit](#) reviewed a set of CNTT adoption challenges
- Proposing a CNTT/EUAG adoption plan amongst the service providers
- [Rabi Abdel](#) Need to make sure the VNF vendors are aligned to the service provider adoption plans
- [Beth Cohen](#) CNTT is not really a consumable - it's more a forcing alignment within the vendor community
- Operators need to agree that CNTT certified is a part of the acquisition/RFP process
  - Both operators and vendors will benefit from reduced permutation matrix of NFVI support
  - Need to discuss - what are the impacts of CNTT/challenges [Rabi Abdel](#)
  - Propose next week bring in a basic framework
  - Need to define a maturity matrix for the VNFs - (fully virtualized, cloud-native, etc.)
  - Create a road map of what and when [Saad Ullah Sheikh](#)
  - How will this change the procurement process?
- Next steps
  - develop strategy/plan and timeline for white paper
  - Create a simple mapping between CNTT/EUAG
    - Once we identify the CNTT/EUAG intersection
    - Send out a overview of the value props of CNTT AND discover why carriers may not be involved
  - Include this value proposition in the white paper
- CNTT provides technology leadership
  - Defines gaps in upstream projects and push requirements up
  - LFN to help funnel requirements into both LFN projects AND other FOSS projects
