

2019-11-04 CVC Meeting Minutes

Attendees

1. [Lincoln Lavoie](#)
2. [Rabi Abdel](#)
3. [Bryan Whittle](#)
4. [Georg Kunz](#)
5. [Pierre Lynch](#)
6. [Susan Mangini](#)
7. [Tapio Tallgren](#)
8. [Trevor Lovett](#)
9. [Fernando Oliveira](#)

Outstanding Action Items

Task report

Looking good, no incomplete tasks.

Agenda

- Task report
- [NFVI submission review](#)
- [OVP Release Planning](#)
- [Any other business](#)

Minutes

NFVI submission review

- Ericsson has submitted results for review: [67ba9122-cd6c-11e9-93dc-0242ac110002](#)
- Results have been reviewed by Eddy Raineri (Wind River) and Xu Dan (Huawei)
- Results were missing the *all_hosts_info.json*, this was determined to be due to issue with where (the controller) where Dovetail was run.
 - The file was correctly gathered by Ericsson and provided via email to the reviewers and look correct and accurate.
 - The updated / resent *all_hosts_info.json* file and the *SUT_info* is attached to these minutes for reference / archive.
- Can we award the NFVI 2018.09 badge to Ericsson or do we require they re-upload a new tar archive file for review?
 - Group agree to award the NFVI 2018.09 badge to Ericsson.
 - Lincoln will publish the application information to the portal website.

OVP Release Planning

- ONAP EI Alto has officially been released, includes the core functionality for the VNF Validation.
- VNF Validation:
 - Critical topic: Need commercial VNF vendors to participate in beta testing, looking for at least 2 participants for each VNF template type.
 - Documentation:
 - For the 2019.12 read-the-docs, this will be done in the OPNFV Dovetail stable branch, and can be separate pages / sections as needed.
 - Current HEAT / TOSCA how-to guides are in the ONAP wiki, those would be published in the above OPNFV Dovetail read-the-docs.
 - Test case descriptions and requirements are published in the ONAP EI Alto read-the-docs, this would be linked / pointed to from the Dovetail documentation.
- NFVI Validation:
 - Dovetail team will focus on updates to support the OPNFV Hunter Release officially. Test cases / requirements will remain consistent with those from the 2018.09 release.
 - Jira epics have been created to track the major components required for the release: Dovetail update (test scripts), Portal Updates, Documentation Updates.

Any other business

- Dovetail Meeting:
 - Wednesday, 9am EST
 - Meetings are via IRC (chat) only, no voice bridge.
