

2019-12-2 CVC Meeting Minutes

Attendees

1. [Lincoln Lavoie](#)
2. [Rabi Abdel](#)
3. [Tapio Tallgren](#)
4. [Susan Mangini](#)
5. [Bryan Whittle](#)
6. [Trevor Lovett](#)
7. [Jim Baker](#)

Outstanding Action Items

Task report

Looking good, no incomplete tasks.

Agenda

- Task report
- [OVP Submissions](#)
- [OVP2019.12 Release](#)
- [Results Submission REST API](#)
- [Any other business](#)

Minutes

OVP Submissions

- ZTE Lab Submission: [ZTE_Linux_Foundation_Networking_Qualified_Lab_Application_v1.docx](#)
 - Sample Test Results: [9cd34c64-eff9-11e9-904e-0242ac110002](#)
 - Reviewed by (and received +1): [Georg Kunz](#) and [Mika Rautakumpu](#)
 - ZTE will present their application at an upcoming meeting.

OVP2019.12 Release

- NFVI patches for their updates to Dovetail testing
- Documentation updates:
 - Lincoln will create a branch for Dovetail to work on this.
 - Trevor will help write the documentation for the HEAT requirements.
- TOSCA results conversion
 - Python script has been created to convert the VTP output into the Dovetail portal format
 - Users guide will be updated on the ONAP wiki for the TOSCA testing to include the usage of that file.

Results Submission REST API

- Interest in adding REST API feature to OVP portal to automate submission of results to the portal.
- API will need to support both NFVI and VNF testing, as well as support extensions to future testing as well.
- How to secure the API
 - Protect against SPAM results
 - What can be "read back" from the API, i.e. reading another users results, etc.
 - Protect against submitting results on "behalf" of another user.

Any other business

- CNTT Lab Requirements
 - Should OVP Lab Requirements be updated to include CNTT requirements? In general yes, but this will depend on the CNTT certification testing requirements, which are not yet fully defined.
- Next week's meeting will be canceled, next meeting is December 16.
