Guests:

## Agenda

- [Antitrust Policy](#)
- Agenda Bashing (Roll Call, Action Items (5 minutes)
- General Topics
  - (10min) Orientation/greeting
    - Wiki space and invitation to edit
  - (20min) Proposal: [OVPP2 workstreams.pdf](#) [Jim Baker](#)
  - (20min) Understanding CNCF - [CNF Conformance](#) - Bill Mulligan
  - (5min) Next meeting - 23 Mar 2020

## Minutes

- [Boot strap wiki](#) reviewed - [Rabi Abdel Trevor Cooper](#)
  - How does validation testing work? It's not the volume of tests, what tests are commercially significant? Be clear on the purpose of testing
    - Yes - all CNF validation testing need to be driven as requirements
      - CNative requirements
      - CNTT requirements
      - etc.
  - Are we overlapping with 3GPP testing? [Tom Kivlin](#)
    - This will require on-going monitoring.
    - Is 3GPP building test tools and creating tests?
      - There are some tests in place
  - Immediate Needs
    - Identify the tooling/labs
    - Platform details
  - Need to clarify the objectives of the MVP? [Olivier Smith](#)
    - Eg. Support a telco CNF for a greenfield telco environment
    - Eg. Develop a consistent telco container platform for telco workloads
  - Perhaps we need to change all "testing" to "conformance"
  - Next steps
    - better define MVP
    - Mark up the wiki content before the next meeting
- CNCF CNF Conformance testing @Bill Mulligan
  - Reviewed the slides (included above in the agenda)
  - Self-testing of CNFs to verify conformance
  - Open Questions in the deck reviewed
- Future meeting planning [Jim Baker](#)
  - Majority of the participants in the call requested a weekly cadence while we build OVP - Jim to send out doodle poll for meeting times

## Action items
