- RA-1 Chapters 1 - 4 Status Report [Ian Gardner](#)
  - Open Issues & Status
  - Requirements - chapter 2.
    - SiC - propose to remove the requirement for Baldy - look for a common API on top of Neutron / SDN controller later - agreed to remove - does this belong in VNFm or Orchestrator or...
    - Include Barbican - check for API version but as it is a "**should**" - already part of FuncTest.
    - Broad issue for anything without a unified/common-API (e.g. Monitoring) cannot be tested by FuncTest - need to discuss what to do for this
  - Ch4. Reservation of Compute Nodes Cores - PR #1065 - conflict needs fixing to allow merge [Pankaj Goyal](#) to review. Rabi already resolved and PR has been merged/closed.
  - Network Node chapter proposal has gone for mini-review as incomplete currently - need to add DVR as per [Sukhdev Kapur](#) comments - other comments welcome please contact [Pankaj Goyal](#)

    - [Pankaj Goyal](#) will send wording to Cedric to gain agreement for PR #1245
