

WS03: Lab and tooling

Primary Owner: ONAP+OPNFV+CNCf

Contacts: [Frederick Kautz](#) [Kanagaraj Manickam](#) [Trevor Cooper](#) [Ryan Hallahan](#)

Step 1: What are the framework available today. (orchestrator and output gathering)

Step 2: Analysing the framework available and if can be utilised today and where they fit.

Step 3: how to use them and empower them.

Framework to support OVP across different test tools

VNF Test Platform (VTP) - VNFSDK project in ONAP

It provides following options:

1. to run the test cases across different tools (as profile) which can vary across run-time like java, python, etc. [More details](#)
2. to generates the results supported by OVP portal , for any test cases executed across different tools, so tools no need to any result translation. [More details](#)
3. to orchestrate the test cases across different tools (demostrated in ONS EU 2019 conference) [More Details](#)

To support CNF testing in ONAP, proposal is presented to 'ONAP CNF Task force' and 'ONAP arch sub-committee'. [More details](#)
