Table for RI-2 Installer feature list derived from RA-2 requirements

Create a table for RI-2 Installer features derived from RA-2 requirements #1374 https://github.com/cntt-n/CNTT/issues/1374

RI-2 K8s Installer Requirements derived from RA-2	Notes
Must be listed in Kubernetes Distributions and Platforms document and marked (X) as conformant for the Kubernetes version that is being used.	
Runtime installed by the installer must be conformant with CRI and OCI spec.	
CNI plugins - Calico/IPVLAN CNI/MACVLAN CNI/Userspace CNI.	More details here

Generic installer requirements	MVP
RI2 **must** be deployable in private labs (internal operator and vendor labs)	yes
RI2 **should** be deployable on OPNFV infrastructure	yes
RI2 **should** be deployable on public cloud provides (e.g. Packet)	
End-to-end deployment **must** comprise separate steps: i) infrastructure node provisioning ii) Kubernetes deployment iii) application deployment	yes
RI2 **must** must be deployable based on a common lab + feature description file	no
