5	OpenStack Mandatory Features		Manik Sidana	Issue #1156 – no PR	Issue #1156
6	Security: Confidentiality & Integrity		Karine Sevilla	Issue #1217 – no PR;	Issue #1217

| 7 | Cyborg API correction | | Karine Sevilla | At the RA-1 meeting on March 30th decided to remove Cyborg

Need Issue/PR to change Cyborg API to v1 from v2.

Also, suggest that the following comment be added, "Operators are advised not to implement Cyborg (including support for API v1) because of its limited capabilities but more importantly that starting with OpenStack Stein release the data model, including exposed objects, has changed necessitating changes in API where backward compatibility is not possible. Reference: Cyborg API Version 2(https://specs.openstack. org/openstack/cyborg-specs/specs/train/approved/cyborg-api.html)." | |
|---|---|---|---|---|---|
| 8 | Barbican write-up in RA-1 Ch03 | | Karine Sevilla | To raise Issue and Content | |
| 9 | Review SDN in RA-1 Ch 3.2.5 | | Ahmed El Sawaf

Sukhdev Kapur | PR #1391 add a subsection on SDN and reference to Ch 3.2.5

Issue and PR for RA-1 Ch 3.2.5 upgrade | |
