 - [Mark Shostak](#) reviewed the chapter

 - 8.2.4 (Requirements): Discuss on next call
 - 8.3.1 (Entry/Exit Criteria): Can discuss; does anyone see strong impetus for keeping in RM?
 - All other sections: Safe to move to RC or wherever
 - Need to discuss handling of WIP PRs applying to CH08: e.g. <https://github.com/cntt-n/CNTT/pull/1381>
 - If the content is moving, then should we apply this PR before the move?
- **Networking Focus Group**
 - [CNTT Networking FG](#) is the page for the focus group

Actions:

- Mark Shostak to tag content that should move to RC from CH08.

Minutes:

Networking Focus Group:

- Currently, 3 pull requests exist, but there is a desire to combine these three into one pull request, and then to consider this for merging into the RM
 - <https://github.com/cntt-n/CNTT/pull/1325>- Networking Scope
 - <https://github.com/cntt-n/CNTT/pull/1327>- networking strategy principles
 - <https://github.com/cntt-n/CNTT/pull/1361>- layering and concepts

RM Chapter 8 removal discussion

- Most content is already in RC1
- Section 8.2.4 and the second half of section 8.3.1 have value but may not be needed in the RM.
 - They are common to RC1 and RC2, which presents an issue.
 - Do we duplicate this in RC1, RC2?
 - Do we leave this in RM, where it's low-level compared to the span of RM?
 - Do we create a RC-Common area, and who has rights to review/approve content in that section (e.g. /doc/ref_cert/common/<files>?)
 - [Mark Shostak](#) to bounce off of Rabi for guidance on one of these 3 options
- Once the previous issue is decided, we can remove Chapter 8 contents entirely and re-start.
