CNTT RI2 - Kubernetes - Early Efforts

As per the meeting on 1st April (it was after midday in the UK, so not an April Fool!) it was agreed to progress with two Kubernetes implementations:

1. Open source tooling and the Intel OPNFV lab (see CNTT RI-2 Intel-contribution-proposal v01.pdf)
2. CNF Conformance and CNF Testbed tooling and labs

The more detailed documentation what is being deployed and how can be found at the child pages:

- CNTT RI2 - CNF Conformance/Testbed
- CNTT RI-2 - Kubernetes Bare-Metal Test Bed Activity in OPNFV Lab

Milestones

⚠️ TBC - need to agree milestones for checking in, ensuring feedback is being generated, etc.
