2020-05-06 - [CNTT - RI2] - Meeting Agenda and Minutes

Attendees:

Please add your name in here:

- Tom Kivlin
- Michael Pedersen (Intel, Tieto, CNF Testbed)
- Rihab Banday (Ericsson)
- Toshiyasu Wakayama (KDDI)
- Frederick Kautz (NSM)
- Trevor Cooper (Intel)
- Taylor Carpenter (Vulk Coop)
- Georg Kunz (Ericsson Software Technology)

Agenda and Minutes:

- Walk-in Items
    - June vConference - RI2 sessions?
        - Maybe a joint session with OPNFV about leveraging Pharos lab?
    - What is the status of Trevor's lab activity?
        - CNTT RI-2 - Kubernetes Bare-Metal Test Bed Activity in OPNFV Lab
        - Rihab has been working on similar scripting - review the above
    - LFN Webinars - any topics / presenters?
        - CNTT Technical Webinar Topics
- Review previous action items:
    - Georg Kunz - follow up with Governance mailing list with if web version can be made available - CLOSED
        - Jim has enabled web client on all meetings
- Project review: https://github.com/cntt-n/CNTT/projects/27
- AOB
    - Branch/release process: if we are creating PRs for new/improved content, we will label as On Hold until after the Baldy release takes place (new "Baldy" branch will get created). Bug fixes/typos/etc. PRs can be created but use the label "Bug" to identify it can be merged pre-release.
    - Baraque release planning: CNTT Baraque#ReferenceImplementation2
    - Any support for air-gapped installations at this stage? Not without pre-building, pre-provisioning, etc.

Action Items:

- **Everyone** think about June vConf and potential sessions for RI2

Please find recording of the meeting below:
