2020-05-14 - [CNTT - RC2] - Meeting Agenda and Minutes

Attendees:

Please add your name in here:

- Tom Kivlin
- Trevor Cooper (Intel)

Agenda and Minutes:

- Agenda Bashing
  - CNTT Baraque
    - Comments on deliverables
- Performance vs Benchmarking
  - https://github.com/cntt-n/CNTT/issues/1495
    - Agreement in April vF2F was to ensure RA2 includes all CNF requirements - e.g. cloud nativeness, which abstractions to use /expect, etc. - #1496 has been raised to address this.
    - Consider ONAP as a method for deploying CNFs, rather than a source of requirements for RC2 (i.e. if OVP2.0 wants to take ONAP requirements they do so from ONAP, not from RC2).
    - Re. Performance Testing / Benchmarking, we should take the route of identifying the performance tests we want to run, feed into RA2 requirements/specification and potentially also Reference Model compute flavors.
      - Also note, OPNFV VSPERF project is looking at taking benchmark standards, applying to containerised workloads.
- Sharing work between RC1 and RC2
  - https://github.com/cntt-n/CNTT/blob/master/doc/ref_cert/lfn/chapters/chapter02.md#2.1.1
  - https://github.com/cntt-n/CNTT/blob/master/doc/ref_cert/lfn/chapters/chapter02.md#2.7.2
- Chapter Structure
  - Any volunteers for seeding initial content?
- AOB
  - Can we consider extending the meeting to an hour, there is a lot of discussion to be had in these early stages

Action Items

Tom Kivlin to check with Bill Mulligan about extending the meeting duration.
