# 2020-06-01 Meeting notes

## Date

01 Jun 2020

## Attendees

LF Staff:
Committee Members: Trevor Lovett Trevor Cooper Jim Baker Rabi Abdel Patric Lind Ranny Haiby Victor Morales Marc Price
Proxies:
Guests:

## Agenda & Minutes

### Action Item Review

- See below

### Review Work Stream Status

- WS01 - Governance
- WS02 - Requirements
  - Trevor Lovett & Rabi Abdel confirm the scope and types of requirements that RA-2 will include and if lack of traceability to RM is a concern to be solved
    - Attended RA-2 discussion to determine types of CNF Requirements in scope for RA-2.  They intend to focus on requirements strictly that deal with how a CNF interacts with NFVi resources and the orchestrator vs. any strictly Cloud Native-ness requirements.  As an example, they do not intend to prescribe the type of package manager used.
- WS03 - Lab & Tooling
- WS04 - Cloud Platform Conformance:
- WS05 - CNF Onboarding
- WS06 - CNF Conformance
- WS07 - ONAP POC
- WS08 - Cloud Platform Performance Testing
  - Status of performance in RC2
    - Focus will be on performance testing metrics and methods to drive how performance testing is done and measured.  Minimum performance criteria would be added later after experience gained.
    - Many requirements in the RM and RAs that are related to performance - either explicitly relates to a feature / capability for achieving a performance objective or implicitly has an impact on performance
    - Initially it is unlikely that we can identify and agree on minimum performance criteria
    - Where feasible we will specify performance related test methods and specifications with metrics that show a relevant capabilities is present and working as expected
    - Once feasible intention is to add minimum performance criteria in line with hardware and software profiles

#### LFN Webinar Series

- Upcoming webinar on CVC and VNF Progress by Lincoln
- Do we need to provide an OVP 2.0 webinar and what do we need to accomplish to provide an update?

### Submission of Topics for June F2F

- Should there be a session focused on defining common definition and metrics across RA/C/I-1  and RA/C/I-2?
  - Rabi will propose a session for the F2F.
  - CNTT - Where performance is relevant to CNTT
- Session providing update on OVP 2.0 and related projects on badging with focus on driving discussion on open items
  - Tiered/scored badging
  - Importance and role of performance in initial badging
- Moderated panel of operators on role and importance OVP 2.0
  - Marc submitting the proposal
  - Rabi will help Mark with operators

Deadline is close of business (PST), on Wednesday.

### Discuss Refinement of CNOVP Boot Strap/MVP

- OVP 2.0 Boot Strap
