

2020-06-18 - [CNTT - RA2] - Meeting Agenda and Minutes

- [Attendees](#)
- [Agenda and Minutes](#)
- [Actions](#)
- [Meeting recording](#)

Attendees

Please add your name in here:

- [Tom Kivlin](#)
- [Pankaj Goyal](#) (AT&T)
- [Georg Kunz](#) (Ericsson Software Technology)
- [Ulrich Kleber](#) (Huawei)
- [Michael Pedersen](#) (Tieto, Intel)

Agenda and Minutes

- Antitrust notices
 - [Linux Foundation Anti-Trust Policy Notice](#)
 - [GSMA Anti-Trust Policy Notice](#)
- Walk-in items
- Agenda:
 - Project Review: <https://github.com/cntt-n/CNTT/projects/10>
- AOB
 - No meeting next week due to vConference
 - Q from [Frederick Kautz](#)- how to deal with different "profiles" - i.e.different requirements on the cluster. TK: partly this is what CNTT is trying to avoid (i.e. to create consistency), but partly also I think we're missing detail on the different requirements for e.g. 5GC, vBNG, vRAN CNFs and whether that has cluster-wide impact and therefore a choice in the RA2 spec. [Card created](#), for thought over the next two weeks and discussion next meeting (2nd July).

Actions

- ☐ Everyone by **02 Jul 2020** - have a think about how to approach the issue Frederick has raised.
