- Agenda and Minutes
- Meeting Recording

Attendees

Please add your name in here:

- Tom Kivlin
- Georg Kunz (Ericsson Software Technology)
- Rihab Banday (Ericsson)
- Michael Pedersen (Intel, CNF Testbed)
- Victor Morales (Samsung)
- Rabi Abdel (Vodafone)
- Pankaj Goyal (AT&T)
- Toshiyasu Wakayama (KDDI)

Agenda and Minutes

- Walk-in Items
- Project board review: https://github.com/cntt-n/CNTT/projects/27
    - We need to be aware of the positioning of various installers from companies/vendors - suggested approach:
        - Lead with the Community Implementations (e.g. OPNFV Kuberef (planned), TIP (collaborating with Canonical), CNF Testbed)
    - We are looking for a community-led installer that is well supported within that community
    - CNF Testbed, ONAP MultiCloud K8s, MBRA are all based on Kubespray
    - Within RI2, should we focus our initial Ch4 activities around Kubernetes installer on Kubespray?
        - Kubernetes installer activities - let's try to bring them together: https://github.com/cntt-n/CNTT/issues/1374
        - Continue the analysis to understand the options: Kubernetes Installer Requirements derived from RA-2
- AOB

Meeting Recording

Topic: CNTT RI2 Kubernetes Weekly Meeting
Start Time : Jul 8, 2020 08:01

Meeting Recording:
