Minutes

5G adoption white paper

- Still some gaps in the white paper that need resolution before authoring white paper [Atul Purohit](#)
 - [5G Paper Proposal Draft 0.4.pptx](#)
 - Proposed timeline results in 5G white paper in April 2021
- 5G Adoption from CNTT perspective and intro Open Core/TIP for white paper [Ahmed El Sawaf](#)
 - Shared CNTT RA2 architecture diagram showing the scope of work
 - [Javier Ger](#) Are we aligned with ETSI around container architectures?
 - Stable draft that includes cloud native architectures is within ETSI - CNTT aligns with ETSI
 - TIP references other standards - including a reference architectures
 - XGVela (new LF project) defining CaaS layer and is engaged with CNTT

Expand beyond ONAP focus

- Oct 13-15 confirmed for the virtual technical meetings
- Splash page and registration page in process - planned for live 14 Aug 2020
- Typically have had extended EUAG meetings during LFN technical events
- Options are to reach out to other communities and invite them to attend, EUAG members present how they have implemented other LFN technologies
- There are some operators in CNTT that are not in EUAG [Ahmed El Sawaf](#) to reach out to these operators at CNTT Governance call and solicit to join the EUAG
- Would it make sense to split the EUAG across all the projects? [Javier Ger](#)
 - Reaching out to different projects will engage additional participants from the operator community - so perhaps domain specific guests /participants will broaden the perspective of the EUAG
 - Should continue the dialog on how to keep reaching out
 - [Ahmed El Sawaf](#) Have a specific plan to reach out on key topics/industry projects and communities for the entire year?
 - [Olivier Augizeau](#) Have a small presentation from the projects at EUAG meetings on use cases and new features emerging in current and near term release?
