

# 2020-09-03 - [CNTT - RC2] - Meeting Agenda and Minutes

## Attendees:

Zoom link: <https://zoom.us/j/92317903558>

Please add your name in here:

- [Taylor Carpenter](#) - host
- [Tom Kivlin](#)
- [Cedric Ollivier](#)
- [Al Morton](#)
- [Lucina Stricko](#)
- [Pankaj Goyal](#)

## Agenda and Minutes

- Can someone host the next two meetings
  - [Taylor Carpenter](#) is the host this week
  - [Tom Kivlin](#) is the host next week (Sept 9th)
- Issue Review: <https://github.com/cntt-n/CNTT/projects/32#card-36881576>
  - Terminology definition for testing per issue <https://github.com/cntt-n/CNTT/pull/1649>
    - Need conflicts resolved then it can be merged. Trevor tagged
  - Kubernetes API benchmarking <https://github.com/cntt-n/CNTT/pull/1903/files>
    - Previous comments
      - Can we make this consistent with #1868
      - is this related to #1743
    - Request was to merge in any order and then deal with conflicts because of Github limitations on dependencies
  - The initial content of Kubernetes Traceability Matrix <https://github.com/cntt-n/CNTT/pull/1868/>
    - [CNTT RA-2 requirements \(snapshot\)](#) and relationship to testing in different initiatives [https://docs.google.com/spreadsheets/d/12EWZVvlumktXoywvmlYPR\\_DrU34e7Gk\\_rSED3VyCG4o/edit](https://docs.google.com/spreadsheets/d/12EWZVvlumktXoywvmlYPR_DrU34e7Gk_rSED3VyCG4o/edit)
    - Currently focuses on high-level requirements.
    - Would like to see how to call the test from OPNFN Functest
      - Let's take a look at an example of that. Then decide where we want the high-level and "usage" information.
      - If we keep high-level and usage versions, the content could be in this chapter in the same table, split into different tables, or a different chapter altogether.
  - Requirements and Testing Principles PR <https://github.com/cntt-n/CNTT/pull/1738>
    - "Result reports must clearly delineate violations of mandatory vs. optional requirements" should this be removed or not?
    - Currently RC2 will only run test cases covering mandatory requirements. (No optional requirements will be covered)
    - +1 from everyone on call to remove text and merge.

### Deferred

- Fix Test Integration Introduction <https://github.com/cntt-n/CNTT/pull/1880>
  - We need one more reviewer, who can help?
- Chapter restructure <https://github.com/cntt-n/CNTT/pull/1926>
  - Do we have more reviews?
- Kubernetes security <https://github.com/cntt-n/CNTT/issues/1743>
  - Can we close for now unless there are security requirements in RA2?
- Add API benchmarking <https://github.com/cntt-n/CNTT/issues/1745>
  - we don't conform to RC1, can you explain?
- AOB
- Workload + CNF shared requirements that can be used by different efforts (eg. OVP2 + CNTT and CNCF)
  - [https://docs.google.com/spreadsheets/d/1TxrrCDKQEzca\\_snuIXMAcz4GCHj9b99-Obnhs20rCB0/edit#gid=2002882762](https://docs.google.com/spreadsheets/d/1TxrrCDKQEzca_snuIXMAcz4GCHj9b99-Obnhs20rCB0/edit#gid=2002882762)
  - Collaborative effort. Identify the type of requirement. Potential testing source. Where the requirement comes from
